Citizenship Status: U.S. Citizen

Summary:

Public Health and Population Health Subject Matter Expert with over 8 years of experience, including 4+ years as a practicing Epidemiologist. I hold a Master's degree in Public Health Epidemiology and bring over five years of expertise in advanced analytical techniques, health data surveillance, and clinical training as a nurse and first responder (not currently licensed to practice nursing). I specialize in designing and conducting mission-driven and operational studies using health surveillance systems, EMRs, and military health records to reduce adverse outcomes in public populations. Proficient in SAS, SAS Enterprise Guide, Tableau, Adobe Acrobat Pro, and Microsoft Office Suite, with demonstrated strengths in both quantitative and qualitative analysis, as well as data visualization. My background includes developing technical documentation, managing projects, and leading cross-functional teams to deliver high-quality training and structured content. I have contributed to public health efforts in areas such as substance use disorders, infectious and chronic diseases, and behavioral health, and am committed to advancing strategies that improve outcomes for general and high-risk populations.

Education:

- **Master of Public Health: Epidemiology** **Aug 2021 Kent State**
University Kent, OH United States
Minor: Infectious Diseases & Acute-Chronic Morbidity & Mortality – GPA: 3.65 of a maximum 3.78 **May 2019**
- **Bachelor of Science in Public Health: Clinical Trials Research**
Kent State University Kent, OH United States Minor: Clinical Trials Research

Relevant Coursework, Licenses, & Certifications:

My academic and professional background is rooted in a comprehensive understanding of public health and epidemiology, supported by coursework and practical experience in key areas. I have completed courses in Principles of Nursing Assessment, Mental Health CPR & Suicide Prevention, and Pharmacoepidemiology, which have provided me with a strong foundation in health assessment, emergency response, and the study of medication use in populations. My expertise in Data Management Using SAS and Applied Regression Analysis in Public Health Data has enabled me to manage and analyze complex datasets effectively, which is crucial for making informed public health decisions. Further enhancing my expertise, I have studied Clinical Epidemiology, Chronic Disease Epidemiology, Infectious Disease Epidemiology, and COVID-19 & Pandemic Epidemiology, equipping me with the skills to address a wide range of health issues, from chronic conditions to emerging infectious diseases. Additionally, my coursework in Emerging Trends in Correctional Institutions and Biostatistics in Public Health has provided me with a deeper understanding of the unique health challenges in correctional settings and the statistical methods necessary for rigorous public health research. Lastly, my knowledge of the Principles of Epidemiology Research solidifies my ability to design, conduct, and evaluate epidemiological studies, making me well-prepared to contribute to federal public health initiatives.

Skills:

- | | | |
|---|--|-------------------------------------|
| • Epidemiological research and statistical analyses | • Proficient in evidence-based practices, clear, & technical communication | • SAS/EG |
| • Project coordination and management | • Technical guidance and support | • RStudio |
| • Local & state-based stakeholder collaboration | • Data management, collection, and reporting accuracy | • SQL |
| • Medical writing (APA & AMA) | • Public health surveillance | • Machine Learning |
| • Overdose prevention & response strategies | • Infectious disease surveillance and control | • ArcGIS |
| • Grant management & strategy lead | • Quality Assurance & control development | • Data Warehousing |
| • Detail-oriented | • Health data analytics | • Advanced Data Analyses |
| • Proficient in statistics, statistical programming, & modeling | • Aeromedical data processes | • Regression Analysis |
| | | • Data Visualization & Dashboarding |
| | | • Tableau |
| | | • REDCap |
| | | • Adobe Acrobat Pro |

- Microsoft Office Products (Excel, PowerPoint, etc)
- Health surveillance for operational studies
- Military health records analysis
- Research utilization & handling of EMR
- Community wellness and health promotion
- Data pipeline management
- Health program infrastructure building
- Epidemiologic study designs (clinical, observational, cross-sectional, ecological, & cohort)

Additional Information & Certifications:

- Active Public Trust clearance (T1 SF-85) with STINFO Training

HIPAA Certifications

- HIPAA Compliance for Military Populations
- HIPAA Compliance for General Populations

The Collaborative Institutional Training Initiative (CITI Program)

- Biomedical Responsible Conduct Course
- GCP for Clinical Investigations of Drugs and Devices (FDA)
- Group 1 Biomedical Research for Faculty, Staff, and Students
- Biomedical Research
- Social & Behavioral Responsible Conduct Research Course 1
- Biomedical Responsible Conduct Research Course 1

Relevant coursework:

- Environ health concepts in PH (ehs 52018)
- Fundamentals of public health epidemiology (EPI 52017)
- Epidemiology of infectious diseases (EPI 63015)
- Public health administration (HPM 52016)
- Data management using SAS (BST 62020)
- Pandemic: covid-19 (EPI 60195)
- Biostatistics in public health (BST 52019)
- Epidemiology of chronic diseases (EPI 63014)
- Applied regression analysis for public health data (BST 63014)
- Practicum experience in epidemiology (EPI 60192)
- Principles of epidemiological research (EPI 63016)
- Intro to public health (PH 10001)
- Essentials of epidemiology (PH 20001)
- Social/behavior science theories in public health (PH 30005)
- Communicable diseases (PH 30012)
- Pharmacoepidemiology (PH 40017)
- Clinical epidemiology basics (PH 40013)
- Clinical trials management (PH 40014)
- Health disparities - writing intensive (PH 44000)

Professional Experiences:

SyraHealth

Senior Research Associate

United States, Nationwide Support Mar 2025 – Present

- *Assist in the development & delivery of local health districts (LHD) & state training programs focused on substance use disorders (SUD).*
- *Support infectious disease prevention initiatives through surveillance efforts, including dashboard creation, and data analysis.*
- *Public Health & Population Health subject matter expert using data-driven decision approaches*
- *Literature reviews*
- *Conducting Community Health Needs Assessments (CHNA)*
- *Creating data dashboards for data visualization*
- *Developed specialized reports on adolescent (ages 10 - 19) & adult behavioral health by integrating multi-state & national level data for comprehensive analyses.*
- *Contribute to harm reduction strategies to mitigate health risks associated with infectious diseases.*
- *Engage, coordinate, & collaborate research activities to enhance epidemiological knowledge & guide collaborating partners on current best practices in public & population health practices.*

Statewide Lead & Subject Matter Expert CDC Foundation & Illinois Department of Public Health Clinical OD2A Program Coordinator

Illinois, Statewide of Illinois

Feb 2024 – Mar 2025

- *I excel in both written & verbal communication, demonstrating strong organizational & project management skills by handling multiple projects with competing timelines.*
- *I work effectively both independently & within teams, with extensive experience in virtual environments and remote collaborations.*
- *My responsibilities also include developing specialized knowledge in harm reduction, overdose prevention, surveillance, & response, as well as creating & implementing program monitoring & reporting tools.*
- *A key accomplishment in this role has been building the OD2A program for Illinois from the ground up, including academic detailing and connecting medical providers to the latest practices for treating patients with Opioid Use Disorder, in partnership with IDPH.*
- *As the Clinical OD2A Program Coordinator with the CDC Foundation, I oversee OD2A program activities for Illinois in collaboration with the Illinois Department of Public Health (IDPH).*
- *My responsibilities include leading initiatives to educate clinicians, enhance clinical workflows, and implement guidelines that improve patient safety and care outcomes.*
- *Additionally, I support Strategy 8: Harm Reduction by coordinating efforts, promoting naloxone use, supporting syringe service programs, and advocating for safer drug use education. As a subject matter expert on the Harm Reduction Council, I contribute to policy development and strategic planning for harm reduction initiatives statewide.*

Infectious Diseases Subject Matter Expert & Oncology Research Advisor Liona Enterprises, DoD, & DAF Cincinnati, OH Epidemiologist Consultant

Jan 2024 – Aug 2024

- *My experience within the Department of Defense/Department of the Air Force encompasses a broad range of population research, surveillance, and program coordination activities.*
- *I have been deeply involved in population research, including work with the Missile Community Cancer Study (MCCS) and conducting a Fetal Demise Research Study. In the realm of surveillance, I have gained extensive experience monitoring infectious, acute-chronic, and environmental diseases, ensuring that critical data is collected and analyzed to support public health initiatives.*
- *Additionally, my role in program coordination has allowed me to contribute significantly to literature reviews and quality control processes.*
- *I have been involved in the Mortality Phase 1C project and have played a key role in coordinating efforts related to fetal demise.*
- *These experiences have equipped me with a strong foundation in both research and program management, particularly within the military health context.*
- *STINFO training completed*

Emergency Response CDC Foundation & Maryland Department of Health

Interim OFR Principal Epidemiologist – Baltimore State of Maryland

Apr 2022 – Nov 2023

- *As the OFR Principal Epidemiologist and Emergency Response Field Employee, I have played a pivotal role in program and project training facilitation, leveraging my expertise as a local community and state public health expert in substance-related morbidity, mortality, and acute to chronic illness.*
- *My responsibilities include scheduling program-related work, overseeing daily operations, coordinating activities, and setting program priorities to ensure the smooth functioning of public health initiatives.*
- *I am committed to maintaining strict compliance with program regulations while providing comprehensive leadership training and program support.*
- *I have actively participated in peer review processes and facilitated training for 24 jurisdictions, applying epidemiological techniques to enhance public health responses. I provide technical assistance and training to stakeholders, establishing and maintaining collaborative relationships with both internal and external partners.*
- *Additionally, I gather and disseminate information related to program research and training opportunities, furthering the impact of our initiatives. My specialized knowledge in harm reduction, overdose prevention, surveillance, and response has been crucial in addressing public health challenges effectively.*

- *One of my key accomplishments in this role has been the complete rebuilding of the Overdose Fatality Review (OFR) process, which significantly improved its effectiveness and efficiency.*
- *Additionally, I completed and overhauled three annual state reports, ensuring they accurately reflected the latest data and insights to inform public health strategies. These efforts have greatly contributed to the enhancement of our overdose prevention and response initiatives.*

Substance Use Disorder & Predictive Modeling Subject Matter Expert CDC Foundation & Cuyahoga County Board of Health

Epidemiologist Consultant – Cleveland, OH

Apr 2022 – Dec 2022

- *During my time as an Epidemiologist and Prediction Analysis Specialist at the Cuyahoga County Board of Health, I was deeply involved in initiatives that combined data visualization, strategy, and interdepartmental collaboration to address critical public health issues.*
- *I created and managed public health dashboards that provided real-time insights into opioid overdoses—both fatal and non-fatal—and infectious disease outbreaks related to sexually transmitted diseases.*
- *My work included conducting surveillance, data analysis, and predictive modeling, where I utilized descriptive statistics, linear modeling, data cleaning, and logistic regression to generate actionable insights.*
- *I took pride in ensuring quality control by supervising data analysts within the OD2A program, making sure all data use agreements were strictly followed.*
- *I also provided essential analytic and intelligence support while awaiting system authorization. My role extended beyond data as I engaged in academic detailing with local healthcare facilities and partnering organizations such as the Cleveland Clinic, University Hospitals, and local rehabilitation centers, ensuring they had the latest information and best practices for managing public health challenges.*
- *Recognizing the need for improvement, I challenged the existing workspace and significantly increased department efficiency by organizing over 2,000 files and enhancing the department's data management system. As the County Public Health LGBTQI+ Liaison, I had the privilege of meeting with community members and organizations, promoting public health education, fostering collaboration, and working to reduce stigma.*
- *My role as an epidemiologist for the Cleveland LGBT Center was particularly rewarding, where I could support a community, I am passionate about.*
- *In addition to my public health advocacy work with the Cleveland Board of Education, I contributed to the Cleveland Division of Police by designing a prediction algorithm to forecast fatal or non-fatal overdoses and providing essential Naloxone administration and opioid safety training.*
- *I also played a critical role in COVID-19 harm reduction, educating the public on handwashing, mask etiquette, and vaccine information, and providing proximity-based resources. Lastly, I extended my public health efforts to youth-based training, engaging with junior high and high school students on topics such as sexually transmitted infections (STIs) and opioid-related mortality.*
- *These seminars were not only educational but also aimed at reducing stigma and fostering a more informed and compassionate community.*
- *My work at the Cuyahoga County Board of Health was driven by a commitment to using data and human connection to make a meaningful impact on public health.*

Case Western Reserve University/University Hospitals

Research Data & Regulatory Coordinator II

Cleveland, OH

Dec 2021 – Apr 2022

- *At Case Western Reserve University and University Hospitals, where I served as a Research Data & Regulatory Coordinator 2 my role was centered on managing the Mood Disorders Programmatic Research studies in conjunction with the Data Manager, Lead Research Manager, & Principal Investigators involved for each study while engaging in quality assurance and quality control involving data management, visualization, and harmonization, particularly within the realm of electronic medical health records.*
- *I specialized in ensuring industry standard research compliance involving human participants and performed detailed data analysis using univariate, multivariate, frequencies, and both simple and multi-linear regression modeling techniques.*

- *My contributions extended to writing grants and funding proposals, which allowed me to support the financial sustainability of our research programs.*
- *In addition to these responsibilities, I played a key role in training research assistants, level 1 data & regulatory coordinators, managing caseloads post-certification, ensuring that interim changes were accurately entered into the computer system, and responding to requests from applicants, enrollees, state officials, and other agencies.*
- *My expertise in data analysis was complemented by my study coordination and project management skills, where I facilitated training and comprehensive learning for incoming Data Coordinators, managed clinical study protocol documents, and oversaw clinical study protocol deviations, including adverse event reporting and coordinating care between the Principal Investigator (P.I.) and participants.*
- *I managed several studies during my tenure, each with distinct tasks.*
- *For the Mood Disorders Program, I was responsible for training and onboarding new team members on the use of eye-tracking machines, conducting regulatory interventions as per study protocol or P.I. recommendations, and ensuring data cleaning and quality control.*
- *Additionally, I contributed to public health initiatives within the program. In managing the Epilepsy Well (MEW) study, I focused on psychiatric intervention implementation, ensuring participants navigated the study protocol safely and efficiently, supported medication adherence, and provided supportive talk therapy, where I listened to patient concerns and administered appropriate interventions.*
- *Throughout my time in this role, I was dedicated to maintaining the highest standards of quality assurance and regulatory compliance, while also providing compassionate and effective support to study participants, ultimately contributing to the success of our clinical research initiatives.*

Cleveland Clinic

Patient Support Specialist – Twinsburg, OH

July 2019 – Nov 2020

- *During my tenure as a Patient Support Specialist 2 at the Cleveland Clinic, I was deeply committed to ensuring that patients received the highest level of care and support throughout their healthcare journey.*
- *My role involved acting as a patient navigator, where I guided patients through the complex healthcare system, assisting with scheduling, and advocating for their needs to ensure they received timely and appropriate care.*
- *I was responsible for coordinating appointments, managing patient information, and facilitating communication between patients and healthcare providers, which was crucial in maintaining continuity of care and enhancing patient satisfaction.*
- *In addition to these responsibilities, I played a vital role as a patient advocate, where I worked closely with patients to understand their concerns, address their questions, and ensure that their voices were heard within the healthcare system.*
- *My ability to empathize with patients and provide them with clear and compassionate guidance was key to my success in this role.*
- *My work required a deep understanding of the healthcare system, strong organizational skills, and the ability to manage multiple tasks simultaneously while maintaining a patient-centered approach.*
- *Throughout my time at the Cleveland Clinic, I was dedicated to not only supporting patients in navigating their healthcare needs but also to ensuring that their experience was as positive and stress-free as possible.*
- *My contributions helped foster a more compassionate and efficient healthcare environment, reflecting the values of excellence and patient care that the Cleveland Clinic is known for.*

Cleveland Clinic Akron General Hospital 1 Akron General Ave

Research Assistant (Volunteer) – Akron, OH

Aug 2018 – Apr 2019

- *During my time at Cleveland Clinic Akron General Hospital, where I initially volunteered and later served as a PRN Research Assistant, I played an integral role in supporting research efforts aimed at reducing post-surgical infections through the use of Tobramycin.*
- *My responsibilities included analyzing, organizing, and interpreting project results, which contributed to the development of more effective infection control protocols.*
- *In addition to my research duties, I assisted in patient investigations, where I completed 300 volunteer hours.*

- *This experience allowed me to work closely with patients, gathering vital information that informed our research and ultimately improved patient outcomes. My contributions as a Research Assistant were driven by a commitment to enhancing patient safety and supporting the hospital's mission to provide high-quality care.*

Vector Borne Disease Control & Mosquito Control Specialist Environmental Surveillance Technician

Summit County Department of Public Health – St Akron, OH Jan 2017 – Nov 2017

- *As an Environmental Assistant and Mosquito Control Technician, I was responsible for a variety of tasks that contributed to the overall effectiveness of public health initiatives. My role involved clerical work, data entry, larvicide, and receiving basic motor vehicle maintenance training to support field operations. I evaluated current investigation practices for vector-borne complaints, ensuring that the methods used were both effective and up to date.*
- *In addition to these duties, I played a crucial role in updating protocols for the Joint Communicable Disease program and the Food Protection program.*
- *I developed new complaint investigation protocols, which improved the efficiency and accuracy of our response to public health concerns.*
- *As a Lab Assistant, I supported specimen collection and conducted infectious disease testing, including rabies and ZIKA virus testing.*
- *My contributions in the lab were essential in identifying and mitigating public health risks, furthering the impact of our environmental health efforts.*

Caregiver & STNA/ADN

Home Instead – Ravenna, OH Jan 2015 – Nov 2017

- Medication Administration (Oral, SubQ & IM injections)
- Captured vital signs & monitored patient/client
- Assisted with ADLs following care plans
- Maintained infection control & safety protocols
- Provided basic wound care & hygiene support

Professional Development:

- *I possess a diverse set of technical and programmatic skills essential for public health and research roles (Comprehensive Literature Reviews, Program Coordination, Program Evaluation, & Grant Management).*
- *I am proficient in SQL, Tableau, Statistical Analysis Software (SAS) Core, SAS Enterprise Guide (SAS EG) & SAS for Academics/SAS Studio Edition for conducting advanced data analysis (Predictive Analytics, Regression Analyses, & Trend Analytics), as well as in EHR/EMHR systems such as Essence, MHS Genesis and the Joint Longitudinal Viewer (JLV) for managing electronic health records.*
- *My experience includes Advanced use of REDCap for data entry and management, Microsoft Office Products for a variety of professional tasks, and ArcGIS for geographic information systems applications supporting local, state, and national agencies that have included Municipal Courts, Law Enforcement, EMS, Social Service Agencies, and Medical Health Facilities (Treatment Facilities, Hospitals, Accredited Educational Institutions, & Nonprofit Organizations).*
- *In addition to these technical competencies, I have hands-on experience in Eye Tracking Laboratory work using MatLab and device sequencing, as well as Project Development and Essence Maryland for syndromic surveillance.*
- *My nursing experience includes 150 hours of hands-on experience in physical assessment, taking vitals, and administering medication via oral and injection routes.*
- *I am skilled in Cognitive Interviewing, and technical writing in both APA and AMA formats, and have facilitated Meditation for Wellness in group settings.*
- *My ability to conduct Mental Health Assessments further complements my comprehensive skill set, enabling me to contribute effectively to a wide range of public health initiatives.*

Language(s) Skills:

- French—Novice
- English—Native Language

Professional Publications:

- *2020 Overdose Fatality Review Annual Report, the 2021 Overdose Fatality Review Annual Report, and lastly, the 2022 Overdose Fatality Review Annual Report.*
- *These are internal statewide publications.*
