

BLAKE SLOCHOWSKY

Blakeslochowsky@yahoo.com

615-415-0886 Cell

Hands-on full stack developer and technical lead who builds scalable, user-focused web applications by combining strong front-end craftsmanship, reliable backend architecture, and a focus on quality and performance.

CORE QUALIFICATIONS

Frontend Development - Javascript, React, Angular, CSS, HTML	Backend Development - C# .NET (ASP & MVC), Python, Java
API Design - Postman, GraphQL	Database Management - SQL, MySQL
CI/CD Pipelines - GIT, VS Code, Gearset Copado	Automated Testing - GitHub Actions, Jenkins, MSTest
Microservices - ASP.NET Core Web API, Entity Framework Core, Docker	Cloud Architecture - AWS, AZURE

EMPLOYMENT HISTORY:

Brookdale Senior Living

Full Stack Developer November 2022 - Present

- Implemented responsive, accessible UI components with modern CSS (Flexbox/Grid) and component libraries, integrating seamlessly with backend APIs to improve usability and performance.
- Applied strong troubleshooting and analytical skills to diagnose production issues across the stack, using logging, monitoring, and cloud diagnostics to resolve defects quickly and prevent regressions.
- Operated as a self-starter in a remote, cross-functional team, communicating clearly with stakeholders, participating in code reviews, and maintaining a strong focus on code quality and customer experience.
- Designed and developed C#/.NET microservices using ASP.NET/MVC, exposing RESTful APIs and integrating with cloud-based eventing and messaging patterns to support scalable, decoupled systems.
- Architected and maintained large-scale React applications using modern patterns (hooks, context, compound components) and TypeScript.

Accenture

Software Developer: January 2021 - November 2022

- Developed and enhanced full-stack features using C#/.NET (ASP.NET/MVC) on the backend and React/JavaScript on the front end, building and consuming RESTful APIs under guidance from senior engineers.
- Assisted in building and deploying cloud-based services on AWS (Lambda, S3, SQS/SNS), following established patterns and using CI/CD pipelines to support reliable releases.
- Worked with SQL to write basic queries and aggregation pipelines, supporting data-driven features and troubleshooting issues.
- Participated in code reviews, testing, and debugging, applying feedback to improve code quality, maintainability, and performance across the stack.
- Collaborated with product, design, and QA teammates in an Agile environment, communicating progress clearly and focusing on delivering quality, customer-oriented solutions.

Nashville Software School Full Stack Software Developer

February 2019 - June 2020

Intensive full-time software development Bootcamp focusing on full- stack development fundamentals and problem-solving. Daily hands- on application of development fundamentals and principles through group and individual projects. The main technologies used are HTML, CSS, JAVASCRIPT, REACT, C#/.NET SQL, GIT/GITHUB, SCRUM, BOOTSTRAP.

ACCOMPLISHMENTS

Delivered high-quality full stack features across multiple web applications by designing and implementing scalable APIs, responsive user interfaces, and cloud-based services. Improved application reliability and performance through the introduction of automated testing, CI/CD pipelines, and proactive monitoring, reducing production issues and speeding up release cycles. Collaborated closely with product, design, and engineering teams to translate business requirements into maintainable technical solutions, while consistently meeting delivery timelines. Took ownership of complex problems, contributed to architectural decisions, and supported team success through clear communication, documentation, and a strong focus on customer experience.

EDUCATION

MTSU - B.S - Computer Science

Motlow State A.S - Computer Science

Nashville Software School - Coding Bootcamp
