

Bhavana Shada | Data Engineer

Denton, TX | +1 (469) 496-5471 | bhavanashada02@gmail.com | LinkedIn

SUMMARY

Results-driven Data Engineer with **over 5 years of experience** in building scalable data systems and delivering data-driven solutions across global enterprises. Proven track record in improving data processing performance, automating complex workflows, and enabling real-time analytics for business-critical operations. Experienced in leading cross-functional projects that enhance data accessibility, streamline reporting, and support predictive modeling. Adept at collaborating with engineering, analytics, and compliance teams to drive operational efficiency, ensure data quality, and support strategic decision-making. Recognized for delivering high-impact solutions in dynamic and fast-paced environments.

TECHNICAL SKILLS

Programming Languages: Python, SQL, Java, Scala, Bash

Big Data & Distributed Computing: Apache Spark, PySpark, Hadoop, Hive, HBase

Data Warehousing & Databases: Snowflake, AWS Redshift, Google BigQuery, Azure Synapse, PostgreSQL, MySQL, MongoDB

ETL & Data Pipelines: Apache Airflow, dbt, AWS Glue, Informatica, SSIS, Talend

Streaming & Messaging: Apache Kafka, AWS Kinesis, RabbitMQ, Google Pub/Sub

Cloud Platforms: AWS (S3, EC2, Lambda, IAM, RDS, Glue), Azure (Data Factory, Blob Storage, Databricks)

DevOps & Infrastructure: Terraform, AWS CloudFormation, Docker, Kubernetes, CI/CD (Jenkins, GitHub Actions)

Data Security & Compliance: AWS KMS, GDPR, HIPAA, PCI-DSS, SOC 2, RBAC

Data Visualization & BI: Tableau, Power BI, Looker

Soft Skills: Problem-Solving, Agile & Scrum, Communication, Business Intelligence

WORK EXPERIENCE

The Greenbrier Companies – Texas, USA

Aug 2024 – Present

Data Engineer

- **Accelerated batch and real-time data processing** by designing scalable ETL pipelines using **Python, PySpark, and AWS Glue**, reducing average data latency from hours to minutes for internal reporting.
- **Built a modular data lake architecture** using **AWS S3, Redshift, and DynamoDB**, supporting ingestion of 100M+ records per week and enabling unified access across BI, analytics, and ML teams.
- **Eliminated 80% of manual intervention** by orchestrating complex workflows in **Apache Airflow**, ensuring SLA compliance for mission-critical pipelines and automated failure recovery.
- **Reduced deployment cycle time by 50%** through implementation of **CI/CD pipelines** with **Git, Jenkins**, and integrated unit tests, linting, and rollback strategies.
- **Drove predictive analytics use cases** by developing ML models in **Scikit-learn**, including customer churn classification and product recommendation; improved model precision by 18% through iterative hyper parameter tuning.
- **Enabled real-time analytics** by deploying **Apache Kafka and AWS Kinesis** to support event streaming for logistics data, enabling proactive issue detection in transportation workflows.
- **Optimized large-scale PySpark jobs**, applying partition pruning, broadcast joins, and serialization techniques—resulting in a **40% reduction in job runtime** across distributed clusters.

Uber – San Francisco, CA

Jan 2024 – Jul 2024

Data Engineer Intern

- Built ETL pipelines using Apache Spark, Airflow, and **Azure Data Factory** that reduced batch job latency by 45%, enabling the product and ops teams to access rider metrics faster.
- Engineered ingestion pipelines for Kafka and Kinesis, integrating live streaming data into **Azure Synapse Analytics** and **Azure SQL Data Warehouse** for real-time anomaly detection.
- Created modular dbt models to enforce transformation logic and lineage tracking, reducing reporting errors and promoting reusability across teams.
- Containerized Spark transformation jobs with Docker, deployed them via Kubernetes, and automated scaling to handle unpredictable surges in ride traffic.
- Built dashboards and alerting logic for SLA monitoring, cutting incident response time in half.
- Worked cross-functionally with security and compliance teams to implement IAM-based RBAC and **Azure Key Vault** encryption, ensuring full GDPR and SOC 2 compliance.

Accenture Solutions Pvt. Ltd. | Hyderabad, India

Jun 2020 – Aug 2022

Associate Software Engineer/ Data Engineer

- **Automated enterprise-scale data pipelines** by building ETL workflows with **AWS Glue, Talend**, and custom **Python** scripts, reducing manual data prep by 40% and enabling faster analytics delivery.
- Processed **terabyte-scale datasets** across distributed systems using **Apache Spark** on **Hadoop** and **Redshift Spectrum**, improving query performance for business-critical reports.
- **Developed and deployed REST APIs** to support microservices on AWS, enabling seamless integrations across internal systems and external partner platforms.
- **Implemented CI/CD pipelines** using **Jenkins** and Docker, accelerating release cycles by 30% while ensuring production-grade reliability via integrated testing.

- Provisioned and scaled cloud-native infrastructure using **Terraform** and **Kubernetes**, supporting zero-downtime deployment and standardized dev environments across teams.
- Built and maintained **Tableau dashboards** that visualized operational KPIs and automated reporting for stakeholders across data and finance teams.
- Worked closely with product and QA teams in **Agile sprints**, contributing to backlog grooming, sprint demos, and retrospectives to ensure timely feature delivery.
- Diagnosed and resolved performance issues by rewriting **SQL queries** and optimizing **data models** for complex joins and aggregations, cutting query latency by over 50%.
- Played a key role in the **migration of legacy systems to AWS**, handling data validation, pipeline refactoring, and system interoperability checks to ensure business continuity.

Hexaware Technologies – Chennai, India

Feb 2019 – May 2020

Data Analyst

- Developed SQL-based ETL pipelines using **Talend**, **SSIS**, and **Python** to unify siloed customer and transaction data, reducing reconciliation time by 60%.
- Analyzed millions of rows using **PostgreSQL** and **Python (Pandas)** to identify fraud signals and drive churn reduction strategies, helping one client cut loss rates by 12%.
- Built **Power BI dashboards** for internal stakeholders tracking SLAs, workforce utilization, and revenue metrics, replacing static Excel reports and reducing reporting effort by 70%.
- Migrated reporting systems to **Azure Synapse** and **Data Factory**, ensuring seamless adoption while improving data refresh reliability and performance.
- Implemented **Azure Monitor** and **Log Analytics** to track ETL failures and resource utilization, improving data pipeline observability and reducing downtime.
- Configured **Azure Role-Based Access Control (RBAC)** and Key Vault to safeguard sensitive client data, aligning with enterprise security protocols.
- Contributed to internal documentation libraries and compliance reviews for **HIPAA**, **PCI-DSS**, and **SOC 2**, supporting audit-readiness across clients.

EDUCATION

Master of Science in Information Systems University of North Texas	May 2024
Bachelor of Technology in Electrical & Electronics Communication CMR. Engineer College	May 2020
