SUMMARY

Experienced Clinical Lab Technician at Labcorp with a strong background in running a variety of assays, troubleshooting lab instruments, and accurately reporting observations. Demonstrated expertise in sample preparation techniques such as liquid-liquid extraction, solid-liquid extraction, and equilibrium dialysis. Adept at maintaining accurate documentation, preparing reagents, and managing standard laboratory inventory to ensure uninterrupted workflow. Committed to upholding safety protocols and maintaining a clean, compliant lab environment, particularly in specialized areas such as endocrinology.

EDUCATION

Dec 2022

B.S., Biological Sciences with a concentration in Microbiology

San Jose State University, San Jose CA

- Minor in Chemistry
- Relevant coursework: Immunology, Bacterial Genetics, Hematology, Pathogenic Microbiology, Microbial Physiology, and Quantitative Analysis

AS, Health Science

May 2020

Diablo Valley College, Pleasant Hill CA

- Relevant coursework: Human Physiology, Human Anatomy, General Bacteriology, and Statistics

EDUCATION LAB EXPERIENCE

Stool Isolates, Pathogenic Microbiology

Nov 2022- Dec 2022

- Collected stool samples in a Clean Stool Transport Vial to isolate enteric bacteria. Utilized biological safety cabinet streak for isolation on four different types of agar plates. Familiar with using microscopy, biochemical testing, and streaking for isolation to identify bacteria. Understand human disease by first identifying a healthy person's normal flora.

Mice Mock Immunization, Immunology

Mar 2021 - Apr 2021

- Familiar with injecting saline into mice subcutaneously, performed an intraperitoneal injection three weeks later. In a biosafety cabinet, mice were dissected to harvest spleen and isolate lymphocytes. Used a hemocytometer to count cells for 4 consecutive days and entered the data into FlowJo Flow Cytometer to get doubling time by comparing the amount of time and the number of living cells.

WORK EXPERIENCE

Clinical Laboratory Technician III, Labcorp, Calabasas

May 2023 - Aug 2025

- Performed a broad range of specimen testing using specialized equipment, accurately document observations, and adhere to safety SOPs protocols.
- Manage to efficiently order standard inventory for all laboratory tests to maintain uninterrupted workflow and testing capacity.
- Maintain a safe work environment by ensuring to follow procedure, wear appropriate personal protective equipment and handle specimens in specialized areas in endocrinology.
- Prepare reagents, record expiration dates for controls and standards for assigned assays.
- Completed and maintained accurate documentation, including batch records, coversheets, preventive maintenance logs, and pending test lists in a timely manner.
- Monitor, operate and troubleshoot instrumentation to ensure proper functionality.
- Effectively operate, maintain, and troubleshoot specialized laboratory equipment including Hamilton Company, Tri-Carb, MicroBeta, A200, Sysmex, and Helmer.
- Skilled in managing hundreds of patient samples daily and performing 1–10 assays per day with accuracy and consistency.
- Skilled in performing liquid-liquid extraction, solid-liquid extraction, and equilibrium dialysis with precision to ensure accurate analyte recovery.

Cashier, Nekter, Danville CA

Nov 2018 - Mar 2020

- Served as shift leader, supervised a team of four, ensuring everyone carried out responsibilities and worked efficiently.
- Served as a temporary manager for several months, developing weekly work schedules for employees and ordering supplies to ensure the company was always well-served and stayed within budget.
- Mentored and trained new team members with positive reinforcement and respect; monitored work progress weekly to improve work productivity.
- Prioritized customer service and kept a clean station to prevent risk of cross-contamination due to allergies.

Barista, Faz Bakery, Danville CA

Feb 2018 - Oct 2018

- Executed daily functions at a bakery and café being an efficient Barista dedicated to making specialty coffee and tea drinks, creating product displays, and contributing to a safe and welcoming cafe environment.
- Managed customers' needs and questions while operating espresso machines, blenders, coffee pots, and other equipment.
- Efficient barista committed to creating specialized coffee and tea drinks, aesthetic displays, and contributing to a safe and friendly environment.

SKILLS

Languages: English and Farsi

Computer: MOLIS, Flow Cytometer, Proficient in Microsoft Word, Excel, and PowerPoint

General laboratory: Pipetting, handling chemical substances, specimen analysis, problem solving, and effective communication.
