

Full Stack Software Engineer — Java, Spring Boot, Python, SQL, Cloud, ETL

|Ashleyrehder@oakland.edu | [Linkedin: ashleym-k/](#) | 989-963-9607 |

Software Engineer with hands-on experience developing and supporting enterprise applications using Java, Spring Boot, Python, and SQL. Strong background in API development, data integration, ETL pipelines, and production troubleshooting. Skilled in Agile delivery, CI/CD, and cross-functional collaboration. Known for improving system reliability, optimizing performance, and delivering customer-focused digital solutions across large-scale environments.

TECHNICAL SKILLS

- Languages: Java (SE/EE), Python, SQL, JavaScript, HTML/CSS
- Frameworks: Spring Boot, React
- Tools: Git, Jenkins, Docker, Postman, Jira, Confluence
- Databases: SQL Server, Oracle, Salesforce
- Cloud: Azure, AWS
- Testing: JUnit, Postman automation
- Monitoring: Graylog

EXPERIENCE

RouteOne: Full stack Associate Software Engineer, Application Development 2022 - Current

- Developed and enhanced Java Spring Boot microservices supporting enterprise reporting, financial operations, and customer-facing workflows, improving performance and reducing database load by 30%.
- Maintained RESTful APIs enabling secure, scalable data access across internal and external systems.
- Performed continuous debugging using logs, breakpoints, and profiling tools, resolving complex backend issues and improving system reliability.
- Conducted root-cause analysis and log investigation using Graylog, reducing production incident resolution time.
- Engineered Python-based ETL pipelines integrating Salesforce, SQL Server, and Oracle, improving data accuracy and reducing processing time by 25%.
- Implemented data validation, deduplication, and reconciliation logic to ensure integrity of high-volume enterprise data.
- Optimized indexes and query performance for large Oracle dealer and user tables, improving response times for reporting and analytics.
- Designed and optimized 10+ Tableau dashboards used weekly by 50+ stakeholders, supporting data-driven decision-making across sales and finance.
- Authored complex SQL queries for reporting, analytics, and operational tooling across multiple business units.
- Collaborated with QA to execute manual and automated testing, including JUnit and Postman integration tests, ensuring high-quality releases.
- Supported CI/CD pipelines using Jenkins, troubleshooting build failures and ensuring smooth deployments across environments.
- Worked in a full Scrum environment, participating in standups, sprint planning, and retrospectives.
- Partnered closely with product owners, QA, UX, and business stakeholders to deliver end-to-end features aligned with customer and business needs.
- Documented APIs, workflows, and architecture in Confluence, improving team onboarding and knowledge sharing.
- Supported systems involving user accounts, financial transactions, scheduling, and reservation-style workflows, contributing to reliable customer-facing digital experiences.

365 Retail Markets June 2022 Software Developer Intern

- Built automated Postman integration test suites to validate API functionality and email workflows, improving test coverage and reducing defects.
- Updated React and Spring Boot applications for TypeScript compatibility, improving maintainability and code quality.
- Authored technical documentation in Confluence, including setup guides and workflow diagrams.
- Participated in pair programming and code reviews to improve architecture and reduce technical debt.
- Delivered fixes and enhancements using Git Flow and Agile development practices

EDUCATION

Oakland University, Bachelor’s of Computer Sciences

- Women in Computing, President (3 years)
- Society of Women Engineers
