EDUCATION

WAYNE STATE UNIVERSITY

Bachelor of Science – Computer Science

Detroit, MI

May 2025

WORK EXPERIENCE

RESOLUTE BUILDING INTELLIGENCE

Troy, MI

Software Engineer

March 2025 – August 2025

- Designed and implemented a React frontend connected to a Python Flask API and SQL database, creating a copilot that guided engineers through automated energy data analysis, thereby reducing analysis time by 76%.
- Automated data quality checks by developing Python scripts and SQL validation rules that flagged missing or out-of-range sensor readings, improving reliability by 85% and ensuring accurate energy reporting.

GENERAL MOTORS

Detroit, MI

Data Analyst/Scientist Intern

June 2024 – August 2024

- Analyzed fleet data for Allstate and Bayer using Python and SQL, identifying optimal candidates for EV transitions based on factors like proximity to CPO charging stations and daily mileage, leading to a 7% increase in EV adoption within these fleets.
- Enhanced reports with telematics data to recommend home charging stations for employees, resulting in a significant 57.4% reduction in charging costs.
- Developed customized dashboards and visualizations in Power BI, enabling Allstate and Bayer to monitor fleet performance in real-time.
- Migrated report data from local storage to the Azure Databricks platform, improving processing efficiency and enabling scalable data analysis.

WAYNE STATE UNIVERSITY

Detroit, MI

Cell Data Analyst

March 2024 – July 2024

- Built Power BI dashboards and Python ML scripts to analyze large NMC and LFP cell datasets, identifying degradation and performance trends.
- Built tools to enhance data extraction and analysis, contributing to advancements in the materials science community.

UNIVERSITY OF MISSOURI-COLUMBIA

Columbia, MO

Data Scientist-Electric Vehicle Charging Station

May 2023 – August 2023

- Reduced the number of EV Charging Stations in the Network by 56.5% by developing a two-stage stochastic optimization model using the Gurobi optimization library in Python.
- Improved accessibility for EV owners by decreasing the distance traveled between each charging station to 3.5 miles or less.
- Achieved an objective function value of 0.0360, representing a highly efficient placement of EV charging stations.

DETROIT LIONS

Detroit, MI

Data Analyst Intern

November 2022 – January 2023

- Developed 3 interactive visualizations with Power BI to enhance real-time decision-making for coaches.
- Presented findings to the Analytics team at the Detroit Lions

PROJECTS

SafeSight AI – PPE Detection System | 2nd Place, Ilitch StartUp Tech Competition

- Developed a computer vision system to detect whether workers wear required PPE in real time, ensuring compliance with safety regulations.
- Engineered a high-accuracy (92%) inspection system to identify structural breaks, asymmetry, and damage in PPE.
- Designed and implemented a thermal imaging platform to detect gas leaks and liquid spills through temperature-based video analysis.
- Automated safety monitoring processes, enhancing workplace hazard detection through advanced visual and thermal data integration.

AmpScout – EV Charging Site Selection

- Developed a comprehensive EV charger site selection platform by aggregating data from real estate listings, EV registration heatmaps, traffic patterns, and utility grid capacity to identify high-potential locations.
- Engineered a customizable ROI ranking algorithm that scores and ranks sites based on installation costs, electricity rates, and utilization projections using dynamic financial modeling.

SKILLS

Languages: Python, C++, Java, Kotlin, Go, JavaScript, MySQL, Bash, HTML/CSS

Libraries and Frameworks: TensorFlow, Pandas, Scikit-learn, OpenCV, Django, Flask, Node.js, Pytest, Selenium

Tools and Technologies: Git, AWS, Docker, MongoDB, Azure, Jupyter Notebooks, Kaggle, Visual Studio Code

Certifications: Astronomer Certification for Apache Airflow, Microsoft Certified Power BI Data Analyst, and Azure Data Engineer

LEADERSHIP

Programs Chair of NSBE at Wayne State University

August 2024 – May 2025

Secretary of NSBE at Wayne State University

August 2023 – August 2024

President of ColorStack at Wayne State University

August 2023 – August 2024
