PROFESSIONAL SUMMARY

Versatile and results-driven Full Stack Developer with a strong foundation in **Java, JavaScript** alongside extensive experience in designing and implementing robust web applications using **React, Spring Boot, Node.js, and MongoDB**. Proven ability to collaborate effectively across cross-functional teams, leveraging **AWS** and **microservices architecture** to ensure seamless integration and continuous deployment. Specialized in **building and optimizing** applications using modern frameworks like **Angular, Vue.js, and Next.js**, and enhancing **database performance** with technologies like **Cassandra, PostgreSQL, and Redis**. Passionate about driving innovation through **Agile methodologies, CI/CD pipelines**, and **cloud infrastructure management** (AWS EC2, S3, RDS, Lambda). Always eager to embrace new challenges, explore emerging technologies, and contribute to high-impact projects.

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, Python, Kotlin, C, TypeScript
- **Web Technologies:** HTML/ HTML5, CSS/ HTML5, XML, JSON, AJAX, SASS, LESS, PHP
- **Frameworks/Libraries:** ReactJS, NextJS, Angular, jQuery, Bootstrap, Vue.js, JSP, Svelte, Spring (Dependency Injection, Spring MVC, Spring Core, Spring Context, Spring AOP, Spring DAO, Spring IOC, Spring JDBC, Spring with Hibernate, Spring Boot, Spring Security, Spring JPA), JSF, Struts, Node.js
- **Architectural Styles:** RESTful API, Microservices, SOAP
- **Databases:** PL/SQL, Oracle, MySQL, PostgreSQL, Mongo DB, Cosmos DB, GraphQL, Redis
- **AWS Services:** EC2, S3, RDS, IAM, Lambda, CloudWatch, ECS, API Gateway, Elastic Beanstalk, CloudFormation, DynamoDB
- **Testing/ Logging tool:** Junit, Mockito, Log4J, Slf4J, Jest, RTL, Selenium, TestNG
- **Build Tools:** Maven, Gradle, Webpack, NPM, Babel
- **Tools:** Splunk, Grafana, Git, Jenkins, Figma, Docker, Kubernetes, Terraform, Postman
- **Servers:** Apache Tomcat, WebLogic
- **Methodologies:** SDLC, Agile, Waterfall

WORK EXPERIENCE

- **Web Developer** [University of Central Missouri, Warrensburg, MO] Sep 2023 – April 2024
 - Led initiatives that resulted in a **25% increase in user satisfaction** and a **20% reduction in bounce rates** by enhancing university-wide web/multimedia sites, achieved through collaboration with **cross-functional teams**.
 - Designed and implemented **interactive, user-centric web interfaces** using **JavaScript, HTML, JSP, CSS, jQuery, and React**, significantly improving the **functionality and overall user experience** of university web applications.
 - Streamlined data storage and retrieval by integrating **MongoDB**, reducing **data retrieval times by 40%**, and improving **scalability and flexibility** in handling unstructured data, supporting the growing needs of the university.
 - Developed and optimized **server-side functionalities** using **Node.js**, ensuring **seamless integration** with existing technologies and significantly enhancing the **scalability** of web applications.
 - Collaborated closely with peers and **cross-divisional partners** to drive improvements in **usability and functionality**, leading to enhanced digital platforms and better **alignment with the university's objectives**.
 - Ensured digital platforms were fully compliant with **web accessibility standards** as defined by the university, ensuring **inclusive and user-friendly experiences** for all students and staff.
- **Full Stack Java Developer** [Atos Syntel, Pune, India] July 2021-Nov 2022
 - **Developed and maintained Java web applications** using **Spring Boot, Spring MVC, AngularJS** for scalable, high-performance solutions.
 - **Built and deployed microservices** to ensure modular, independently deployable services, improving scalability and maintainability.
 - Managed **AWS infrastructure** (EC2, S3, Route 53) for hosting and application deployment.
 - Integrated **RabbitMQ and Kafka** for reliable message queuing and event-driven communication.

- **Created REST APIs** using **Spring Boot** for seamless communication between frontend (AngularJS) and backend systems.
- **Optimized database performance** with **Hibernate and NoSQL (Cassandra)**, improving transaction-heavy module handling.
- **Automated build and deployment** with **Jenkins and Maven**, ensuring continuous integration and faster release cycles.
- Designed and Developed **intuitive, UIs** with **HTML5, CSS3, Bootstrap** for responsive, mobile-first design.
- Participated in **Agile methodology**, including **Scrum**, and **TDD**, collaborating in daily stand-ups, sprint planning, and code reviews.

• **Java Developer** [Atos Syntel, Pune, India]

June 2020 – July 2021

- **Developed J2EE-compliant applications** using **JSP, Servlets, JDBC, and EJB** for enterprise solutions.
- Built **microservices in Spring Boot**, enhancing **modularity** and **scalability**.
- Implemented **Service Oriented Architecture (SOA)** using **Apache Camel** and **Mule ESB** for efficient **message routing** and **web service communication**.
- Configured **Hibernate second-level caching with EHCACHE** for **performance** optimization.
- **Integrated RESTful APIs** using **JSON/XML** to connect frontend and backend systems.
- Applied **Git** and **BitBucket** for version control, improving **team collaboration** and **code management**.
- Implemented **security features** such as **SSL encryption** and **SSO** for **secure user sessions**.
- Wrote **JUnit and Mockito-based tests** for **Spring Batch Controllers** and **Web Service Clients**.

• **Software Developer** [CGI, Hyderabad, India]

May 2019 – June 2020

- **Developed Java applications** using core **Java principles** such as **OOP, inheritance, polymorphism** to build scalable and maintainable solutions..
- Gained experience in **frameworks** such as **Spring, Hibernate**, and **JavaFX** for building scalable solutions.
- Worked with **SQL databases (MySQL, PostgreSQL)** using **JDBC** for data management.
- **Integrated RESTful APIs** and contributed to **Agile development cycles**, participating in **sprint planning** and **code reviews**.
- **Developed unit tests** using **JUnit** and **Mockito** to ensure application reliability.
- Collaborated using **Git** and **GitHub** for version control, following best practices for **code management**.

EDUCATION

Degree	Specialization	Institute	Year	GPA
MS	Computer Science	University Of Central Missouri	2023 - 2024	3.4
B-Tech	Computer Science and Engineering	JNTU	2016 - 2020	3.5

POSITIONS OF RESPONSIBILITY

- Supported the professor in conducting research related to full-stack Java development, including exploring emerging technologies, best practices, and industry trends.
- •Participated in organizing workshops, seminars, or coding boot camps to promote awareness and understanding of full stack Java development among students.
- •I got opportunity to work as UCM LS Student Worker where we Greet office guests, Process confidential paperwork and Additional office responsibilities as assigned.
- •1 year of experience as a scribe to visually impaired children in association with RAKSHA FOUNDATION.
