

AKANKSHA KOSANA

Data Analyst

akankshakosana7@gmail.com

Mobile: 804-592-0512

PROFESSIONAL SUMMARY

- Accomplished Data Analyst with over 6 years of experience in SQL development, business analytics, and data engineering.
- Strong expertise in SQL (T-SQL, PL/SQL) for querying, data extraction, and optimization across enterprise systems.
- Skilled in Python programming with Pandas, NumPy, and Matplotlib for data wrangling, statistical analysis, and visualization.
- Advanced Excel user with expertise in pivot tables, Power Query, complex formulas, and VBA automation.
- Proficient in building interactive dashboards using Tableau and Power BI to present KPIs and trends for decision-making.
- Hands-on experience with ETL tools (SSIS, Informatica, AWS Glue) for data integration and transformation.
- Adept at data cleaning, preprocessing, and validation ensuring high-quality, accurate datasets.
- Strong knowledge of statistical techniques including regression, forecasting, clustering, and hypothesis testing.
- Experienced in designing data pipelines on cloud platforms such as AWS (S3, Redshift, Lambda) and Azure (Synapse, Data Factory).
- Expertise in report automation using Python and SQL, reducing manual reporting by 40%+.
- Proven ability to work with cross-functional teams to define requirements and deliver data-driven solutions.
- Skilled in trend analysis, root cause analysis, and business performance monitoring.
- Adept at transforming raw data into business insights to support strategic planning and operational improvements.
- Experience in data governance, metadata management, and compliance frameworks.
- Knowledge of big data tools such as Spark, Hadoop, and Hive for large-scale processing.
- Strong background in database performance tuning, indexing, and partitioning for query optimization.
- Passionate about teaching, mentoring, and knowledge sharing, with experience as a Teaching Assistant in Python and SQL.
- Recognized for building forecasting models to predict sales, operations, and workforce needs.
- Ability to simplify complex data findings into clear presentations for non-technical stakeholders.
- Known for problem-solving, attention to detail, and driving automation to improve business efficiency.

TECHNICAL SKILLS

- Programming & Databases: SQL (T-SQL, PL/SQL), Python (Pandas, NumPy, Matplotlib), Excel (Pivot Tables, Power Query, Macros), SSIS, SSRS
- Visualization: Tableau, Power BI, Excel Dashboards
- ETL & Data Engineering: Data wrangling, cleansing, pipeline automation (SQL, Python, SSIS, AWS Glue)
- Cloud Platforms: AWS (S3, Redshift, Lambda), Azure (Synapse, Data Factory)
- Analytics: Forecasting, trend analysis, root-cause analysis, regression modeling
- Other Tools: Jupyter, Git, Agile/Scrum

PROFESSIONAL EXPERIENCE

Data Analyst
Motorola Solutions
Richmond, VA

05/2023 – Present

- Collected, cleaned, and transformed large datasets using Python (Pandas, NumPy) and SQL.
- Designed KPI-driven dashboards in Tableau and Power BI for sales, operations, and customer analytics.
- Automated reporting workflows in SQL and Python, saving 15+ hours per week.
- Conducted data validation and reconciliation across multiple systems to ensure accuracy.
- Applied statistical analysis to identify patterns and anomalies for business operations.
- Optimized SQL queries and indexing, reducing report run times by 30%.
- Integrated external APIs and AWS S3 data sources for unified reporting.
- Partnered with cross-functional teams to define KPIs, metrics, and reporting standards.
- Developed ad-hoc reports in Excel for senior leadership decision-making.
- Built forecasting models to predict sales trends and resource needs.

Data Analyst Teaching Assistant
Virginia Commonwealth University
Richmond, VA

08/2023 – 05/2024

- Assisted students with Python, SQL, and Excel in real-world data analysis projects.
- Designed and evaluated data-driven assignments using datasets from finance, healthcare, and retail.
- Taught Python libraries (Pandas, NumPy, Matplotlib) for data manipulation and visualization.
- Mentored students on best practices in query writing, debugging, and analytics workflows.
- Conducted workshops on data cleaning, ETL concepts, and exploratory data analysis.
- Supported students in building Power BI dashboards for capstone projects.
- Introduced version control (Git) for collaborative coding.
- Applied statistical concepts to help students design predictive models.
- Acted as a bridge between students and faculty to improve technical learning outcomes.
- Enhanced data literacy by simplifying technical concepts into business language.

Data Analyst
Accenture Solutions Pvt Ltd
Bangalore, India

09/2020 – 07/2022

- Built ETL pipelines in SSIS and Python to consolidate data from multiple ERP systems.
- Developed business dashboards in Power BI and Tableau for HR, finance, and operations.
- Automated repetitive Excel reports using VBA and Python, reducing manual work by 40%.
- Conducted root cause analysis on data quality issues and implemented validation scripts.
- Designed star-schema models to support reporting and analytics.
- Partnered with stakeholders to gather business requirements and translate them into SQL solutions.
- Performed forecasting using regression models to support workforce planning.
- Migrated reports from Excel/Access to Power BI for better scalability.
- Ensured data governance and compliance across all reporting layers.
- Delivered ad-hoc reporting solutions for leadership teams under tight deadlines.

Data Analyst
Accenture Solutions Pvt Ltd
Bangalore, India

06/2019 – 08/2020

- Wrote and optimized T-SQL queries, stored procedures, and functions for enterprise databases.
- Built and maintained SSRS dashboards and reports for business operations.
- Designed SQL queries for ETL workflows, improving performance by 25%.
- Conducted large-scale data extraction, cleansing, and transformations for analytics.
- Created indexing and partitioning strategies to enhance query performance.
- Automated daily and weekly reports with SQL Server Agent.
- Collaborated with BI teams to design reports in Power BI and Tableau.
- Performed financial and operational trend analysis using SQL and Excel.
- Implemented automated monitoring scripts for database performance checks.
- Supported Agile sprints with enhancements and bug fixes for business-critical systems.

EDUCATION:

Master of Science (MS), Computer Science | Virginia Commonwealth University – Richmond, VA | 05/2024

Bachelor of Technology (B.Tech), Electronics and Communication Engineering | Koneru Lakshmaiah University – AP, India | 05/2020

CERTIFICATIONS:

- Google Data Analytics Professional Certificate
- Google Advanced Data Analytics Professional Certificate
- AWS Data Engineering Foundations
- Business Intelligence (BI) Analyst
- Business Analysis (ECBA, CCBA, CBAP)
- UiPath RPA Developer Advanced (C#)
- AD Fusion 360 – ALM
