

Fatehul Islam

MS SQL Server/ BI Developer

Lansdale, PA-19446

Phone No. (267) 471 – 6399 Email: fatehul.islam8@gmail.com

Professional Summary

- 6+ years of experience as a SQL Developer specializing in **enterprise KPI projects** and **clinical data analytics** using **eClinicalWorks (eCW)**.
- Skilled in designing and maintaining **data warehouses and BI solutions** across **multiple schemas and source systems**, producing accurate insights and reports **once for enterprise-wide use**.
- Expert in **Microsoft BI technologies** including **SSIS, SSRS, Power BI, and QlikView** for dashboards, KPI scorecards, and automated reporting.
- Hands-on experience with **T-SQL, RDBMS concepts, views, triggers, stored procedures, indexes, and constraints** across SQL Server 2008–2022 environments.
- Experienced in **data warehousing methodologies and concepts, dimensional modeling, Data Mart, and OLAP technologies**, integrating clinical, operational, and financial datasets.
- Acquainted with all phases of the **Software Development Life Cycle (SDLC)** including **Systems Analysis, Design, Development, and Implementation**.
- Extensive experience in **ETL/ELT processes, data profiling**, and producing KPIs, tables, reports, and visualizations to support business and clinical decision-making.
- Familiar with **Microsoft Azure, Agile workflows**, and leading teams on **cross-functional BI initiatives**, collaborating with project managers, architects, and business stakeholders.

Technical Skills

Databases	SQL Server 2022, 2019, 2017,2016,2014,2012,2008 R2, 2008
Database Tools	Business Intelligence Development Studio, SQL Server Integration Service (SSIS), SQL Server Reporting Service (SSRS), SQL Server Management Studio, Microsoft Azure SQL Database, Microsoft Azure Synapse.
Data Analysis Tools	QlikView, Power BI and Microsoft Azure data analytics,GitHub.
ETL Tools	SQL Server Integration Service (SSIS), DTS
Reporting Tools	SQL Server Reporting Service (SSRS), Crystal Report, Power BI, QlikView, TLS.ECW
Office Tools	MS WORD, MS EXCEL, MS VISIO, MS Power Point,ECW
Operating Systems	Windows XP, Windows 2008, Windows 7, Windows 8, Windows 8, Windows server 2012/2016 , UNIX.
Project/Customer Management Tool	JIRA, Salesforce, Microsoft Dynamics 365 CRM, Visual Studio Code.
Data Modeling Tool	Visio, Erwin, Kimball's Data Modeling.

Education

Bachelor of Business Administration

National University of Bangladesh
Citizenship Citizen of United States of America
Work History

BI Developer
CAES by Honeywell
Arlington, VA

June 2025- Current

Responsibilities:

- Design, develop, and maintain data warehouse solutions to support CAES's defense and aerospace business operations.
- Build and optimize ETL pipelines SSIS, Azure for integrating data from multiple sources.
 - Develop Power BI / SSRS dashboards and reports to deliver actionable insights for engineering, supply chain, and finance teams.
- Collaborate with cross-functional teams (engineering, program management, operations) to understand reporting and analytics requirements.
- Write and optimize complex T-SQL queries, stored procedures, and functions to ensure high-performance data retrieval.
- Ensure data integrity, quality, and security in compliance with aerospace and defense industry standards and Perform data modeling and dimensional design to support analytics.
- Monitor, troubleshoot, and fine-tune BI solutions for performance and scalability.
- Support ad-hoc data analysis for executives and program managers to enable fast decision-making.
- Stay current with emerging BI tools and cloud technologies (Microsoft Azure, Power Platform) to drive innovation at CAES.

MS SQL Server/ BI Developer
Ashley Furniture
Arcadia, Wisconsin

October 2024- June 2025

Responsibilities:

- Designed, implemented, and maintained enterprise-wide data warehouse solutions; optimized ETL pipelines (SSIS) to integrate data from ERP, CRM, supply chain, manufacturing, retail, and e-commerce systems.
- Created and managed stored procedures, functions, views, and SQL queries; applied validation, cleansing, and transformation rules to ensure data accuracy and integrity.
- Developed Power BI dashboards, SSRS & QlikView reports delivering insights into sales, supply chain, inventory, customer behavior, and marketing campaigns.
- Optimized SQL queries, indexes, and data models for performance tuning in high-volume transactional and analytical environments.
- Collaborated with business stakeholders (merchandising, logistics, finance, operations) to define requirements and supported global reporting operations.
- Maintained and monitored data pipelines; enforced data governance standards (naming conventions, documentation, compliance, and data security best practices).
- Partnered with IT infrastructure teams to manage SQL Server environments (2008–2022, Azure SQL); contributed to automation & reusable ETL frameworks.

- Provided user support and training to ensure adoption of BI tools, troubleshooting issues to minimize downtime

SQL Developer

January 2023- July 2023

Axia women's health

Mount Laurel, new jersey

Responsibilities:

- Designed and maintained a scalable enterprise data warehouse to support clinical, operational, financial analytics and contributed to company-wide KPI projects.
- Developed and optimized ETL processes using SQL Server (T-SQL, SSIS) to integrate data from EMR, billing, and third-party systems; led large-scale data migrations into eClinicalWorks EMR from legacy systems including Greenway and AllScripts.
- Served as lead architect and SME for the enterprise data warehouse, driving strategy, governance, and adoption while ensuring HIPAA compliance and implementing secure data practices across all integrations and reporting solutions.
- Created Power BI dashboards, SSRS reports, and custom SQL queries to deliver insights for executives and clinical stakeholders.
- Monitored and tuned data warehouse performance through indexing, query optimization, and proactive alerting.
- Built an automated patient engagement platform for reminders, digital intake forms, and • emergency notifications.
- Integrated patient forms with eClinicalWorks EMR, enabling auto-population of structured clinical data.

MS SQL Server / BI Developer (SSIS/SSRS)

August 2019 – December 2022

Philadelphia Scientific LLC

Montgomeryville Township, PA

Responsibilities:

- Created and maintained databases, tables, views, stored procedures, triggers, indexes, constraints, and synonyms; developed and optimized T-SQL stored procedures, triggers, queries, and indexed views to ensure data integrity, efficiency, and system performance.
- Monitored and optimized database performance using query tuning, SQL Profiler, and Database Engine Tuning Advisor; rebuilt datasets with T-SQL to improve complex query execution.
- Performed dataset validation and integrity checks; analyzed existing systems, developed new logic, and executed coding, testing, and debugging to enhance applications.
- Designed and delivered Power BI dashboards, KPI scorecards, and SSRS reports, integrating multiple data sources to provide actionable insights; implemented row-level security, application-level security, and advanced DAX calculations.
- Built tabular and multidimensional models aligned with data warehouse standards to support enterprise reporting
- Analyzed complex datasets to extract actionable insights, develop KPIs, and support strategic business and clinical decision-making and timely reporting across multiple systems and schemas.
