SUMMARY

Data Scientist with experience in machine learning, NLP, and analytics. Skilled in Python and SQL for building scalable models in fraud detection, risk, and customer behavior. Strong at translating insights for diverse audiences.

EDUCATION

THE UNIVERSITY OF TEXAS [Aug 2023 – May 2025]

Richardson, TX

Master of Science in Business Analytics and Artificial Intelligence

GPA: 3.80 / 4.0 (Scholar with Recognition)

Relevant Coursework: Natural Language Processing, Advanced Statistics, Data Visualization.

VELLORE INSTITUTE OF TECHNOLOGY [Jul 2019 – Apr 2023]

Vellore, India

Bachelor of Technology in Computer Science and Engineering

GPA: 3.54 / 4.0 (Scholar with Distinction)

Relevant Coursework: Artificial Intelligence, Machine Learning, Predictive Analytics.

WORK EXPERIENCE

APTECH (Software Development for Healthcare) [Sep 2025 – Present]

Dallas, TX

Data Scientist

- Engineered and deployed ML models using **PySpark and SQL**, boosting model accuracy by **20%** and ensuring **99.5%** data integrity across datasets **>1 millions of records**.
- Architected **ETL pipelines** and integrated microservices into production via **REST APIs**, reducing latency by **25%** for **50,000 users**.

SINEBYTE (Information Technology startup) [Jan 2025 – May 2025]

Dallas, TX

Software Data Engineer

- Developed a GPT-based chatbot using **Flask, REST APIs, and JavaScript** cutting latency by **30%** and improving UX.
- Built a **responsive, modular UI** that aids seamless user interaction using **HTML, CSS, and ReactJS**.

DEEPKORE (AI-based SaaS startup) [Sep 2022 – Jul 2023]

Chennai, India

Data Science Intern

- Worked with **Ford Motors** to analyze large-scale user safety data using connected automotive systems, building **SQL pipelines** and **Tableau** dashboards for **advanced KPI tracking and performance insights**.
- Improved data quality by **25%** through automated **SQL validation** and predictive modeling to identify active users.

PROJECTS

CLINICAL TRIAL OUTCOME PREDICTION | [Link](#) | Oct 2025 – Nov 2025

- Developed an **XGBoost model** combining **molecular fingerprints and NLP keyword features** to predict Phase 3 clinical trial outcomes with a **hybrid feature engineering pipeline**.
- Trained and evaluated the model on TDC dataset, producing a **0.78 F1 score** and demonstrating strong feature importance of clinical text signals.

CUSTOMER CHURN PREDICTION | [Link](#) | Jun 2025 – Jul 2025

- Built a scalable ML pipeline using **PySpark** to preprocess 7k+ customer records, engineer features, and predict churn using **RF**.
- Implemented cross-validation and AUC using **SparkLib**, achieving **84% accuracy** and streamlined performance for ETL.

AMERICAN EXPRESS – CREDIT DEFAULT PREDICTION | [Link](#) | Apr 2024 – May 2024

- Developed an **XGBoost model** on the AmEx dataset to predict credit default, identifying key features such as **Delinquency, Payment, Balance, Spend, and Risk**, and propose revenue-optimizing strategies i.e., **Conservative and Aggressive**.
- Benchmarked against a Neural Network model, which achieved a higher AUC score of **0.94**.

SKILLS AND CERTIFICATIONS

Language and Tools: Python, SQL/NoSQL, MongoDB, R, C++, HTML/CSS, Git, Excel, PowerPoint, SAS, Tableau, Looker, Power BI, TensorFlow, PyTorch, Keras, Pandas, NumPy, Matplotlib, Salesforce, Docker, Snowflake, Databricks, dbt, Alteryx.

Domains and Cloud: Mathematics, Data Science, Machine Learning, Deep Learning, Generative AI, NLP, Data Analytics, Business Intelligence, Predictive Modeling, KPI, ETL, Data Models, Hadoop, Spark, CI/CD, Hive, Scala, Critical thinking, decision-making.

Certifications: AWS Cloud Practitioner, Microsoft Azure DP-100, SAP S/4 HANA, SAP Analytics Cloud.
