

Akanksha Komirisheety

Email: reach.akanksha18@gmail.com

Ph: (940) 331-6590

PROFILE SUMMARY:

- Over **5+ years of experience** as a **QA Automation Engineer-SDET**, extensive experience on **Manual, Automation Testing of web Client server, cloud (AWS), Mobile, API, Webservices applications**. Experience in various domains such as **Ecommerce Retail, Banking, Financial Services and Health Care**.
- Fluent programming experience with **Java, Python, SQL**.
- Excellent knowledge and implementation skills in complete **Software Development Life Cycle (SDLC)** and **Software Testing life cycle**.
- Expertise in understanding business Requirement specifications, Functional specifications and design documentation and converting them into **Test Scenarios**.
- Experience in Waterfall and **Agile Projects**, worked very closely with product owners in Agile and attended different ceremonies like **Sprint planning meetings, Scrum, Backlog grooming, Sprint review** and Retrospective.
- Proven ability in designing and creating automation frameworks using **Java, Selenium WebDriver, Junit, TestNG, Appium, Jasmin, Maven, Jenkins tools**.
- Experience of creating, Modifying, and maintaining new and existing **Automation Framework Models (BDD/TDD/Data Driven and Keyboard Frameworks)**.
- Experience in **Core Java**, development by applying different concepts like **OPPS concepts, Collections, String, Exception Handling, Multithreading etc. and Java Scripts**.
- Worked in **DevOps**, installing, Configuring, and integrating **Automation Scripts** on **Continuous Integration tools (CI/CD)** like **Jenkins for nightly execution and working on knowledge on testing and configuring Amazon Web Services (AWS)**.
- Expert in developing Behavior Driven Development by writing **Gherkin language** using **cucumber tool**, developed **Scenarios, Scenario Outlines, features, and Step Definitions generating the cucumber reports**.
- Experience in installing and Administration of version control system like **GIT (Distribution Version Control), GitHub, SVN version control system**. Experience in automating Mobile applications using **Appium**.
- Working with Unit Test Frameworks like **TestNG and Junit**.
- Experience in implementing **POM (Page Object Model)** by creating element for each page object and reusing all the objects in various scripts.
- Experience in **testing Web Services, XML transactions, SOAP, HTTP** and Rest using various tools like **Ready API** and Selenium.
- Expertise in **HTML, CSS, HTTP, JavaScript, XML, Ajax, AngularJS, and jQuery**.
- Worked with **Eclipse, Apache POI, Log 4J, HTTP client and Maven**.
- Experience using tools like **Fire path, Fire bug, UI Automator Viewer** for finding elements locator and good knowledge in writing the absolute and relative **XPATHS** manually on need basis.
- Performed Database/ Backend testing by writing **complex SQL Queries** for data validation and integrity, good at writing complex joins and knowledge in **PL/SQL**.
- Worked with **Selenium Grid/ Sauce labs** for running multiple tests across different browsers, operating systems, and machines in parallel.
- Worked on testing applications on different browsers like **IE, Firefox, Safari, and Chrome**.
- Experience includes **Unit Testing, Functional Testing, User Acceptance Testing, System Testing, browser compatibility testing& Security testing of client /server web applications**.
- Expertise in using various defect-reporting and defect tracking tools like **Jira, Rally, Bugzilla, and HP ALM**.
- Experience in writing good quality object-oriented code for testing purposes by following industry standards by java coding standards.
- Excellent interpersonal skills, proven team player with analytical bent to problem solving and delivering under high stress environment.
- Good analytical and communication skills, and ability to work independently with minimal supervision and perform as a part of team.

- Quality oriented mind set up with Test to break attitude and **Tactful Diplomatic behavior.**

TECHNICAL SKILLS:

Testing tools	Selenium WebDriver/RC, QTP, Appium, Junit, TestNG, Firebug, Fire Path, Load Runner, JMeter.
Web Technologies	HTML, CSS, Java Script, AngularJS, NodeJS, XML, XSLT, JDBC& Rest Services
Defect Tracking tool	HP/Quality Center, Jira
Build Tool	ANT, Maven
Languages	Java, SQL, C#, C++, Python, VB.net, ASP.Net, .net
CI/CD tool	Jenkins
Cross browser platform	AWS, Sauce Lab and Selenium Grid
Databases	Oracle, DB2, SQL Server, MySQL
IDE	IntelliJ, Eclipse, Pycharm
Methodologies	Agile, Waterfall
Amazon Web Services (AWS)	EC2, S3, Lambda
Ticketing Tools	JIRA

PROFESSIONAL EXPERIENCE:

Client: Elevance Health, Virginia

March 2023 – Present

Role: QA Tester

Responsibilities:

- Shared Daily Status Reports with all the team members, Team Lead, Managers
- Thorough experience in **Agile, Scrum methodology.**
- Automation of test cases using **Selenium WebDriver, TestNG, Page Object Model (POM).**
- Designed and documented **REST/HTTP, SOAP APIs**, including **JSON data formats** and **API versions strategies.**
- Writing simple to complex **SQL Queries** for testing purposes.
- Validated **SOAP UI and RESTful API service.**
- Implemented **Selenium tool (Selenium RC/Selenium Grid).**
- Configured **Selenium Grid to execute the scripts in cross browser.**
- Implemented Simulator for mobile app testing in **iOS and Android platform** using **Appium tool.**
- Responsible for **implementing LoadRunner, Performance center, JMeter** based infrastructure including Architecting the load testing infrastructure, hardware & software integration with **LoadRunner.**
- Developed and executed automated **test scripts for API testing** using **REST and SOAP protocols**, ensuring comprehensive coverage of functional requirements.
- Utilized tools such as **Postman** and Rest Assured to validate **API responses, troubleshoot issues**, and ensure data integrity.
- Implemented mobile testing strategies using **Appium** for both **iOS and Android platforms, covering functionality, performance, and compatibility aspects.**
- Collaborated with cross-functional teams to understand **API specifications** and mobile application requirements.
- Integrated automated test suites into the continuous integration pipeline using **Jenkins** for efficient and timely testing.
- Conducted regression testing for each software release to identify and **report defects promptly.**
- Led the design and implementation of **API test scenarios**, ensuring reliability and stability of backend services.
- Created and maintained automated test scripts using **Java and Python, optimizing** test execution, and minimizing manual efforts.
- Conducted mobile testing using **Appium for iOS and Android, addressing compatibility issues**, and ensuring a seamless user experience.
- Collaborated with development teams to identify and **resolve API** and mobile application defects.
- Involved in **various business meetings** with **business analyst** and developers.
- Conducted Functional Testing, Regression Testing using **selenium** with **Data driven framework** and **Key word driven framework.**

- Created automation test scripts using data driven framework and Page Factory model to test the web applications using **Selenium WebDriver** with **JAVA** and **maven**.
- Expertise in using **Selenium** Grid to run test scripts on different platforms and against different browsers in parallel to save time.
- Used **Jenkins** to execute the **test script periodically** on **Selenium Grid** for different platforms like **desktop, table** and **mobile**.
- Performed Cross browser testing and parallel testing on **Chrome, Firefox** and **Safari** using **TestNG** and **Maven** on **Selenium Grid**.
- Expertise in grouping of **Test suites, Test cases** and **Test Methods** for Regression and Functional Testing using **TestNG Annotations** like **Groups, Parameter, Data Provider** and **Tags**.
- Utilized Maven to Manage dependencies for Test execution, plug-ins and created profiles of grouped Test cases to Run sanity and Regression Testing.
- Involved in developing **BDD Framework** from **Scratch**.
- Involved in **DeVOps Migration/automation** for Build and **Deploy system**.
- Setting up Jenkins master, adding the necessary plugin and adding more slaves to **support scalability and agility**.
- Planning and setting up of Continuous for various properties on **Jenkins with Commit, Component, Assembly, Deploy** and **Smoke jobs**.
- Experience setting up instance like **Elastic Load Balance** in **AWS** for high availability.
- Used **AWS** to deploy the project on EC2 instance. Implementation of the Business logic layer for Service.
- Integrated **Jenkins** with **version controller (GIT)** and scheduler build to run automatically during release by invoking predefined maven command.
- Used **Linux/Unix** command for using **GitHub**.
- Utilized **Apache POI** jar file to read test data from the excel spreadsheets.
- Handled **Selenium Synchronization** problems using Explicit & Implicit waits during regression testing.
- Expertise in Mobile automation using **Appium, selenium, java** in both **Android and IOS**.
- Experience in writing complex Xpath using following and preceding and using functions like contains and not contains.
- Thorough experience in implementing Automation Tools **Selenium WebDriver, Junit, TestNG, Eclipse, Git/GitHub, Jenkins, SOAP UI and REST with POSTMAN**.
- Used runner classes in cucumber to generate step definition and used tags to run different kinds of test suits like smoke, health check and regression.
- Created profile in maven to launch specific **TestNG** suit from **Jenkins job**.
- Implemented **SOAP UI tool** to test **SOAP** based architecture applications to test **SOAP services**.
- Involved closely with developers in Development of UI modules using **HTML, JSP, JavaScript** and **CSS**.
- Shared Daily Status Reports with all the team members, Team Lead, Managers.

Environment: Selenium, Devops, AWS, Java, Java Script, Jenkins, Git, GitHub, SOAP, Rest API, POSTMAN, Android, Mobile, IOS, Cucumber, BDD, Agile, SQL, MS word, WebDriver, TestNG, Maven

Client: Caterpillar Inc, Illinois

Dec 2021 – Feb 2023

Role: Sr.QA Automation Tester

Responsibilities:

- Analyzed the Business Requirements and developed the detailed test plan and the Test strategy.
- Involved in resolving the technical challenges in efforts estimation and Test planning.
- Designed Manual and Automated Tests, created Automated test cases, test plans and executed tests using **HP ALM, Selenium**.
- Involved in writing Automation scripts and **executing scripts**.
- **Created IOS** and Android test frameworks based on **APPIUM, Cucumber** and **JavaScript**.
- Developed **BDD and TDD script** with **Cucumber** and writing step definition using **Gherkin feature**.
- Attending Financial product training, discussed issues and interacting with customers.
- Configured **Selenium Testing, Maven tool** and created selenium automation **scripts in java**.

- Extended Selenium capabilities through custom libraries, utilities, or plugins to Configured CI jobs to trigger Selenium test suites upon code commits, enabling.
- Worked on distributed test automation execution on different environments as part of Continuous Integration Process using Selenium Grid and Jenkins. Involved in designing and Developing Automated Functional Test suite using **Selenium IDE and WebDriver**. Involved in Functionality, System, Integration and Regression Test of **Web based reports**.
- Wrote and executed automated test cases using **HP ALM, Selenium WebDriver SOAP UI** to automate manual testing solutions.
- Conducted thorough regression testing to validate software releases and identify potential issues.
- Designed and implemented a robust and scalable test automation framework using **Selenium WebDriver and Java**.
- Conducted back-end testing using **SQL** queries. Developed and executed automation scripts using **Selenium WebDriver, TestNG, and Maven**. Performed **User Acceptance Testing (UAT)**.
- Automated **API testing** using **Java libraries** like **Requests**. Conducted mobile testing using **Appium** for **Android and iOS**.
- Integrated **Jenkins** with **GitHub** for automated builds. Resolved Maven/build-related issues.
- Conducted **smoke**, functional, integration, and **regression testing**.
- Developed and maintained robust test automation frameworks based on **Behavior-Driven Development (BDD)** principles using **Cucumber** and **Java**, ensuring efficient and scalable test suites.
- Proficient in using **SQL** to perform database testing, ensuring data integrity and accuracy in applications by writing **SQL** queries to validate data transactions.
- Leveraged **TestNG** for test suite management, **parallel execution**, and reporting, optimizing test execution and providing in-depth test results for analysis.
- Implemented test scripts to validate user interactions, data inputs, form submissions, and other functionalities of web applications under test.
- Led API testing efforts using Postman for multiple projects, ensuring adherence to functional requirements and industry standards.
- Created and executed Postman test scripts to validate RESTful APIs, including endpoints, request/response payloads, and status codes.
- Integrated automation scripts into **CI/CD pipelines**, specifically Jenkins, to facilitate automated build and deployment processes, reducing manual intervention and accelerating the release cycle.
- Performed **mobile testing** on various devices (**iOS and Android**) to verify cross-platform compatibility, usability, and responsiveness, ensuring a seamless user experience.
- Executed mobile app testing to verify the functionality, performance, and usability of mobile applications, providing valuable insights for app improvements.
- Proficient in defect tracking and reporting using tools like **JIRA**, ensuring that identified issues are promptly documented, prioritized, and resolved.
- Designed and executed **REST Web Service** tests. Used **Cucumber BDD framework** for automated test scripts.
- Executed mobile app testing to verify the functionality, performance, and usability of mobile applications, providing valuable insights for app improvements.

Environment: Selenium, Java, SQL, Rest API, BDD, Cucumber, TestNG, Junit, Appium, IOS, Android, Maven, Jira, Agile, Scrum, SOAP UI, Jenkins, CI/CD, Report NG, Cucumber reports.

Client: Spectra Smart Solutions, India

Feb 2019 - July 2021

Role: Automation Tester/Manual Tester

Responsibilities:

- Collaborated with **Business Analysts** to determine functional specifications.
- Developed a custom framework using **Selenium WebDriver**.
- Prepared test cases and scenarios based on requirements.
- Conducted **Smoke, Functional, Integration, Regression, and UAT Testing**.
- Documented and reported defects.
- Interacted with **end-users** and **business users**.
- Performed backend testing with **SQL queries**.

- Project is developed using **waterfall methodology**.
- Involved in creating Test cases and Test plans based on the client requirements.
- Participated in **Integration, System and Smoke Testing**.
- Performed **Web Services** Testing **Validated XML request/ response** data using soap.
- Involved in manual Testing of application, creating test plans and documentation.
- Performed Positive and negative Testing on application.
- Performed functional **Testing**.
- Developed and maintained automated test scripts using **Selenium WebDriver** with **Java** for web application testing.
- Employed data-driven testing to handle various test **scenarios, increasing** test coverage and minimizing redundant efforts.
- Collaborated with developers to troubleshoot and resolve issues identified during automated testing.
- Implemented data-driven testing strategies to execute tests with multiple sets of **input data, improving test coverage** and efficiency.
- Actively participated in code reviews, ensuring adherence to coding standards and best practices.
- Collaborated with cross-functional teams to understand requirements and define test scenarios for both functional and non-functional testing.
- Implemented **data-driven testing** techniques to execute a wide range of test scenarios, utilizing parameterization and external data sources, enhancing test coverage and reusability.

Environment: Selenium, Java, Testng, Jenkins, SQL Server, GitHub, Jira, Agile Methodology, Scrum, Report NG
