

Vrushali Shrikant Kulkarni

Junior Software Developer

Detail-oriented and motivated Junior Software Developer with 1 Year of experience in Agile product teams, combining hands-on software development and QA automation expertise. Proficient in both front-end and back-end development using JavaScript, React, Node.js, and MySQL, along with a solid foundation in testing processes, including manual, automation, and API testing. Skilled in building efficient automation frameworks using Selenium and BDD tools. Demonstrated ability to deliver end-to-end solutions from coding to validation, with a strong emphasis on quality assurance, defect prevention, and user-centric delivery. Committed to continuous improvement, team collaboration, and creating scalable, reliable digital products.

WORK EXPERIENCE

Junior Software Developer Dataseers

08/2024 - Present

Navi Mumbai

Achievements/Tasks

- Contributed to the development and maintenance of web-based applications using technologies such as JavaScript, React, HTML, CSS, MySQL and Node.js.
- Developed automation scripts using Selenium and Rest Assured for UI and API validation.
- Performed unit testing and ensured code quality through debugging, refactoring, and adherence to coding standards.
- Assisted in writing and executing database migrations to support new features and optimize data structures.
- Participated in daily stand-ups, sprint planning, and product discussions, gaining exposure to full software development lifecycle.
- Supported the QA team by reproducing bugs, writing test cases, and verifying fixes across multiple environments.
- Automated repetitive test tasks using custom scripts and scheduling tools.
- Assisted in UAT preparation, tracking results, and maintaining test evidence.
- Explored performance logs and contributed to creating a basic internal metrics dashboard.
- Maintained accurate test effort logs in tools like eCube and test management systems.

PROJECT

Product Recommendation Based on Real-Time Age and Gender Detection (08/2023 - 05/2024)

- Developed and integrated the real-time video capture and face detection module using OpenCV, enabling live feed analysis.
- Implemented age and gender prediction models using pre-trained CNN architectures in TensorFlow, and handled preprocessing of input images.
- Optimized model performance by applying image normalization, resizing, and efficient inference techniques to ensure real-time predictions.
- Collaborated with teammates to interface the prediction output with a basic recommendation logic for demo purposes.
- Handled testing, debugging, and performance evaluation of the detection module across different environments.
- Maintained code quality, version control, and documentation for the modules I developed using Git.
- Technologies Used:** Python, OpenCV, TensorFlow, NumPy, Git

SKILLS

React

JavaScript

HTML & CSS

MySQL

Node.js

Git-Hub

python

Git

.NET

C++

Selenium - java

Postman

eCube

BDD Framework

Jenkins

JSON

Cucumber

Manual Testing

Java

TestNG

Jira

Agile

ACHIEVEMENTS & CERTIFICATIONS

A beginners' guide to MySQL queries, database design, transactions and stored procedures.

React - The Complete Guide 2025

JavaScript - The Complete Guide 2025 (Beginner + Advanced)

Git & GitHub Crash Course: Create a Repository From Scratch!

Automation Testing with Selenium & Rest Assured – Udemy

Agile Fundamental

Selenium and Java

EDUCATION

B.E. in Computer Science (06/2020 - 06/2024)

Gokhale Education Society's R. H. Sapat College of Engineering, Management Studies and Research

LANGUAGES

English

Full Professional Proficiency

Marathi

Native or Bilingual Proficiency
