To whom it may concern:

I was delighted to hear that you had an opening with your company. With strong background in health sciences, coupled with my passion for ensuring public health and safety, I am confident in my ability to make a significant contribution to your team.

During my academic journey, I have developed a strong foundation in key areas of public health, including epidemiology, biostatistics, health policy, and community health. My coursework and research projects have equipped me with practical skills in data analysis, program evaluation, and policy development, which I believe are essential for addressing complex public health challenges.

Throughout my career, I have gained invaluable experience in compliance, regulatory requirements, conducting audits, and risk assessment. My attention to detail, analytical skills, and ability to collaborate effectively with multidisciplinary teams and stakeholders have consistently enabled me to tackle complex challenges and deliver results. In addition to my technical skills, I bring a strong commitment to integrity, professionalism, and continuous learning. I am adaptable, resourceful, and thrive in fast-paced environments where priorities may shift rapidly.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experiences align with the needs of your company. Please find my resume attached for your review.

EDUCATION

Master of Public Health

Chamberlain University (Fall 2021)

Bachelor of Science in Health Science

Marygrove College (Spring 2017)

TRAINING

OSHA 30-Hour General Industry Safety and Health Training

U.S. Department of Labor (2025)

HIPAA Compliance Training

San Diego State University (2025)

Good Clinical Practice (GCP) Training Program

National Institute on Drug Abuse Clinical Trials Network (2025)

ORAQ Regulatory Affairs Training Program

Duke University School of Medicine (2024)

PROFESSIONAL EXPERIENCE

Compliance Education Specialist, *Stericycle (Present)*

- Conducted onsite evaluations and compliance assessments to identify regulatory gaps, quality risks, and process improvement opportunities.
- Delivered training programs on HIPAA, HITECH, Sunshine Act, OSHA, Hazard Communication, and Bloodborne Pathogens.
- Ensured compliance with HIPAA Privacy and Security Rules by developing and delivering staff education, monitoring adherence, and supporting corrective actions.
- Interpreted regulatory requirements and translated them into practical, operational guidance for clinical and administrative teams.
- Assisted organizations with audit readiness through documentation reviews, training verification, and remediation planning.
- Maintained current regulatory knowledge through continuous review of federal guidance and industry updates.
- Partnered with compliance and quality teams to ensure HIPAA privacy education supported CMS audit readiness and ongoing regulatory compliance.

Key Achievements:

- Delivered compliance training to hundreds of healthcare staff on HIPAA, HITECH, Sunshine Act, OSHA, and HazCom requirements, improving workforce regulatory awareness.

586-765-9214
AlexusBlackshear32@gmail.com

- Identified high-risk compliance gaps during HIPAA and OSHA evaluations, enabling clients to implement corrective actions before regulatory inspections.

QA Compliance Auditor, *Kelly Government Solutions (8/2022- 2025)*

- Working for the Center for Disease Control and Prevention to regulate the importation of infectious biological materials that could cause disease in humans to prevent their introduction and spread into the U.S.
- Conduct inspections and audits within academia, clinical research organizations (CROs), pharmaceutical companies, and biotechnology firms to ensure compliance with local, national, CDC, FDA, GLP, and GCP regulations.
- Conduct monitoring in accordance with protocols, including examination of facilities, analysis of entity SOPs, and interview entity personnel.
- Apply knowledge of Import Permit Regulations (42 CFR 71.54); 7CFR Part 331, 9 CFR Part 121, & 42 CFR Part 73; Biosafety in Microbiological and Biomedical Laboratories (BMBL); principles of biosafety; and operation of containment laboratories.
- Conduct data analysis of inspection findings, non-conformance reports, and corrective actions to identify trends and improve compliance practices.
- Develop and maintain data management systems for tracking audit outcomes, compliance metrics, and regulatory updates.

Key Achievements:

- Reduced audit findings by 30% through targeted risk assessments and corrective action plans.
- Developed a comprehensive compliance dashboard to monitor real-time audit results and improve decision-making.

Senior Toxicology Technologist, *Consolidated Laboratory Management Systems (3/2017- 8/2022)*

- Appointed to oversee compliance activities in the lab, including internal and external audits, staff training, and maintenance of regulatory documentation to ensure adherence to quality and safety standards.
- Conducted HPLC-MS/MS analysis for toxicological assessments, ensuring quality control and data integrity in sample preparation.
- Utilize ZenQMS and Windchill for tracking and managing corrective and preventive actions (CAPAs), non-conformance reports, quality events, and approval workflows.
- Design and publish SOPs to maintain compliance with regulatory agencies.
- Ensure laboratory compliance with CLIA regulations, overseeing proper documentation, testing protocols, and laboratory safety standards.
- Conduct regular risk assessments and internal audits of laboratory practices to identify potential hazards and implemented corrective actions in accordance with GLP and biosafety standards.
- Train laboratory personnel in GLP and biosafety protocols, including proper handling of hazardous materials, waste disposal, and emergency response procedures.

Key Achievements:

- Reduced data entry errors by 25% by streamlining data management processes and automating reporting tools.

Alexus Blackshear
Dallas, TX 75231
586-765-9214
AlexusBlackshear32@gmail.com

- Enhanced laboratory compliance through the development of over 20 new SOPs and updated protocols.

Microbiologist, *Oakwood Hospital (1/2016-3/2017)*

- Perform cultures, biochemical tests, and molecular techniques to identify bacteria, viruses, fungi, and parasites.
- Interpret test results and communicate findings to physicians and other healthcare professionals to support clinical decision-making.
- Collaborate with infection control teams to identify and monitor hospital-acquired infections (HAIs) and implement control measures.
- Participate in outbreak investigations and provide microbiological expertise for managing infection prevention protocols.
- Analyze trends in infection rates, resistance patterns, and contribute to hospital reports and publications.

Key Achievements:

- Improved reporting accuracy by 20% by standardizing data entry protocols.
- Contributed to hospital-wide infection reduction strategies through detailed trend analysis.

Clinical Trial Assistant, *Wayne State University (8/2013-12/2016)*

- Assist with clinical trials to ensure compliance with Good Clinical Practice (GCP) guidelines, focusing on the safety and well-being of participants.
- Coordinate with cross-functional teams to ensure that protocols were strictly followed during clinical research, mitigating any risks to human subjects.
- Administer informed consent procedures, ensuring ethical and regulatory compliance.
- Assist in the preparation and submission of Institutional Review Board (IRB) documents.
- Managed the collection, storage, and analysis of clinical data, ensuring it met GCP standards for accuracy, confidentiality, and patient safety.
- Support GCP-compliant clinical trials, ensuring the accuracy and integrity of clinical data and patient safety.

Key Achievements:

- Streamlined clinical data workflows, reducing data processing time by 15%.
- Developed a clinical trial data tracking system to improve protocol compliance.

PROFESSIONAL SKILLS

- Capable of implementing effective surveillance systems, developing targeted intervention programs, evidence-based interventions, fostering community engagement, and collaborating with diverse stakeholders to address health disparities and create sustainable health solutions.
- Meticulous attention to detail in preparing and reviewing SOPs, and regulatory documentation.
- Proficient in conducting audits, risk assessments, implementing appropriate control measures, and developing biosafety training programs.

Alexus Blackshear
Dallas, TX 75231
586-765-9214
AlexusBlackshear32@gmail.com

- Proficient in using quality management software including Veeva Vault, TrackWise, ZenQMS, MasterControl, and Windchill to manage product lifecycle processes, documentation, and quality control
- Use biosafety assessments to help the FDA and other governing bodies to make informed decisions about the safety and effectiveness of biotechnology products, ultimately safeguarding consumers, and patients.
- Familiarity with FDA regulatory requirements and basic knowledge of regulatory submissions and documentation preparation.

CORE COMPETENCIES

- Data Analysis & Management
- Regulatory Compliance & Inspection Readiness
- Quality Management Systems (QMS)
- Internal Audits & Risk Assessment
- Corrective and Preventive Actions (CAPAs)
- Data Integrity & Health Informatics
- SOP Development & Process Optimization
- Cross-Functional Collaboration & Stakeholder Engagement
