

VINAY REDDY

Full Stack Java Developer

MN, USA | +1 (612) 865-1339 | Email: vinay@careerattainment.com | [LinkedIn](#)

Professional Summary

Full Stack Java Developer with 4+ years of experience in designing, developing, and deploying enterprise-grade web applications using Java, Spring Boot, Angular/React, and RESTful APIs. Skilled in building scalable microservices architectures, optimizing database performance, implementing CI/CD pipelines, and integrating cloud solutions (AWS, Azure). Adept at collaborating with cross-functional teams in Agile environments to deliver secure, high-performance, and user-centric software solutions. Strong expertise in backend development, frontend frameworks, and DevOps practices, ensuring faster time-to-market and improved system reliability.

Professional Experience

Full Stack Java Developer, HCL Tech, USA

Jan 2025 – Present

- Designed, developed, and deployed scalable microservices using Java 11, Spring Boot, Hibernate, and JPA, ensuring modular architecture and reducing deployment time by 35% through containerized builds with Docker and Kubernetes.
- Built and optimized RESTful APIs with Swagger documentation, integrating JSON/XML payload processing for seamless third-party communication and reducing API response time by 40%.
- Created responsive, cross-platform Angular 12 front-end components using TypeScript, RxJS, and Bootstrap, increasing user engagement scores by 25% and improving mobile responsiveness.
- Integrated with AWS services (S3, RDS, Lambda, CloudWatch) to enable secure file storage, automated backups, and real-time monitoring, reducing operational costs by 20%.
- Developed asynchronous event-driven systems using Apache Kafka for real-time data streaming, reducing latency for high-volume transactions by 35%.
- Conducted advanced SQL query optimization in MySQL and PostgreSQL, leveraging indexing, partitioning, and stored procedures to improve query execution by 45% and reduce database load.
- Implemented JWT & OAuth2.0-based authentication with role-based access control, achieving 100% compliance with company and industry security standards (HIPAA/GDPR).
- Automated CI/CD pipelines with Jenkins, Maven, and GitHub Actions, enabling multiple daily deployments with zero downtime and reducing release cycle time from 4 hours to 90 minutes.
- Wrote JUnit and Mockito unit/integration tests with over 95% code coverage, reducing post-release bugs by 15% and ensuring production stability.
- Participated in Agile ceremonies, including sprint planning, backlog grooming, and retrospectives, collaborating with cross-functional teams to achieve 100% sprint goal completion rate.
- Mentored junior developers on Java design patterns, API development, and cloud deployments, improving team coding efficiency by 15%.

Full Stack Java Developer, TCS, India

Oct 2019 – Aug 2023

- Designed and implemented enterprise-grade web applications using Java 8, Spring MVC, Hibernate, JSP, and Servlets, improving transaction processing efficiency by 40% for a Fortune 500 client.
- Developed React.js components with Redux state management for a modular, reusable UI, improving page load speeds by 25% and enhancing maintainability.
- Integrated RESTful and SOAP web services for third-party application communication, reducing manual operations by 60% and ensuring seamless cross-system data flow.
- Migrated a monolithic legacy application to a microservices-based architecture with Spring Boot and Docker, enabling independent service scaling and reducing release rollback issues.
- Configured and deployed applications on AWS EC2 instances using Docker containers and Nginx reverse proxy, ensuring 99.9% application uptime during peak load.
- Optimized database and implemented PL/SQL stored procedures in Oracle DB, improving batch job execution time by 30%.
- Established CI/CD pipelines in Jenkins integrated with Git and Maven, automating builds, deployments, and regression testing, cutting deployment cycles by 50%.
- Implemented Selenium WebDriver and Postman test automation for functional, API, and regression testing, reducing manual testing efforts by 60%.
- Enhanced application security by implementing role-based access control (RBAC), encrypting sensitive data, and integrating SSO authentication using SAML/OAuth2 protocols.
- Collaborated with UI/UX teams to develop responsive interfaces, improving mobile user satisfaction scores by 22%.
- Conducted code reviews, enforced coding standards, and provided peer mentoring on Java best practices, Git workflows, and design patterns, reducing defect density by 18%.

Technical Skills

- Programming & Framework:** Java 8/11/17, Spring Boot, Spring MVC, Hibernate, JPA, Microservices, JSP, Servlets, Node.js
- Frontend:** HTML5, CSS3, JavaScript (ES6+), TypeScript, Angular, React, Bootstrap, jQuery
- Backend:** Java, Spring Boot, Spring MVC, REST APIs, Microservices, Hibernate
- Database:** PostgreSQL, MySQL, MongoDB, Oracle, SQL Server, Cassandra
- APIs & Integrations:** RESTful APIs, SOAP Web Services, Swagger/OpenAPI, JSON, XML
- Cloud & DevOps:** AWS (EC2, S3, Lambda, RDS), Azure, Docker, Kubernetes, Jenkins, Git, Maven, Gradle
- Testing:** JUnit, Mockito, Selenium, Postman, Newman, TestNG
- Tools:** GitHub, Bitbucket, Jira, Confluence, Eclipse, IntelliJ IDEA, VS Code
- Methodologies:** Agile (Scrum, Kanban), Waterfall, CI/CD, TDD, BDD
- CI/CD:** Docker, Kubernetes, Jenkins, Shell Scripting
- Project Management:** Jira, Trello, Service First, ServiceNow, Agile (Scrum & Kanban), Waterfall, JIRA, Confluence
- Healthcare Standards:** HIPAA, FHIR, HL7
- Others:** Apache Kafka, RabbitMQ, Redis, ELK Stack, OAuth2, JWT, Kubernetes ConfigMaps & Secrets

Education

Masters in Information Technology Management Concordia University, USA	Sept 2023 – Dec 2024
Bachelor in Information Technology Jawaharlal Nehru Technological University, India	July 2017 – Sept 2021
