

Anusha Sree Belli

Full Stack Java Developer

+1 (913)-280-0421 | anushasree1308@gmail.com | www.linkedin.com/in/anusha-sree

PROFESSIONAL SUMMARY

Full Stack Developer with nearly 4 years of experience architecting and deploying cloud-native solutions using Java, Spring Boot, React.js, and modern DevOps tools. Hands-on expertise in building and orchestrating virtual machine environments using Kubernetes, Docker, and KubeVirt across Azure and AWS platforms. Proven ability to lead full-stack development, CI/CD automation, and secure infrastructure provisioning using Terraform, Crossplane, and GitOps workflows. Experienced in guiding junior developers and integrating emerging technologies like containerization and serverless deployments.

TECHNICAL SKILLS:

Backend Development: Java (Spring Boot), C#, .NET Core, Node.js, Go, Python, Fastify, Express.js, RESTful APIs, Microservices Architecture

Frontend Development: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind CSS, Webpack, Babel, Axios

VM & Orchestration: Kubernetes (K8s), KubeVirt, Kubebuilder, Crossplane, OpenStack APIs, Azure IaaS APIs, Docker, Podman, Rancher, Docker Compose, LXD

Infrastructure as Code & GitOps: Terraform, Pulumi, ArgoCD, GitOps

Cloud Platforms & Services: AWS (EC2, S3, RDS, Lambda, API Gateway), Azure (Functions, Blob Storage, App Services, IaaS APIs)

Authentication & Security: SAML, Active Directory, Windows Authentication, JWT, OAuth2, Role-Based Access Control (RBAC), Secure API Design

CI/CD & Version Control: Jenkins, GitHub Actions, Git, GitHub, GitLab, Bitbucket

Monitoring & Networking: Cilium, GitOps monitoring practices

Database Management: SQL (MySQL, PostgreSQL, Oracle, SQL Server), MongoDB, DB2, Query Optimization

Development Practices: Test-Driven Development (TDD), Agile (Scrum), Clean Code Standards, Sprint Planning, Documentation Best Practices

Testing Tools: JUnit, Mockito, Jest, Mocha, Selenium

Project Management Tools: JIRA, Confluence, Agile Methodologies, Sprint Planning, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Full Stack Java Developer | Cisco | USA **Dec 2024 - Present**

- Designed RESTful APIs using **Spring Boot**, reducing response times by 25% and optimizing API integration, resulting in improved user engagement and application stability.
- Built pixel-perfect, accessible **React.js** components using Hooks, Redux, and Context API, boosting user interaction by 30% and aligning with WCAG 2.1 standards.
- Developed modular, reusable components with React and TypeScript to support scalable front-end architecture.
- Developed backend APIs using Node.js and **Fastify**, enabling high-performance microservices with reduced latency and lightweight logic.
- Worked in **Ubuntu/Linux** environments to automate deployment scripts and containerize services with Docker.
- Configured **ESLint**, Prettier, and Husky to enforce code quality standards and streamline developer workflows.
- Architected Kubernetes clusters integrated with **KubeVirt** for VM orchestration across cloud environments.
- Deployed cloud-native applications using **AWS (EC2, Lambda, S3)** and **Azure IaaS APIs**, streamlining hybrid infrastructure provisioning.
- Integrated **GitOps** deployment workflows using **ArgoCD**, improving CI/CD reliability and traceability.
- Automated infrastructure using **Crossplane** and Terraform to provision VMs and containerized services.
- Implemented **SAML-based SSO** and Active Directory authentication for enterprise security integration.
- Optimized network security using **Cilium** and container isolation techniques.

Full Stack Java Developer | Citius Tech | India **Aug 2021 - Jun 2023**

- Applied **JWT** and **OAuth2** for authentication, reducing vulnerabilities by 40% and enhancing system security.
- Developed scalable Spring Boot microservices for healthcare platforms, enhancing performance and reliability.
- Leveraged Docker and Kubernetes for microservice deployment, integrating Kubernetes Operators for VM lifecycle automation.
- Built infrastructure modules using **Terraform** and automated deployments with GitHub Actions.
- Applied **OAuth2**, **RBAC**, and container security best practices to harden application endpoints.
- Implemented GitOps methodologies and cluster observability using **ArgoCD** and **CI/CD** pipelines.
- Created REST APIs interfacing with VM orchestration tools like **Crossplane** and integrated with Azure services.
- Built a basic **Go-based microservice** for patient tracking and continued backend upskilling with **Node.js** and **Python**.

Full Stack Java Developer | Hexaware Technologies | India **July 2020 - July 2021**

- Automated builds and deployments using **Maven**, **Jenkins**, and **Docker** Compose, streamlining **CI/CD** workflows.
- Participated actively in **Scrum** ceremonies including daily stand-ups, sprint planning, reviews, and retrospectives to ensure continuous delivery and team alignment in Agile projects.
- Handled data serialization and transformation using XML and XSLT for API integration and config management.
- Developed full-stack features with Spring Boot, React, and SQL databases, increasing system throughput by 25%.
- Automated VM provisioning using Docker Compose and deployed containerized workloads with Kubernetes.
- Used **Pulumi** for infrastructure automation in multi-cloud environments.

Masters in University of Central Missouri | Warrensburg Township Missouri, MO, CS **(3.5 CGPA) May 2025**
