Work Experience

Front End Flutter Developer

Witti Finance-Abidjan

June 2025 to Present

Freelance Mobile Developer (Flutter) at Witti Finance, where I design and build a high-performance cross-platform mobile

application. I develop clean, responsive UI screens from scratch and integrate RESTful APIs with secure JWT authentication. I

manage application state using the BLoC architecture to ensure scalability, maintainability, and a smooth user experience.

Delivery/Warehouse Associate

Amazon Warehouse-Lawrenceville, NJ

April 2025 to Present

Web Developer (Freelance)

Ecogreen Pharmacy-New York, NY

July 2024 to June 2025

Ecogreen Pharmacy is your trusted destination for high-quality natural supplements. We are dedicated to enhancing your health and wellness through carefully selected products, expert advice, and sustainable practices. Our commitment is to make wellness understandable, accessible, and affordable for everyone. Join us on your journey to a healthier, more vibrant life.

Web Developer • Full-time

- I was involved in the creation and maintenance of a web e-commerce software for Ecogreen. This project included designing the architecture, developing user-friendly interfaces, and ensuring seamless functionality for online transactions.

Additionally, I continuously updated and improved the software, addressing any issues and implementing new features to enhance the user experience and meet Ecogreen's business requirements.

Software Developer

Sectester SARL-Abidjan

June 2023 to May 2024

- Full-time

- I maintained the code for existing projects, ensuring they remained functional and up-to-date. This involved debugging issues, implementing updates, and optimizing performance to meet the evolving needs of our clients. My role also included collaborating with team members to enhance code quality and maintain high standards across all projects.

- I also worked with REST APIs and GraphQL APIs, integrating them into our software solutions. This involved fetching and manipulating data, ensuring seamless communication between the front-end and back-end systems. My experience includes handling various API endpoints, managing authentication and authorization, and optimizing API performance for better user experience.

Education

Computer Science (Master's degree)

Kean University-Union, NJ

January 2026 to Present

Master's student in Computer Science at Kean University, focusing on software engineering, data structures, algorithms, databases, data-driven application development, and applied artificial intelligence, including building and training AI agents using existing models.

Computer Methods Applied To Business Management (Master's degree)

University of Cocody-Abidjan-Abidjan

August 2022 to June 2023

Computer Methods Applied To Business Management (MIAGE) (Bachelor)

University of Cocody-Abidjan-Abidjan, Côte d'Ivoire

September 2018 to September 2021
