EXPERIENCE

AI/ML Backend Engineer – MarketEQ Digital (Miami, FL - Remote)	Jul 2025 – Present
- Built and maintain 2 backend microservices—ActivityWatch ingestion and Screenshot upload—in NestJS (TypeScript)/Python behind the API Gateway. - Designed PostgreSQL schemas and TypeORM migrations for activity events & screenshot metadata; shipped REST APIs with pagination and time-range filters (supports 8-hour scan windows). - Integrated Cloudflare R2 object storage with streaming uploads and signed URLs; delivered upload/list/retrieve endpoints through the gateway. - Containerized services with Docker and deployed on Render (dynamic \$PORT); improved build reliability by adopting SWC (compiles ~150+ files in <1s). - Collaborate with product to prototype and test prompt-based features using tools like OpenAI or HuggingFace.	
Software Developer – Eunimart	Nov 2022 – Jul 2023
- Led development of Marketplace Intelligence Platform—AI-driven analytics in Python/SQL and ML models—boosting insights accuracy 40% and seller engagement 25%. - Built Global Logistics Gateway, integrating cross-border logistics APIs and automating order/return workflows, reducing transaction processing time 30%. - Delivered real-time dashboards in Power BI and implemented structured Python logging with alerts to monitor AI pipeline health and performance. - Optimized Catalog Management System data pipelines and PostgreSQL queries, cutting synchronization latency 35%.	
Research and Software Developer – FewCuts	Mar 2022 – Nov 2022
- Built AutoReels—an end-to-end pipeline that converts long-form videos into 15–60s short reels using speech-to-text and highlight scoring; cut manual editing time by 75% and increased weekly output 3×. - Engineered a FastAPI service with Celery/Redis workers leveraging FFmpeg, OpenCV, and MoviePy for shot detection, smart reframing, and burned-in captions across 9:16/1:1/16:9; processed a 60-min video in <12 min on GPU. - Researched and trained a PyTorch ranking model combining transcript cues, scene changes, and speaker/face activity to pick highlights; improved average watch time by ~22% in A/B tests. - Built LLM-powered title/description and on-brand caption templates (OpenAI/Hugging Face) with brand-safety filters; lifted TikTok/IG Reels CTR by ~18%. - Shipped publishing integrations for YouTube Shorts, Instagram Reels, and TikTok with scheduling and UTM tracking; added a PostgreSQL-backed analytics view for retention and scroll-through metrics.	

PROJECTS

ResearchGPT – Full-Stack AI Research Assistant
- Built ResearchGPT end-to-end with Next.js, FastAPI, and LangChain; shipped a RAG pipeline that scrapes arXiv and indexes 500+ papers into a vector store, delivering citation-backed answers with top-k retrieval. - Implemented document chunking, metadata filters, and GPT-4-grounded responses with inline source citations; optimized caching/async I/O to keep median query latency ≈1.8s.
ChequeExtractor Pro – Intelligent Cheque Data Automation System
- Architected a cloud document-processing platform with FastAPI on GCP, using custom Google Document AI parsers for cheque OCR and entity normalization; improved field accuracy 15% and cut processing time from minutes → seconds (≥10× faster). - Built an end-to-end pipeline—upload with 50% compression, validation, parsing, and Excel export via OpenPyXL with conditional formulas and cross-sheet validation—to generate audit-ready reports and reduce manual reconciliation 80%.

EDUCATION

University of Houston	Aug 2023 – May 2025
<i>Master of Science in Computer Science with Data Analytics. GPA 3.67 out of 4.0.</i>	
Relevant Coursework: Software Design, Cloud Computing, Database Management Tools for Business Analytics, Statistical Methods of Research, Data Mining, Data Visualization, Digital Image Processing.	

SKILLS

Languages: Python, JavaScript, TypeScript, Java, C/C++, PHP, HTML/CSS, Swift, R
Frameworks & Technologies: React, Next.js, React Native, Node.js, Express.js, Redux, Wordpress, CMS, SwiftUI, Flask, FastAPI
Databases/Analytics/AI: MySQL, PostgreSQL, SQL Server, MongoDB, Power BI, TensorFlow, PyTorch, NLP, OpenCV, LangChain, LLM
Cloud/DevOps: AWS, GCP, Microsoft Azure, Docker, Kubernetes, CI/CD
