

JOHN LOCKARD

607.857.4288 | jlockardiii@gmail.com | Meridian, ID

SUMMARY

Backend Software Engineer with 3+ years of experience building scalable, API-driven systems using C#, .NET Core, and SQL. Proven contributor in regulated financial environments, delivering system improvements and business value through clean architecture, performance optimization, and end-to-end ownership.

EXPERIENCE+WORK

SOFTWARE ENGINEER

American Credit Acceptance, Meridian, ID | *December 2022 - Present*

- Designed, developed, and maintained backend services and RESTful APIs using C#, .NET Core, SQL, and TypeScript to support high-volume car financing and repossession workflows.
- Refactored and optimized legacy systems to improve performance, reliability, and long-term maintainability in a production environment.
- Delivered features and system enhancements tied to over \$1.5M in annualized business value, including:
 - Contributed to a shared address dictionary used by the Repo Management System (RMS), supporting one of the company's most profitable applications (~\$750K/year).
 - Partnered with the Performance Excellence team to enable secure API access for an internal bankruptcy automation tool (~\$360K/year).
 - Implemented enhancements to batch-processed files supporting repossession workflows, improving account address accuracy (~\$524K/year).
 - Introduced canary deployment strategies for Real-Time Performance (RTP), reducing release risk and saving ~\$4.4K per deployment.
- Collaborated closely with product managers, QA, and engineers in an Agile/Scrum environment to estimate work, prioritize features, and deliver on sprint commitments.
- Built and supported internal tooling, including contributions to the Repo Management System (RMS), solving complex domain-specific problems.
- Authored and maintained internal documentation to improve onboarding, knowledge sharing, and long-term system ownership.

GROUP LEADER, DISTRIBUTION *(Promoted from Order Selector)*

CVS Distribution Center, Chemung, NY | *July 2019 - Nov. 2022*

- Promoted to Group Leader within 2 months based on performance and leadership.
- Oversaw daily operations and task assignments for a ~30-person team.
- Built and maintained Excel-based tracking tools to automate performance, attendance, and productivity reporting that did not previously exist.
- Used operational data to identify trends, address inefficiencies, and support staffing and workflow decisions.

YARD WORKER / DELIVERY DRIVER

84 Lumber, Rochester, NY | *June 2015 - June 2019*

EDUCATION

SOUTHERN NEW HAMPSHIRE UNIVERSITY

Computer Science: Software Engineering (BS)

UNIVERSITY OF ROCHESTER

Digital Media Studies (BA)

TECHNICAL SKILLS

PROGRAMMING LANGUAGES

C#, TypeScript, SQL, HTML, CSS, & JSON

FRAMEWORKS & TOOLS

.NET Core, .NET, Angular, AngularJS, Node.js, Git, Docker, Entity Framework Core, REST API, Power Automate, JFrog Artifactory, ASP.NET MVC, & jQuery

CLOUD & DEVOPS

AWS, Bamboo (CI/CD), Docker, Containerization, Bitbucket Pipelines, Visual Studio

DATABASES

SQL Server, DataGrip, MySQL, Relational Databases, NoSQL, Amazon DynamoDB, MongoDB, PostgreSQL

API & INTEGRATION

Third-party API integration, Custom wrapper development, RESTful API creation and maintenance, API versioning & compatibility

TESTING & DEVELOPMENT PRACTICES

Agile & Scrum, Unit Testing, QA Testing, UAT Support, Test-Driven Development (TDD), DevSecOps, Post-Production Verification, Requirements Gathering, System Prototyping, REST API's, SOAP, SDKs, ETL, SDLC, Technical Documentation

COLLABORATION & PRODUCTIVITY TOOLS

Jira, Confluence, Cursor AI, Microsoft Excel, Word, OneNote, Google Suite, Zoom

CERTIFICATIONS

AWS Cloud Practitioner

SOFTSKILLS

Dedicated to Completion & Quality
Efficient Time Management
Excellent Task Prioritization
Team Oriented
Creative & Good Humored
Thoughtful Leadership
Cooperative & Dependable
Knowledge Seeker
Customer-Focused Problem Diagnosis
Client-led Problem Diagnosis
