PROFESSIONAL SUMMARY

ServiceNow Developer with 4+ years of experience designing, implementing, and optimizing ServiceNow solutions. Expert in ServiceNow Application Development, ITSM modules (Incident, Problem, Change, Request, Knowledge), and platform customization. ServiceNow Certified System Administrator and Application Developer with proven track record creating custom applications, business rules, UI policies, client scripts, and integrations. Skilled in JavaScript, HTML/CSS, AngularJS, jQuery, and ServiceNow scripting with experience in ServiceNow San Diego, Rome, Quebec, and Paris releases. Additional expertise in Python, data analysis, machine learning and AI projects. Currently pursuing a Master's degree in Computer and Information Sciences with strong technical foundation and commitment to delivering scalable enterprise solutions.

EDUCATION

Florida International University

Miami, FL, USA

Master of Computer and Information Sciences, GPA: 3.85/4.0

Aug. 2023 – May 2025

- Coursework: Advanced Database Systems, Machine Learning, Artificial Intelligence, Database Management Systems, Algorithms, Advanced Software Engineering

CERTIFICATIONS

- ServiceNow Certified System Administrator
- ServiceNow Certified Application Developer
- Certified Implementation Specialist (ITSM)
- AWS Certified Solutions Architect – Professional

TECHNICAL SKILLS

ServiceNow Platform: ServiceNow Administration, ServiceNow Application Development, ServiceNow Studio, App Engine Studio, Flow Designer, ServiceNow Scripting, Business Rules, UI Policies, UI Actions, Client Scripts, Script Includes, ACLs, Dictionary Entries, Transform Maps, Workflow Editor, Service Portal, Agent Workspace, Virtual Agent

ServiceNow Modules: ITSM (Incident, Problem, Change, Request, SLA), CSM, ITBM (PPM, APM), ITOM (Discovery, Service Mapping), GRC, HR Service Delivery, IntegrationHub, ATF, SecOps, CMDB/CI Management

ITSM Processes: Incident Management, Problem Management, Change Management, Release Management, Configuration Management, Service Request Management, Knowledge Management, Service Catalog, Service Level Management, Service Asset & CMDB

Programming Languages: JavaScript, HTML5, CSS3, XML, AngularJS, jQuery, Bootstrap, REST/SOAP APIs, JSON, AJAX, Jelly Scripts, Python, SQL

Data & AI Technologies: Python, Pandas, NumPy, Scikit-learn, TensorFlow, Streamlit, Plotly, Computer Vision, Natural Language Processing, Machine Learning, OpenCV, ARIMA

Integration: REST/SOAP Web Services, MID Server, IntegrationHub, ETL Tools, SSO/LDAP, Active Directory, Webhooks, Email Integration

Development Tools: ServiceNow Studio, App Engine Studio, Flow Designer, IntegrationHub, ATF, ServiceNow CLI, Source Control, Git/GitHub, VS Code, JIRA

Methodologies: Agile, Scrum, DevOps, ITIL v4, Change Management, CI/CD, Software Development Life Cycle (SDLC)

PROFESSIONAL EXPERIENCE

ServiceNow Developer / ITSM Specialist

Feb 2022 – Aug 2023

DXC Technology

Bangalore, India

- Designed and developed custom ServiceNow applications, modules, and workflows using ServiceNow Studio and App Engine Studio to meet enterprise client requirements, resulting in 35% improvement in IT service delivery and 40% reduction in resolution times.
- Implemented complex business rules, UI policies, client scripts, UI actions, and script includes using JavaScript to automate workflows and streamline ITSM processes across multiple ServiceNow instances (San Diego, Rome, Quebec).
- Configured and customized ServiceNow ITSM modules including Incident Management, Problem Management, Change Management, Request Management, and Knowledge Management, aligned with ITIL v4 best practices to support enterprise-scale operations.
- Created and maintained secure REST/SOAP integrations between ServiceNow and third-party systems (JIRA, SAP, Salesforce) using IntegrationHub, REST/SOAP messages, and MID servers, enabling seamless data flow across platforms and improving cross-departmental collaboration.
- Led ServiceNow platform upgrades, migrations, and performance optimization efforts, ensuring 99.9% platform availability and reducing page load times by 25% through script optimization and database tuning.

- Developed and customized ServiceNow Service Portal using AngularJS, Bootstrap, CSS, and Service Portal widgets to create intuitive self-service experiences, reducing phone calls to service desk by 50%.
- Designed and implemented automated testing frameworks using Automated Test Framework (ATF) for ServiceNow implementations, reducing regression testing time by 70% and improving code quality through continuous integration.
- Participated in Agile development sprints for ServiceNow implementation projects, collaborating closely with business analysts, QA testers, and stakeholders to deliver high-quality solutions that exceeded client expectations.
- Mentored junior developers on ServiceNow best practices, conducted knowledge transfer sessions, and created comprehensive documentation to facilitate team collaboration and knowledge sharing.

ServiceNow Administrator

Jul 2021 – Feb 2022

Capgemini

Bengaluru, India

- Administered ServiceNow instances for enterprise clients, including user management, role configuration, access control, and security implementation, ensuring platform security and compliance with organizational policies.
- Developed and maintained Service Catalog items, Record Producers, Variable Sets, and Workflows to automate service request fulfillment processes, reducing manual effort by 40%.
- Created custom reports and dashboards using Performance Analytics and ServiceNow reporting tools to provide actionable insights to management, enabling data-driven decision making.
- Implemented and maintained CMDB including CI relationships, identification and reconciliation rules, and data imports using Transform Maps for accurate asset tracking.
- Collaborated with cross-functional teams to understand business requirements and implement ServiceNow solutions to address operational challenges and enhance service delivery.

Junior ServiceNow Developer

Apr 2020 – Jul 2021

DeMeNew Tech Pvt. Ltd.

Hyderabad, India

- Configured and customized Service Portal widgets and pages using AngularJS, HTML5, CSS3, and JavaScript to enhance user experience and provide intuitive self-service options, resulting in a 45% reduction in ticket volume.
- Developed custom UI policies, client scripts, and business rules to improve form functionality and automate workflows in ServiceNow ITSM modules.
- Created and maintained knowledge base articles and knowledge management processes to support self-service initiatives and improve knowledge sharing.
- Assisted with ServiceNow upgrades, testing, and troubleshooting to ensure seamless platform operation and minimal disruption to business processes.

Graduate Assistant – Logics for Computer Science

May 2024 – Present

Florida International University

Miami, FL

- Support the professor by creating assignments, leading classes, and providing academic assistance to enhance students' understanding of logical reasoning and problem-solving.
- Develop instructional materials and resources to facilitate classroom learning and improve student engagement.
- Conduct office hours to provide additional support and clarification on complex logical concepts and course materials.

PROJECTS

ServiceNow CMDB Health Dashboard | *ServiceNow, Performance Analytics, JavaScript* Aug 2022 – Dec 2022

- Designed and implemented a comprehensive CMDB health monitoring dashboard using Performance Analytics, Dashboards, and custom scripting for enterprise-level visibility.
- Developed automated CMDB data quality checks, health audit rules, and remediation workflows that increased CMDB accuracy from 65% to 92% and maintained data integrity.
- Created custom indicators and KPIs to track CMDB completeness, compliance, relationship accuracy, and staleness with real-time visualization.
- Implemented scheduled reports and notifications to alert stakeholders of critical CMDB issues requiring attention, reducing mean time to resolution by 60%.

CSV AI Analytics | *Python, Streamlit, Plotly, Pandas, NumPy, Claude API* Jan 2025 – Mar 2025

- Created a data analysis platform combining AI-powered insights with interactive visualizations, featuring dual AI assistants, 25+ chart types, and optimizations for large datasets.

Demand Forecasting Project | *Python, Pandas, Scikit-learn* Aug 2023 – Dec 2023

- Implemented demand forecasting using historical Adidas data and time series algorithms (SARIMA, Prophet, ARIMA), improving inventory planning by 22% through comprehensive data preprocessing and model optimization.

Pothole Detection System | *Python, OpenCV, Tkinter* Aug 2023 – Dec 2023

- Developed a robust pothole detection system with 85% accuracy using computer vision algorithms, with secure data gathering and a user-friendly Tkinter interface.

Emotion Recognition using Speech Processing | *Python, TensorFlow* Jan 2021 – Apr 2021

- Designed a speech emotion recognition model achieving 80% classification accuracy by integrating the RAVDESS dataset with optimized audio preprocessing and machine learning algorithms.
