WORK EXPERIENCE

DATA ANALYST @Wellmade Industries | *Cartersville, GA*

July 2024- Present

- Drove a 15% improvement in operational efficiency, contributing to the company's \$25 million annual revenue by analyzing production data to optimize resource allocation and reduce downtime.
- Leveraged **Python** to develop automated reporting solutions, reducing manual effort by 40% and improving data accuracy, enabling faster and more reliable insights for production tracking.
- Spearheaded **data collection, cleansing, and analysis** using **SQL** queries in **Microsoft Access** to extract data from SharePoint, and advanced **Excel** formulas & PivotTable, improving the accuracy of customer order tracking and supporting data-informed decision-making for management.
- Ensured adequate inventory levels to meet shipping requirements and provided daily reports for production output and unfinished goods to the supply chain analyst from customers.
- Developed and managed work orders and assemblies within the **Oracle NetSuite ERP** system, optimizing production workflows through effective data integration across departments.

SOFTWARE ENGINEER @BeaconFire Inc | *East Windsor, NJ*

Dec 2023 - June 2024

- Developed a secure and scalable full-stack e-commerce platform using the MERN stack (**MongoDB, Express.js, React.js, Node.js**), delivering seamless functionality for users and admin.
- Developed mobile applications using **Java, Kotlin**, and **Android SDK**, optimizing **API** performance to reduce latency by 30%, and increasing user engagement by 15%, leveraged **Firebase** to enable secure user authentication and real-time update real-time updates, boosting app interactivity.
- Designed intuitive user and admin panels with **JavaScript, React** and **Tailwind CSS**, offering responsive product browsing, detailed views, cart management, order history, and streamlined admin operations.
- Implemented secure backend solutions with **Node.js, Express.js** and **JWT**-based authentication, integrating **Stripe** API for payment handling and leveraging **Axios** for efficient **RESTful API** communication.
- Optimized data and media management using **MongoDB Atlas** for cloud-based storage and **Cloudinary** for efficient media handling, deploying the platform on **AWS EC2 Linux** instance with **Nginx**, leveraging **SSL/TLS** encryption, reverse proxy, and domain routing for enhanced security and scalability.

SOFTWARE DEVELOPER INTERN @EpiBuild | *Scottsdale, AZ*

Sep 2022 - March 2023

- Developed a Slack-integrated staff management system using **Spring Boot, JPA, and Hibernate**, featuring real-time progress tracking on projects and custom Slack commands for employee time management.
- Designed and implemented a **MySQL** database and incorporated **JPA** repositories and **Hibernate ORM** for efficient data access patterns, integrating **Google Sheets API** to sync staff activity data in real-time, enabling automated data logging and reporting to streamline staff management processes and improving operational efficiency by 30%.
- Built a robust authentication system using Slack's **OAuth 2.0** and Bot tokens, configuring role-based access control for admin functionalities, and implementing responsive modal interfaces using Slack's Block Kit UI framework to create interactive views for time tracking and data management.
- Created **RESTful** endpoints using **Spring MVC** for handling Slack events and interactive messages, ensuring real-time synchronization between Slack and database, and implemented comprehensive logging using **Logback** with custom appenders for debugging and monitoring system performance.

EDUCATION & AWARD

Master's degree in Computer Science | Pace University – *New York, NY*

Sep 2022 - Dec 2023

Bachelor's degree in Computer Science | Pace University – *New York, NY*

Sep 2019- Aug 2022

Computer Science Departmental Award - Seidenberg Class of 2024 Student Awards

July 2024

TECHNICAL SKILLS

- **Languages:** JavaScript, Python, Java, HTML, Tailwind CSS, SQL, Kotlin, XML
- **Client-side Technologies:** React.js, Android SDK, Gradle, React Native, Retrofit, Axios
- **Server-side Technologies:** Node.js, Express.js, Spring Boot, Maven, RESTful API, FastAPI, Nginx, PM2
- **Database:** MongoDB, MySQL, SQLite(Room)
- **Tools:** Microsoft Access, Visual Studio Code, Android Studio, IntelliJ, Git, Oracle NetSuite
- **Data Analytics:** Excel, Pandas, NumPy, Matplotlib, Seaborn
- **Operating System:** Windows, Linux, Android, iOS
- **Cloud Computing:** AWS EC2, Firebase, DigitalOcean

PROJECTS

EtherealBuy | www.etherealbuy.com

Jan 2025

- Secure and scalable full-stack e-commerce platform using the MERN stack, AWS, and Stripe API, featuring intuitive user and admin panels for seamless product browsing, cart management, and order history.
- Optimized data management with MongoDB Atlas and Cloudinary, deployed on AWS EC2 with Nginx for enhanced security and scalability, and integrated payment handling via Stripe API.

Technologies: JavaScript, React.js, Node.js, Express.js, MongoDB, AWS EC2, Tailwind CSS, Stripe, Cloudinary, Nginx, SSL, Linux, Axios, SSH, SSL/TLS

StressOut | [Project Demo](#)

Dec 2023

- Developed an iOS app using React Native and JavaScript for depression detection through facial recognition, integrating a custom machine-learning model via FastAPI.
- Trained a convolutional neural network (CNN) using Python and TensorFlow, achieving 97% training accuracy and 93.52% validation accuracy, while leveraging an Nvidia GPU for model acceleration and following Agile methodology for SDLC.

Technologies: Javascript, React Native, FastAPI, Python (TensorFlow), Pandas, NumPy, Matplotlib, Seaborn

EpiBuildStaff

March 2023

- Developed a Slack-integrated staff management system using Spring Boot, JPA, Hibernate, and MySQL, enabling real-time project progress tracking and employee time management with custom Slack commands, improving operational efficiency by 30%.
- Implemented secure authentication via Slack's OAuth 2.0, created RESTful endpoints for Slack event handling, and integrated Google Sheets API for automated data logging, while utilizing Slack's Block Kit UI framework for interactive views and enhancing system performance with Logback logging.

Technologies: Spring Boot, Spring MVC, Java, JPA, Hibernate, SQL, Logback, RESTful API, DigitalOcean, Ngrok
