Clinical Data Manager

Professional Summary

Clinical data management professional with medical training and MPH education, experienced in supporting clinical trials and outcomes research data activities across planning, data capture, cleaning, validation, and quality control. Hands-on experience with EDC systems, query management, audit trails, and regulatory-compliant documentation. Proven collaborator with clinical operations, investigators, and biostatistics teams, with growing exposure to CRO-style workflows and ICH-GCP-aligned data processes.

Core Competencies

- Clinical Data Management Support
- EDC Systems (REDCap, EPIC)
- Data Entry, Cleaning & Validation
- Query Management & Discrepancy Resolution
- Regulatory Compliance (ICH-GCP, HIPAA, IRB)
- Clinical Documentation & Audit Trails
- Cross-functional Team Collaboration
- CNS & Outcomes-Oriented Research Support

Research Experiences

Research Technician & Research Assistant (Clinical Data Management Assistant) | Department of Family & Community Medicine, UTHealth | Houston, TX | Aug 2024 – May 2025

- Supported data management activities, including data collection workflows, validation rules, and quality control procedures for clinical and outcomes studies.
- Managed data entry, verification, and cleaning in REDCap and EPIC to ensure accurate, complete, and consistent datasets.
- Generated and resolved data queries, coordinating with clinical and research teams to address discrepancies and maintain audit trails.
- Performed ongoing data review and validation checks to identify anomalies and support analysis readiness.
- Maintained regulatory-compliant documentation aligned with IRB, HIPAA, and institutional SOPs.

Clinical Experiences

Assistant Professor of Pediatrics & Consultant, Pediatric Cardiology | Chattagram Maa O Shishu O General Hospital (CMOSHMC) | Bangladesh | May 2018 – Apr 2023

- Reviewed inpatient and outpatient medical records to ensure accurate clinical documentation of diagnoses, treatments, and outcomes.
- Abstracted clinical data for reporting, quality improvement initiatives, and audit readiness.
- Identified documentation gaps impacting data quality, reporting accuracy, and regulatory compliance.
- Collaborated with physicians and clinical staff to clarify clinical intent and improve documentation consistency.
- Supported departmental audits and quality improvement initiatives related to clinical records and data accuracy.
