

Venkat Bhargav Nemmadi

(940) 843-3479 | venkatbhargav.nemmadi@gmail.com | LinkedIn | Dallas, TX (Open to Relocation)

Professional Summary

Data Analyst with 5+ years of experience delivering analytics, business intelligence, and reporting solutions across Healthcare, Finance, and Product Analytics domains. Skilled in SQL, Python, Power BI, Tableau, Excel, Snowflake, and cloud data platforms with proven success analyzing complex datasets, automating reporting workflows, improving data quality, and delivering actionable business insights. Experienced in KPI reporting, dashboard development, statistical analysis, data visualization, A/B testing, and translating business requirements into data-driven solutions. Microsoft Certified Power BI Data Analyst (PL-300) with strong expertise in supporting operational decision-making through analytics and reporting.

Work Experience

Data Analyst

Jan 2024 – May 2026

VodoTech Solutions

Dallas, TX

Project: Financial Data Analytics Platform

- Analyzed enterprise datasets using SQL, Python, Snowflake, and Amazon Redshift to identify trends, improve reporting accuracy, and support data-driven business decisions across finance and operations teams.
- Developed interactive Power BI dashboards using DAX and Power Query to deliver real-time visibility into KPIs, operational metrics, financial performance, and business trends.
- Automated recurring reporting processes using Python, SQL, and Alteryx, reducing manual reporting effort by 120+ hours per quarter and improving reporting efficiency.
- Optimized SQL queries and data models in Snowflake and Redshift, improving dashboard performance and reducing data refresh latency by 30%.
- Performed data validation, reconciliation, and root cause analysis to identify data quality issues and improve reliability of analytical reporting.
- Created Tableau and Power BI reporting solutions to analyze revenue trends, operational performance, cost optimization opportunities, and business KPIs.
- Built automated data quality checks using SQL and Python to improve reporting accuracy and reduce downstream data discrepancies.
- Conducted exploratory data analysis, KPI trend analysis, and A/B testing to evaluate business performance and identify improvement opportunities.
- Collaborated with business stakeholders, analysts, and technical teams to gather requirements, define metrics, and deliver analytics solutions.
- Supported Agile analytics projects using Jira, Git, and cross-functional collaboration practices.

Data Analyst

Jan 2019 – Feb 2022

Resgenesis Technologies

Hyderabad, India

Project: Healthcare Claims Analytics

- Analyzed healthcare claims datasets including member eligibility, provider, payer, billing, policy, and ICD-10 diagnosis data to support healthcare analytics and operational decision-making.
- Developed SQL and Python analytical solutions to identify claims trends, payment discrepancies, reconciliation issues, and data quality improvements.
- Automated healthcare reporting workflows using SQL and Python, reducing report turnaround time by 40% and saving 400+ operational hours annually.
- Built Power BI and Tableau dashboards to monitor healthcare KPIs, claims performance, provider metrics, compliance measures, and operational trends.
- Performed statistical analysis, regression analysis, and trend analysis to identify healthcare performance improvement opportunities.

- Conducted data validation, source-to-target testing, and reconciliation activities to ensure accuracy and reliability of healthcare reporting.
- Optimized SQL queries and transformation logic to improve analytics performance and reporting efficiency.
- Created automated validation frameworks using SQL and Python to reduce manual reporting effort and improve data quality.
- Partnered with healthcare operations and business teams to translate analytical findings into actionable recommendations.
- Supported Agile delivery using Jira and Confluence for requirements tracking, documentation, and team collaboration.

Education

Master of Science in Information Systems and Technology	May,2024
<i>University of North Texas</i>	<i>Denton, TX</i>
Bachelor of Technology in Electronics and Communications Engineering	May,2019
<i>RGUKT</i>	<i>Hyderabad, India</i>

Technical Skills

Data Analytics & BI: Power BI, Tableau, Looker, Advanced Excel, Power Query, DAX, Dashboard Development, KPI Reporting

Programming & Databases: SQL, T-SQL, Python, PySpark, Pandas, DAX, R, Complex Joins, Window Functions, Query Optimization

Data Platforms: Snowflake, Amazon Redshift, Azure Databricks, Azure Data Factory, Azure Synapse Analytics, AWS S3

Analytics & Statistical Methods: Exploratory Data Analysis, Statistical Analysis, Regression Analysis, A/B Testing, Trend Analysis, Root Cause Analysis

Data Management & Quality: ETL, Data Modeling, Data Warehousing, Data Transformation, Data Validation, Source-to-Target Validation, Data Reconciliation

Data Quality & Testing: Data Validation, Source-to-Target Validation, UAT Testing, Regression Testing

Tools & Methodoloies: Jira, Git/GitHub, Alteryx, Confluence, Agile/Scrum

Industry Experience: Healthcare Analytics, Claims Analytics, Finance Analytics, Business Intelligence, Operational Analytics

Certifications

- [Microsoft Certified: Power BI Data Analyst Associate \(PL-300\)](#)
- [Databricks: Generative AI Fundamentals](#)
- [Oracle AI Foundations Associate](#)
