

Venkata Deepthi Kancharla

Java Full Stack Developer

+1 (469) 751-7706

dkancharla6304@gmail.com

Objective

Seeking a challenging role as a Java Full Stack Developer where I can leverage my expertise in Java programming along with proficiency in front-end and back-end technologies to contribute effectively towards the development of innovative software solutions. Eager to collaborate with talented teams in a dynamic environment to deliver high-quality, scalable applications that meet client requirements and exceed expectations.

Professional Summary

- Over 5+ years of IT Professional experience in all phases of software development life cycle to requirements gathering Analysis, Design, Development, Maintenance and Implementation of enterprise, web and client server applications using **JAVA/J2EE** technologies.
- Extensively worked on **Spring MVC, Spring JDBC, Spring Boot, Hibernate, Docker** containers, and JPA.
- Experience in writing functional Test cases for new features using Cypress and **Playwright** for comprehensive functionality testing. Involved in writing **Java** API for **Amazon Lambda** to manage some of the **AWS** services.
- Expert developer using **Spring Boot** for radically fast building of **Microservices** and develop Cloud based Micro service applications with very less configuration. Well experienced with build tools like **Gradle, Maven** and **Ant**.
- Implemented **Spring Boot Microservices** to process the messages into the **Kafka** cluster setup. Experience working with **CI/CD** tools such as **Bamboo, Jenkins, Jira, Bitbucket** etc. and implementing custom plugins.
- Extensive experience in using IDEs like **Eclipse, Spring Tool Suite**. Experience with web services, Groovy/Grails, EXTJS, XML/XSLT, Struts, Log4j, Maven, Spring (Core, Spring Boot, Spring Data), and Angular.
- Designed and developed **J2EE MVC** applications using **Struts, Spring MVC** and **Spring Boot**.
- Knowledge on various **Docker** components like **Docker Engine, Hub, Machine, Compose** and **Dockers Registry**.
- Experienced with developing rich user interface applications using **HTML5, CSS3** and **JavaScript, jQuery, Angular, Node JS, React, Backbone JS, Twitter Bootstrap, jQuery Mobile, XML, JSON** that follows W3C Web Standards and are browser compatible. Work experience with testing tools and applications such as **JUnit, Mockito, and SoapUI**.
- Expertise with using **Oracle, SQL Server, MySQL** databases and writing **SQL** and **PL/SQL** queries.
- Good experience in Optimizing MapReduce algorithms using Mappers, Reducers, combiners and partitioners to deliver the best results for the large datasets. Hands-on experience in version control tools like **Git, GitHub, SVN** and **CVS**. Experience in using Web/Application servers like **WebLogic, JBoss, Glassfish** and **Tomcat**.
- Experience in **Java** Thread Dump Analysis and familiar with thread dump techniques. and also having experience in **Java** Web Services. Good experience in **Agile** and **SCRUM** methodologies. Complete understanding of the DevOps process with continuous integration using **Jenkins, JIRA, GIT, CHEF**.
- Expertise in developing model components using ORM technologies like **MyBatis, Hibernate**
- Experience in developing **SOAP** based Web Services using **Apache CXF** and **JAX-WS**.
- Experienced in developing **Restful Services** using **JAX-RS** specification like **Jersey** and Rest Easy to implement **REST** based Application. Experience in using **Socket** Programming.
- Experience working on **Web Services SOAP & REST, JAX-WS, JAXB, WSDL** and **UDDI registry**. Expertise in implementing Service Oriented Architectures (**SOA**) using **XML** based Web Service such as **SOAP, UDDI** and **WSDL**.
- Experience with Cloud Computing Service environment like (**AWS**) Amazon Web Services (**EC2, EBS, S3** and **ELASTIC SEARCH**). Experience in using bug/issue tracking, project Tracking and Management tool **JIRA**.

Education Details

University Of Central Oklahoma, USA

- Masters / Computer Science -

(2023 - 2024)

Technical Skills

Programming Languages	Java, C++, PL/SQL, .Net, Python
Web Technologies	HTML5, CSS3, JavaScript, AJAX, JSON, Bootstrap, jQuery, Angular 4/6/8/9, React JS with Flux, Redux, Ember JS, Backbone JS, NodeJS, Express JS
J2EE Technologies & Frameworks	Servlets, EJB, JSP, JDBC, SOAP, WSDL, REST, XML, JAXP, JAXB, JPA, JMS, Spring3.x/4.x/5.x, Hibernate, Spring MVC, Spring Boot, Spring Data, Spring Batch, Spring cloud, Spring JDBC, Dump Analysis.
Databases	Oracle 8i/9i/10g/11i, DB2, SQL Server, MYSQL, MongoDB, Cassandra
Application/Web Servers	Oracle Web logic, IBM Web Sphere, JBoss, Glassfish, Apache Tomcat
Messaging Services	JMS, Active MQ, Rabbit MQ, IBM MQ, Apache Kafka
Web service frameworks	JAX-RS, JAX-WS, Apache CXF, Axis, Jersey
Software Methodologies	Agile, Scrum, TDD, Waterfall
Build & Configuration Tools	Ant, Maven, Gradle, Jenkins, Bamboo Gulp, Grunt, Webpack, NPM, Bower
Testing Tools	Junit, TestNG, Mockito, Jasmine, Karma, Mocha, Chai, Protractor, SOAP UI
Version Control Tools	GIT, SVN, GitLab, Bitbucket, TFS
Project Management Tools	JIRA, Rally, Microsoft Project
Cloud Technologies & DevOps Tools	AWS, PCF, EC2, EBS, S3, Docker, ECS, EKS, SQS, RDS, S3, Glacier, Lambda, Kubernetes
Operating System	Windows, Linux, Unix, MAC, MS-DOS
IDE's	Eclipse, Visual Studio, IntelliJ, Spring Tool Suite, Sublime Text, WinSCP, Putty

Relevant Experience

Java Full Stack Developer Firestone Holdings

August 2024- Current
Austin, Texas, USA

Firestone Holdings LLC operates as a holding company. It manufactures semiconductors and related solid-state devices. I work with CI/CD pipelines using tools like Jenkins, GitLab CI, or Bamboo. Deploy applications to cloud platforms. Design, develop, and maintain scalable web applications using Java, Spring Boot, and related frameworks.

Key Responsibilities:

- Used Ion Api in conjunction with other **AWS** services, such as Amazon s3 for storing and retrieving Ion data, **AWS Lambda** for serverless computing and **AWS DynamoDB** for **NoSQL** database operations.
- Implemented the data persistence functionality of the application by using **Hibernate** to persist java objects to the relational database. Involved in creation and maintenance of **CI/CD** pipelines. Used **Spring** Frameworks IOC Dependency Injection to inject Service Object using Service Locator Design Pattern into Action Classes.
- Extensive experience in data ingestion technologies like **Kafka**, flume and Sqoop. Used **React** as framework to create a Single Page Application (SPA) which can bind data to specific views and data with server.
- Good Knowledge in developing Express, working with **Microservices** backend with **RESTful**, GraphQL, gRPC etc. type of services. Used **Oracle** as database and involved in the development of **PL/SQL** backend implementation.
- Used **Kafka** streams as a message-bus and developed data pipelines to ingest data to **NoSQL** data-stores like **Cassandra**. Implemented Web-Services to integrate between different applications internal and third-party components using **SOAP** and REST services using Axis2, **Kubernetes**.
- Participated in **Agile (Scrum)** methodology and Involved in **Design, development, System Testing and User Acceptance Testing**. The application is based on **Micro Service Oriented Architecture** using **Angular 4.0** and **Cassandra DB** and **MySQL** to develop **Single Page Applications (SPA)**.
- Implemented **Angular 4.0 directives**, expressions, routing capabilities for bookmarking, filters, validations and **Angular** UI components, Components, ng-Modules, Providers, Services and classes for navigation respectively.
- Worked with **Angular CLI** and **Typescript** in **Angular 4.0** to create Controllers and **Angular** components for the **Web Pages**. Optimized performance is achieved by **Angular 4** Lazy Loading. Used **Spring Boot** which is radically faster in building cloud **Micro Services** and develop **Spring** based application with very less configuration.
- Extensively used **React-Router** techniques **Axios service** to retrieve data from server synchronously.

- Involved to implement various screens for the front end using **React.js** and used various predefined components from **NPM (Node Package Manager)** and **redux library**.
- Implemented **Elastic Search** for caching to enhance the performance of application.
- Implemented **Node JS** as a server-side proxy for an observing various response time.
- Implemented modules into **Node JS** to integrate with designs and requirements.
- Used Node Package Manager (**NPM**) to manage modules & used it to install useful tools as **Grunt** and **Express**.
- Used **Express JS** which is fast, assertive, essential and moderate web framework of **Node.js** that helps manage a sever and routes. Worked with **Express JS** which gives **MVC Structure** to the **Node JS**.
- Experienced in **React JS** framework and working with **React Flux** Architecture. Used **Java 8 Lambda Expressions** and **Stream API** to handle collections of data in a more functional and declarative way.
- Installed Pivotal Cloud Foundry on **EC2** to manage the containers created by Pivotal Cloud Foundry (PCF).

Environment: AWS, AWS Lambda, Cassandra, CI/CD, DynamoDB, EC2, Hibernate, Java, Java 8, Kafka, Kubernetes, Lambda Expressions, Microservices, NoSQL, Oracle, PCF, PL/SQL, React, React Flux, RESTful, SOA, SOAP, Spring, SQL, Stream API

Java Full Stack Developer Wells Fargo

Mar 2023 - Jun 2024
Irving, Texas, USA

Wells Fargo & Company is an American multinational financial services company. I developed the RESTful APIs and microservices with Java and Spring Framework. Ensured the efficient integration with databases, such as Oracle, PostgreSQL, or MongoDB. Built RESTful APIs and microservices for seamless client-server communication.

Key Responsibilities:

- Designed Validation service on **Spring MVC** framework for integration with my sql database, and an UI feature.
- Used **Azure** Functions to integrate applications and run backend processes according to schedules without provisioning/managing servers. Implemented REST **Microservices** using **Spring Boot**. Generated Metrics with method level granularity and Persistence using **Spring AOP** and **Spring Actuator**.
- Developed front-end applications using **React**, **Flux**, **Node.js** and **Docker** and Built **Spring** based **Java** Enterprise Web application. Expertise in coding optimized **SQL** queries on databases like **Oracle**.
- Developed and implemented views using **HTML5**, **CSS3/LESS**, **Bootstrap 4.0**, **AJAX**.
- Worked on responsive design and developed a single ISOMORPHIC responsive website that could be served to desktop, **Tablets** and mobile users using **React.js**. Worked with **React JS** to build **Bootstrap** components for responsive **UI** Objects and linked with **API** data to view render the virtual **DOM** dynamically.
- Used **Redux Framework** architecture (like Reducers, Containers, Saga) for integrating the data with React-Native Application and created and used Reducers to modify Store State Tree. Pleasant Experience in **React.js** for creating interactive UI's using One-way data flow, **Virtual DOM**, **JSX**, **React Native** concepts.
- Injected **Angular4** built-in http service to custom services to communicate with backend with **RESTful APIs** and Used Pipes to format and sort data displayed in the templates. Used **Axios AJAX** request to retrieve data from server simultaneously. Implemented **Spring IOC** for inter connection between modules in our application.
- Used **Angular CLI** to generate components, services, filters and compiled in different environments.
- Extensive experience in developing **Microservices** using **Spring** frameworks and followed domain driven design.
- Created **Angular 5** service and integration with RESTful APIs. Developed views using **Bootstrap** components, **Angular-UI** and involved in configuring routing for various modules using angular UI router.

Environment: Agile, Angular, AOP, Apache Kafka, AWS, Azure, Bootstrap, CI/CD, Docker, EC2, Java, Jenkins, Jira, Kafka, Microservices, MVC, Node.js, Oracle, React, RESTful, Spring, Spring Boot, Spring IOC, Spring MVC, SQL

Java Full Stack Developer Siemens

Sep 2021 - Dec 2022
Chennai, India

Siemens Limited is a technology company focused on industry, infrastructure, digital transformation, transport as well as transmission and generation of electrical power. Developed responsive user interfaces using frameworks like Angular, React, or Vue.js. Used HTML5, CSS3, and JavaScript/TypeScript for creating dynamic web pages.

Key Responsibilities:

- Worked on Server-side **CSS** pre-processing platforms and UI kits, such as LESS/SCSS, **Node.js**, foundation and **Bootstrap**. Used SDK such as **Eclipse** IDE, Toad, and **SVN** etc. in this project.
- Written Test cases using **JUnit** to validate the application flows in different scenarios in the standalone application.
- Experienced in **React** and working with **React Flux** Architecture and experience in using **React** components, forms, events, keys, router, plus redux, Animations and flux concepts.
- Developed applications using **Java 8** new features like lambda expressions, Stream API, default, static methods.
- Extensively Used **Jenkins** as Continuous Integration tool to deploy **Spring Boot Microservices** to Pivotal Cloud Foundry (PCF) using build pack. Use **Log4j** or other logging frameworks for application logging and trouble shooting. Played key role as senior developer during development of next generation Microservices
- Developed automation of Validation service to provide the JASPER report based on bean validations, **Spring** validations on test cases. Responsible for creating efficient design and developing User Interaction screens using **HTML**, **CSS3**, **Bootstrap**, **JavaScript**, **Angular** 11/12 and Node JS.
- Build and maintain **SQL** scripts, indexes, and complex queries for data analysis and extraction. Building ETL tool for the migration of data & validating the test cases after the extraction, transformation & load of data.
- Used Amazon CloudWatch to monitor **AWS** services and Amazon CloudWatch logs to monitor application.
- Used **Angular** to connect the web application to back-end APIs, used **RESTful** methods to interact with several API's, and wrote custom directives for a responsive, CSS-animated user interface.

Environment: Angular, AWS, Bootstrap, CSS, CSS3, Eclipse, HTML, Java, Java 8, JavaScript, Jenkins, JUnit, Log4j, Microservices, Node.js, PCF, React, React Flux, RESTful, S3, Spring, Spring Boot, SQL, Stream API, SVN

Java Developer

Jul 2019 – Aug 2021

Medall Healthcare Pvt Ltd

Chennai, India

Medall Healthcare Pvt Ltd is one of the leading Hospital and Health Care Companies in India. Integrated the third-party services and APIs to enhance the capabilities of applications and ensure seamless data exchange. Created the responsive and intuitive web interfaces using HTML5, CSS3, JavaScript, and TypeScript.

Key Responsibilities:

- Experience in Object Relational Mapping frameworks such as **Hibernate**. Build **Microservices** for the delivery of software products across the enterprise. Modified existing Shell scripts in Unix to call daily sub routines.
- Created data model for structuring and storing the data efficiently and implemented partitioning and bucketing of tables in **Cassandra**. Strong experience on Devops essential tools like **Kubernetes**, **Git**, **Jenkins**, Ant, Maven and deployed/managed applications to managed cloud services in Pivotal Cloud Foundry.
- Design and implementation of web applications in **Java** and HTML5/JavaScript using **Eclipse**.
- Developed and maintained responsive web applications using **React.js**, delivering high-quality code that met project requirements and deadlines. Manage and fix bugs with **Jira** bug tracking application.
- Implemented Business components such as user authentication, entitlements using **Spring** beans.
- Developed Mockito and **JUnit** test cases to improve code coverage.
- Worked on a safe AGILE based methodology which brings new approaches and changes to the team every PI.
- Implemented asynchronous messaging services using **JMS**. Developed JASPER report to show the result after validations are performed on the test cases and maintaining several data accuracy.
- Used **jQuery**, **JavaScript**, **HTML5**, **CSS3**, **Bootstrap** and various **jQuery** plugins to improve UI experience and achieve cross-browser compatibility. Configured batch jobs for data transfer from **MySQL** Production, backups to Disk or NetBackup, and refreshing QA database with production data.
- Build **RESTful** API web services using Node JS and Express JS and used a full complement of Express, **Angular**, **Node.js**, and **MongoDB** to store and present assessments. Proficiency in writing JPA queries using JPQL (Java Persistence Query Language) and Criteria queries for database operations.

Environment: Angular, Bootstrap, Cassandra, CSS3, Eclipse, Git, Hibernate, HTML5, Java, JavaScript, Jenkins, Jira, JMS, jQuery, JUnit, Kubernetes, Microservices, MongoDB, MySQL, Node.js, React, RESTful, S3, Spring, SQL
