cgeer98@gmail.com | Pittsburgh, PA | (215) 512 2001 | linkedin.com/in/christian-geer

Skills

Programming: SQL, Python, R, Version Control
Data Science Libraries: Scikit-Learn, Pandas, MLFlow, TensorFlow
Data Visualization and Analysis Tools: Tableau, PowerBI
Cloud: AWS, Azure, Databricks, Snowflake

Certifications and Achievements

January 2025	Snowflake SnowPro Core
December 2023	AWS Certified Cloud Practitioner
Mar 2022 - Sep 2022	Thru Hike of the 2,194-Mile Appalachian National Scenic Trail

Work Experience

CGI Inc. – Pittsburgh, PA	Jan 2023 – Present
---------------------------	--------------------

Data Engineer

- Built data pipelines in Python to collect and ingest state and county level health data from public and internal sources, supporting a statewide public health dashboard.
- Performed data collection, ingestion, and transformation in well-documented Jupyter notebooks, ensuring transparency and reproducibility for client handoff.
- Curated and transformed raw data into staging tables using Pandas, optimizing downstream Tableau dashboard performance
- Optimized high visibility reporting processes in Excel and Tableau, enhancing accuracy and efficiency while saving hours of manual effort
- Developed ML models to predict hospital length-of-stay using Databricks, PySpark, and MLflow, applying MLOps workflows across AWS and Azure environments

Pitcairn Trust Company – Jenkintown, PA	May 2020 – Feb 2022
---	---------------------

Research Analyst

- Prepared and presented weekly, monthly, and quarterly reports to the Investment team to inform investment guidance.
- Developed and maintained Excel macros for quarterly data reporting and quantitative fund screening, reducing report generation time from an entire day to just a few hours, as well as reducing the risk for human error.
- Participated in calls with investment fund managers as part of the qualitative screening and analysis process.

Education

Allegheny College, Bachelor of Arts in Economics, Minor in Computer Science	May 2020
---	----------

Senior Thesis: “Exploring the Relationship Between Social Media Sentiment and Stock Performance”

Through research, data collection, and feature engineering, and time series analysis, produced an academic paper illustrating the relationship between a company’s recent social media sentiment and its stock performance.
