Work Experience

Full Stack Software Engineer (Contract)

Envoy — Remote

Oct 2025 – Present

- Designed and deployed full-stack Zendesk sidebar applications, improving customer support agent efficiency by **15–20%**
- Automated Zendesk workflows using triggers, macros, and dynamic routing, saving teams **50+** hours per month
- Built RESTful API integrations connecting Zendesk with internal CRMs and analytics tools, reducing manual data entry by **40%**

Software Developer & Co-Founder

Tanaka Lawn Care, LLC — Seattle, WA

Jul 2020 – Aug 2025

- Founded and scaled a service business to **\$200K+ total revenue** by combining software systems with operational optimization
- Built a full-stack customer-facing website that increased client engagement by **60%**
- Implemented graph-based routing algorithms (**Dijkstra's**, **Bellman-Ford**) to optimize routes, reducing travel time by **14%**

Projects

AI Board Game Bot (Python) - (📺)

Feb 2025 – Jun 2025

- Developed a competitive game-playing AI using adversarial search and heuristic evaluation
- Optimized move selection logic to achieve fast, deterministic decision-making

Chess Engine (Java, React) - (📺)

Mar 2024 – Feb 2025

- Engineered a fully functional chess AI using **minimax with depth-based search**
- Applied **alpha-beta pruning**, maintaining sub-**0.4s** decision times at depth 5
- Built an interactive React UI to visualize legal moves and AI decision paths

Cargo Packing Optimization (Python) - (📺)

Sep 2024 – Jan 2025

- Collaborated with an international shipping company to reduce wasted container space to **<10%**
- Designed optimized packing algorithms and generated visual packing diagrams for warehouse workers
- Built simulation models to validate efficiency and real-world feasibility

Hospital Schedule Interface (SQL) - (📺)

Sept 2024 – Jan 2025

- Developed a hospital scheduling system to streamline patient account creation and appointment booking.
- Integrated an SQL database to optimize patient record storage, reducing access times by **12%** while maintaining data security.
- Implemented a secure authentication system for over **4,000** users, safeguarding sensitive patient information.

Education

University of Washington (Seattle, WA) — *BS Applied Computational & Mathematical Sciences (2025)*

Focus: Discrete Mathematics and Algorithms | GPA: 3.61 | Honors: Dean's List (2021–2025)

Relevant Coursework: Data Structures & Parallelism, Software Design & Implementation, Algorithms, Artificial Intelligence, Databases, Graph Theory, Statistics & Probability, Linear Algebra, Differential Equations, Quantum Computing

Technical Skills

Languages: Java, Python, C, C++, SQL, R, OCaml, Ruby, Scheme

Web: React, JavaScript, HTML, Zendesk App Framework

Tools & Platforms: GitHub, TensorFlow, Node.js, REST APIs, AWS, Azure, Postman, VS Code, IntelliJ, Yarn/npm
