ZACHARY GAY

Data Engineer

EDUCATION

**UNIVERSITY OF SOUTH
FLORIDA**
Tampa, FL
Bachelor of Science
Computer Science
(2016 - 2020)

Relevant Coursework

Data Structures
Analysis of Algorithms
Software Testing
Object Oriented Design
Secure Coding
Introduction to AI
Computational Geometry

ADDITIONAL SKILLS

Python
AWS (Lambda/S3/DMS)
SQL
DBT
Snowflake
Azure/Rally/Jira
GitHub/Bitbucket

CERTIFICATIONS

Scaled Agile SAFe 5 Practitioner

KEY PROJECTS

Java File Search Engine
Project
Java Langton's Ant
Automata
C++ N-Queens -
Backtracking & MCH

CAREER OBJECTIVE

Dynamic Data Engineer with a proven track record of leveraging AWS Services (Lambda, S3, DMS, Sagemaker), DBT, and Snowflake to architect and implement robust data pipelines. Proficient in data migration, cleansing, and transformation, adept at optimizing data quality for advanced analytics and reporting. Skilled in developing innovative solutions such as dynamic DBT macros and Denodo views to enhance efficiency and accessibility for BI teams.

EXPERIENCE

DATA ENGINEER

Republic Services, Phoenix, AZ / November 2023 - Current

- Lead the development of new data pipelines leveraging AWS Services, DBT, and Snowflake, facilitating the seamless migration of data from on-premise relational databases to cloud data warehouses.
- Successfully orchestrated the replication of over 1+ billion rows of data to S3 and subsequently into Snowflake using AWS Database Migration Service, ensuring data integrity and reliability throughout the process.
- Employed DBT and SQL to execute comprehensive data cleansing and transformations within Snowflake, optimizing data quality for enhanced analytics and reporting capabilities.
- Implemented Denodo views and associations in alignment with established standards and guidelines, enhancing data accessibility and usability for the BI Team's analytical initiatives.

SOFTWARE ENGINEER

General Motors, Phoenix, AZ / April 2021 - October 2023

- Collaborated on critical insourcing initiatives, saving the company over \$15M annually in third-party contracts.
- Implemented the end-to-end lifecycle of ETL processes, employing IBM DataStage, from design and development to successful implementation and ongoing support. This included the optimization of SQL queries for enhanced efficiency.
- Evolved numerous mission-critical data pipelines, migrating them from SAS to Python/Spark. Leveraged S3 Data Lakes for robust data storage and orchestrated workflows using Airflow. Consistently met milestones within tightly managed timelines.
- Engaged in SAFe Agile practices and actively contributed to all ART Events, ensuring the precise identification of project estimates and dependencies.
