Professional Summary

- Results-driven Data Analyst with 5+ years of experience solving complex business problems by leveraging data analysis, visualization, and ETL automation.
- 4+ Years of experience in SQL Programming and Query Optimization.
- Strong skills in advanced Microsoft Excel functions: Lookups, IF Conditions, SUMIFs, COUNTIFs, etc.
- Expertise in Common Table Expressions (CTE), Temporary Tables, Table Variables, and String Functions.
- Proficient in Python (Pandas, NumPy), SQL, Power BI, Azure Data Factory and R Programming with a strong background in developing and optimizing ETL pipelines and interactive dashboards.
- Adept at transforming messy, unstructured data into actionable insights, improving decision-making and operational efficiency.
- Utilized DAX to create custom measures, dynamic filters, and calculated columns within Power BI to support reporting.
- Enhanced decision-making by developing real-time Power BI dashboards for sales and marketing teams.
- Skilled in creating a variety of visualizations, including bar charts, scatter plots, and maps.
- Proficient in creating interactive and dynamic dashboards using Tableau.

- Managed multiple JIRA Tickets and provided support to global vendors.
- Experienced with writing code in R to manipulate data for data loads, data extracts, and statistical analysis using various packages like dplyr, tidyverse, ggplot2.
- Expert in creating detailed documentation for the data cleaning process, outlining each step taken and tools used.
- Strong adaptability and eagerness to learn new technologies.
- Ability to work effectively both independently and in team environments.

Skills

Data Analysis Tools: Excel, Google Spreadsheets, Power BI, BigQuery

Programming: Python (Pandas, NumPy), R (tidyverse, ggplot2), DAX

Database: SQL (Advanced Queries, Optimization)

Soft Skills: Collaboration, Stakeholder Management, Communication

Professional Experience

Client: Amway

Role: Data Analyst

March 2025 – November 2025

- Managed the full data lifecycle including cleaning, profiling, and conversion to maintain data integrity and support BI initiatives.

- Crafted clear, goal-oriented reports and presentations that effectively communicated key business insights and data findings to stakeholders, including senior management.
- Developed and optimized ETL pipelines using Azure Data Factory, reducing data processing times by 25%.
- Designed interactive dashboards and KPIs in Tableau and Power BI, boosting reporting efficiency by 20%.
- Utilized advanced SQL techniques to analyze large datasets and ensure data consistency across multiple databases.
- Employed dplyr, tidyverse in R Markdown to clean and manipulate large data sets.
- Continuously looked for ways to improve data quality, streamline analysis, and drive better outcomes.
- Worked cross-functionally to support operations and business teams.
- Regularly monitored data flows and reporting logic to catch and correct issues before they impacted decisions.
- Maintained comprehensive data documentation, data models, and relationships, ensuring clarity for the team and stakeholders.

Environment: ETL, Excel, SQL, Power BI, R Program, Tableau, Azure.

Associate Data Analyst

Aarvion IT Pvt Ltd.

April 2021 - September 2022

- Collected large datasets from different sources like excel files, azure database, azure blob storage.

- Validated imported data for accuracy and reliability by working closely with QA teams.
- Resolved data quality issues by designing end-to-end data cleaning and profiling processes, improving report accuracy and enabling reliable business intelligence reporting.
- Identified, analyzed, and interpreted trends and patterns in complex data sets.
- Led data governance initiatives to set quality standards, security, and privacy regulations across digital systems.
- Created and analyzed reports using Excel to track KPIs and process metrics.
- Created queries to segment customers, calculate revenue trends, and extract insights from raw retail data.
- Employed Python (Pandas, NumPy) for data mining, visualization, and statistical analysis.
- Utilized advanced SQL techniques to analyze large datasets and ensure data consistency and integrity across multiple databases.
- Developed robust Power BI models with advanced DAX formulas and Power Query.
- Maintained comprehensive data documentation, data models, and relationships, ensuring clarity for the team and stakeholders.
- Worked on tasks assigned to sprint cycle (SQL and Python) and attended daily stand calls.

Environment: Excel, SQL, Python, Power BI, R Program, Azure Data Factory, ETL.

Entry Level Data Analyst

Virtusa Systems Private Limited.

October 2017 – January 2021

- Supported continuous improvement initiatives in data collection and analysis methodologies.
- Created database objects and conducted troubleshooting using SQL and MS Excel for data manipulation.
- Wrote complex SQL queries to extract, transform, and analyze data from relational databases.
- Generate daily, weekly, and monthly reports on key business metrics.
- Designed interactive Power BI dashboards, providing real-time visibility into customer behaviour trends, which helped leadership make faster, data-backed decisions.
- Collaborated with cross-functional teams to streamline data collection workflows, reducing processing errors.

Environment: Excel, SQL, Python, Power BI

Education:

Bachelor of Technology in Computer Science and Engineering from JNTUH, Hyderabad, June 2017

Certifications

- Google Data Analysts Professional Certification Program from Coursera.
- Associate AWS certification Program from Edureka.
