

Venkata Sai Nagalla

Java Developer

Email: sainagalla2022@gmail.com Mobile: +1 940 -395-7902 Place: United States

SUMMARY

Experienced Java Developer with 5 years of expertise in designing and developing scalable microservices and full stack applications. Led automation of cloud infrastructure using Terraform and Docker for seamless provisioning and deployment. Developed secure, high-performance APIs using Spring Boot, Kotlin, and OAuth 2.0 to support strong backend systems. Delivered end-to-end testing strategies with JUnit, Mockito, and Jasmine to ensure code reliability and maintainability. Optimized database interactions with SQL, PL/SQL, Hibernate, and MongoDB for efficient data handling. Managed DevOps pipeline enhancements integrating Jenkins and AWS for continuous delivery, reducing release cycles by 35%. Proficient in React.js, Node.js, and cloud platforms including AWS, GCP, and Azure. Monitored and troubleshooted applications using ELK Stack and Splunk to ensure system stability.

TECHNICAL SKILLS

- **Programming & Scripting Languages:** Java, Kotlin, JavaScript, TypeScript, Shell Scripting, Python
- **Java Frameworks & Libraries:** Spring Boot, Spring Core, Spring MVC, Spring AOP, Spring ORM, Spring JDBC, Spring Data JPA, Hibernate, JPA, Servlets, JSP, JSTL
- **Web Technologies:** HTML, CSS, Bootstrap, SASS, LESS, React.js, Angular, jQuery, AJAX, Node.js
- **Web Services & APIs:** RESTful Web Services, SOAP, JSON, XML, API Connect, Apigee (basic), IBM Integration Bus (IIB), IBM DataPower, IBM WebSphere MQ, Layer 7 API Gateway
- **Cloud Platforms:** AWS, Azure, GCP
- **Infrastructure as Code (IaC):** Terraform
- **Web/Application Servers:** Apache Web Server, WebLogic, JBoss
- **DevOps & CI/CD Tools:** Jenkins, Docker, Ansible, Git, GitHub, Bitbucket, SonarQube, JIRA, Confluence, Maven, Gradle, Postman, Swagger
- **Databases:** SQL, PL/SQL, Oracle, MySQL, MongoDB, SQL Server, PostgreSQL, TOAD
- **Testing & Quality:** JUnit, Mockito, Jasmine, Karma, Protractor, Unit Testing, Integration Testing, TDD
- **Messaging & Streaming:** Apache Kafka, JMS
- **Monitoring & Logging:** ELK Stack, Splunk, Nagios

PROFESSIONAL EXPERIENCE

LPL Financial

Java Developer

April 2025 – Present

Technologies: Java, Kotlin, Spring Boot, Spring Data JPA, RESTful APIs, Angular, React, HTML5, CSS3, JavaScript, Node.js, Docker, GCP, AWS, Terraform, Jenkins, JUnit, Mockito, Jasmine, Karma, Protractor, Oracle, PL/SQL, MongoDB, MySQL, IBM IIB, WebSphere MQ, API Connect, OAuth 2.0, Git, Bitbucket, Jira, Confluence, Nuance, Avaya, Elasticsearch, Kafka, Maven, SASS, Bootstrap

- Developed and maintained scalable microservices using Spring Boot and Spring Data JPA to support core financial workflows.
- Automated cloud infrastructure provisioning on GCP using Terraform and Docker Swarm, reducing deployment time by 40%.
- Executed comprehensive unit and integration testing on Spring Boot and Angular applications with JUnit, Mockito, Jasmine, and Karma, achieving 95% code coverage.
- Designed RESTful services with Oracle DB integration using Spring Data JPA and PL/SQL, enhancing data recovery efficiency by 20%.
- Collaborated in DevOps pipeline automation using Jenkins, Terraform, and AWS services, cutting release cycles and ensuring stable production deployments.
- Implemented secure OAuth 2.0 authentication and authorization flows across microservices, enhancing system compliance and data protection.
- Monitored application performance and resolved critical issues using Splunk and Elasticsearch, improving system uptime by 15%.

Conifer Health Solutions
Java Full Stack Developer

February 2024 – March 2025

Technologies: React.js, Redux, Node.js, Spring Data JPA, Hibernate, JWT, MongoDB, ElasticSearch, AWS (EC2, S3, VPC), Terraform, ELK Stack (Elasticsearch, Logstash, Kibana), CloudWatch, Nagios, Sass, RESTful APIs

- Established responsive front-end features using React.js and Redux with modular CSS and component-based architecture.
- Implemented RESTful APIs with Node.js and Spring Data JPA, integrating JWT for secure authentication and reducing security incidents by 25%.
- Engineered scalable backend data models using Hibernate and JPA ORM, optimizing database queries and reducing response time.
- Directed cloud migration initiatives leveraging AWS services (EC2, S3, VPC) and Terraform automation, decreasing deployment time by 40% and ensuring zero downtime.
- Constructed real-time analytics web service with Node.js and MongoDB, syncing data across ElasticSearch and many Mongo clusters to boost data accuracy.
- Monitored and troubleshoot application health using ELK stack, CloudWatch, and Nagios, reducing API downtime by 15% and improving incident resolution speed.

National Informatics Centre
Java Developer

June 2019 – November 2022

Technologies: Java, Spring Boot, RESTful APIs, Hibernate, JPA, SQL, PL/SQL, OAuth2, JWT, Jenkins, Maven, Linux

- Maintained scalable government web applications using Java, Spring Boot, and RESTful APIs, ensuring high performance and reliability to support critical public services.
- Implemented secure authentication and authorization mechanisms with OAuth2 and JWT, enhancing data protection across citizen portals.
- Automated data integration workflows using Hibernate and JPA, reducing manual processing time by 40% and increasing data accuracy.
- Cooperated with teams to migrate legacy systems to microservices architecture on Linux servers, improving deployment frequency by 25%.
- Enhanced SQL queries and PL/SQL stored procedures for large government databases, boosting data retrieval efficiency.
- Applied Jenkins and Maven for continuous integration and deployment, accelerating release cycles and reducing production errors by 20%.

EDUCATION

Masters in computer science
University of North Texas
January 2023 – December 2024
