

Pallavi Reddy

Java Developer

pallaviprg87@gmail.com

(928) – 374 - 3221

Professional Summary

- ❖ Skilled Java Developer with over 5 years of experience in designing, developing, and deploying scalable Java-based web applications.
- ❖ Experienced in various Java frameworks and technologies, with a proven track record of delivering quality software solutions timely that meet business objectives.
- ❖ Experienced in design and connectivity of the database in DB2, Oracle and SQL Server. Experience in implementing agile methodology.
- ❖ Experience in developing application using TDD (Test Driven Development) & Unit testing process.
- ❖ Worked extensively in J2EE JSP, Servlets, JDBC, Struts, spring, MVC, Hibernate, Java-Networking, RMI, WebSphere, and XML and well versed with Oracle database, OS Concepts.
- ❖ Experienced in design and development of MongoDB database schema from scratch
- ❖ Implemented React router for building the single page application.
- ❖ Optimized Microservices using NodeJS and ES6 as interfaces to Cassandra NoSQL database.
- ❖ Hands-on experience in development of Microservices and deploying in Docker.
- ❖ Experienced with J2EE standard compatible Application Servers including Web Logic, Apache Tomcat Deployment process and Integration.
- ❖ Experienced in deploying the microservices on Kubernetes on AWS.
- ❖ Hands-on experience in development of Microservices and deploying in Dockers.
- ❖ Experience using Spring Framework modules like Spring Core container for Dependency Injection, Application context, and Spring ORM.
- ❖ Experienced in process, validate, parse, and extract data from XML using as XSL, XSLT, XML schemas, XPath, XForms, XSL-FO and parsers like SAX, DOM.
- ❖ Experience in deploying the MicroServices using Docker container and ability to setup continuous integration and deployment pipeline using Jenkins with GitHub on AWS or any Cloud Service.
- ❖ Well versed with object-oriented design (OOD), analysis (OOA), and modeling (OOM) based on Unified Modeling Language (UML) architecture.
- ❖ Used Spring Kafka API calls to process the messages smoothly on Kafka Cluster setup.
- ❖ Experience in building MicroServices using springboot and deploying to AWS Cloud.
- ❖ Extensive experience in developing web page quickly and effectively using JavaScript, AngularJS, HTML5, CSS3, jQuery, Node Js and in making web pages cross browser compatible.
- ❖ Experience in using ORM frameworks like Hibernate, JPA and integrating with Spring ORM
- ❖ Experience with Agile/Scrum and Test Driven development (TDD).
- ❖ Proficient in using RDBMS concepts with Oracle, MongoDB, DB2, MySQL and SQL Server.
- ❖ Have extensive experience working on Windows, Linux and Unix Operating Systems.
- ❖ Exposure to NoSQL databases like Apache Cassandra and RDBMS.

TECHNICAL SKILLS:

- Programming languages Java, J2EE, Python, MySQL, JavaScript, Nodejs
- Web Technologies HTML/HTML5, XML, CSS/CSS3, Bootstrap, ReactJS, AngularJS, Angular8 10 11
- Frameworks Spring, SpringBoot, Spring MVC, Hibernate.
- IDEs Eclipse IDE, IntelliJ IDEA
- Methodologies Agile, Waterfall, Scrum
- Testing Tools Junit, Mockito
- Version control Tools Git, Bit Bucket
- Database MySQL, SQL, Oracle, Mongo DB
- AWS Cloud Technologies
- EC2, Elastic Beanstalk, IAM, Cloud Watch, Cloud Trail, Cloud Formation,
- EBS, S3, VPC, Lambda, Auto Scaling, Dockers, SNS, SQS, SWS, DynamoDB
- Application web servers IBM WebSphere, Apache Tomcat.

WORK EXPERIENCE

Autozone – Java Developer

September 2022 – Current

- Extensively used Core Java such as Multi-Threading, Exceptions, and Collections.
- Developed and maintained Microservices-based applications using SpringBoot and Spring Cloud, following best practices for scalability, performance, and reliability.
- Implemented RESTful and GraphQL APIs for communication between Microservices and with external systems, ensuring secure authentication and authorization using JWT and OAuth.
- Implemented responsive and user-friendly UI/UX using Angular 10, Bootstrap, HTML, CSS, and related libraries and frameworks.
- Involved the UI using Angular 10, Angular Material and Bootstrap.
- Developed the application using Spring MVC, JSP, Hibernate, Restful Web Services and MySQL.
- Created JUnit test cases and created set up manuals and user guides.
- Developed The applications using Java 8, Java 11, JSP, J2SE, JDBC, Servlets, Web Services, HTML, TDD and Groovy, JavaScript, JSON etc.
- Used Hibernate for Object Relational Mapping (ORM) and data persistence and Hibernate JPA Entity Manager for CRUD Operations.
- Extensively used Angular CLI to generate Components, Routes, Pipes, Services and unit tests.
- Built and Developed Dashboards and different charts like Control LJ and Assay Review charts using Angular.
- Used Mockito for data mapping along with J-units.

- Worked with various databases, including SQL and NoSQL databases, for data storage and retrieval, and implemented caching mechanisms for performance optimization.
- Designed and implemented RESTful APIs, worked with messaging systems like Kafka, and integrated with various Internal APIs.
- Implemented Automated testing strategies, including unit testing, integration testing, and performance testing, using JUnit, Mockito, and other testing frameworks.
- Developed and optimized distributed data processing applications using Apache Flink for real-time and batch processing of large-scale data.
- Implemented Containerization using Docker and orchestration using Kubernetes for efficient and scalable deployment of applications.

Viatrix – Java Developer

Jun 2019 - Aug 2022

Hyderabad, India

- Worked as a full stack developer to develop web applications using spring, Rest based Web services. Used HTML5, CSS3, JavaScript, JSP, JQUERY, Angular JS, AJAX and Bootstrap in front end.
- Involved in Design, Development, Unit Testing and maintenance of CEC application.
- Involved in writing Spring Configuration XML files that contains declarations and other dependent objects declaration.
- Designed and documented REST/HTTP APIs, including JSON data formats and API versioning strategy.
- Worked extensively with importing metadata into Hive using Scala and migrated existing tables and applications to work on Hive and AWS cloud Developed code for both server side and client side implementations using Spring Web MVC, AOP and Dependency Injection.
- Experience in Developing User Interface (UI) Rich Web Applications and Web Service Applications using HTML 4, XHTML, CSS 2, XML, AJAX, Object Oriented Java Script, ANGULARJS, BOOTSTRAP Framework, RESTful services, JAVA, JSP.
- Working on AWS Elastic load balancing for deploying applications in high availability.
- Developed API for using AWS Lambda to manage the servers and run the code in the AWS.
- Angular JS was used to parse the JSON file using the REST web services.
- Developed business tier components and services using RESTful web services.
- Used Spring Rest Controllers, Spring Web MVC and Spring Boot extensively to implement server side business logic.
- Developed cross-browser/platform HTML5, CSS3, and JavaScript to match design specs for complex page layouts while adhering to code standards.
- Used Spring JPA to design entity data mapping with Oracle DB.
- Involved in JAD sessions with the client and functional team and gave demos on developed functionality.
- Involved in production support for resolving user problems.

- Involved in pre-testing the Web-Service calls with Postman (Plug-in for chrome).

Intern/Mylan – Software Developer

Jan 2019 - May 2019

Hyderabad, India

- Involved in SDLC Requirements gathering, Analysis, Design, Development, Testing, production application using Agile Methodology.
- Experienced in data modelling for NoSQL databases to accommodate unstructured, semi-structured, or rapidly changing data in Java applications.
- Developed rich UIs using XHTML, Java, DOM, and AJAX according to the customer requirement.
- Worked with Single page application framework Angular JS extensively using routing, services, views, and directives.
- Skilled in creating RESTful APIs and microservices using SpringBoot, promoting modularity, and facilitating efficient communication between application components.
- Created AWS Amazon web services EC2 Linux instances and bash scripts to run post processing.
- Worked to secure our RESTful web services using oath with spring security to authenticate any third-party requests Open Shift coming in.
- Used DB2 database and worked on creating critical pivot tables, SQL queries.
- Adapted at building and deploying Spring Boot applications as standalone JAR files or Docker containers, enabling easy deployment and scaling.
- Strong understanding of NoSQL databases, including MongoDB, Cassandra, and others, for choosing the right database solution based on specific application requirements.
- Created and implemented PL/SQL stored procedures and packages.
- Ability to understand and align the execution of the holistic vision of the CI/CD strategy.
- Developed REST web services to facilitate communication between client and servers using JSON data format.
- Participate in front end development using Angular JS, JavaScript, jQuery, HTML, CSS and bootstrap.
- Managed Docker orchestration and Docker containerization using Kubernetes.

EDUCATION

JNTUH University - Bachelors in Computer Science – 2019

Northern Arizona University - Masters in Computer Science – 2023
