Senior Full stack Engineer

Full Stack Developer with over 6 years of experience in designing, developing, and maintaining high-performance web applications. Strong focus on React, React Native, Vue.js, Node.js development and MongoDB technologies. Proven track record in building scalable solutions, integrating APIs, and collaborating with cross-functional teams to deliver innovative products aligned with business objectives. Expertise in containerization, and delivering robust, modern solutions using React or Vue frameworks on the frontend and Node.js on the backend.

WORK EXPERIENCE

ThoughWorks

Apr 2023 - Jun 2025

Full Stack Developer

- Built responsive and interactive user interfaces using React and Redux, Vue.js and visually appealing web applications with Material-UI (MUI), Vuetify, Tailwind CSS for styling.
- Implemented React.js components with TypeScript for type safety, utilizing React Hooks and Context API for state management, while integrating Redux for global state management and Redux Toolkit for simplified Redux implementation.
- Developed and integrated key React.js components for a new market platform, including Leaderboard and Team components, with styling implemented using Material-UI (MUI) and custom CSS-in-JS solutions.
- Developed REST APIs using Node.js and Express.js, implemented JWT token-based authentication, and created Node.js models for seamless data interaction with PostgreSQL or MongoDB database.
- Built scalable Node.js backend services implementing middleware for request processing, error handling, and JWT authentication validation.
- Optimized Node.js backend performance through Express.js middleware optimization, implemented caching strategies with Redis, and utilized Node.js clustering for improved scalability.
- Wrote and executed unit and integration tests for Node.js applications using Jest and Supertest, ensuring code quality and reliability of backend services.
- Implemented modern Agile software development methodologies, driving iterative development cycles, stakeholder feedback integration, and timely delivery frameworks that optimized development workflows and ensured successful project outcomes.

Saritasa

Jul 2019 - Mar 2023

This company is known for IoT, AR/VR, and scalable web/mobile applications.

Frontend Engineer

- Developed multiple web applications and user interfaces using React.js, Next.js, Vue.js, Redux, and TypeScript, focusing on building reusable and modular components for scalable enterprise applications.
- Built dynamic and responsive web pages and single-page applications using React.js, Vue.js, Redux, TypeScript, HTML5, CSS3, Tailwind CSS, SASS, Bootstrap, and jQuery, with webpack and grunt for build optimization.
- Leveraged TypeScript to enhance code quality, reliability, and development speed in large-scale enterprise applications, migrated legacy JavaScript codebases to TypeScript with improved code quality and increased developer productivity.
- Developed sophisticated React Native mobile applications with optimized user experiences, implementing advanced state management and performance optimization techniques that enhanced app responsiveness and delivered exceptional user satisfaction.
- Implemented modern development workflows and best practices, ensuring code quality, performance optimization, and maintainable solutions across all development projects.
- Developed dynamic and responsive web applications using Vue.js alongside React.js, implementing Vuex for state management and Vue Router for navigation in single-page applications.

EDUCATION

B.Sc. in Computer Science

University of California • GPA: 3.8

Apr 2015 - Jun 2019

- AWS Certified Cloud Practitioner
- Google Associate React Native Developer
- React.js & Node.js Bootcamp (Udemy)

PROJECTS

Job Portal Web Application

Jan 2025 - Feb 2025

Self Project

- Developed a job portal using **Vue, Node.js, and MongoDB**, enabling job posting and application tracking.
- Added **search and filtering features**, improving user navigation and matching accuracy.

E-Commerce Store Prototype

Jan 2024 - Mar 2024

Capstone Project

- Designed and developed a full-stack e-commerce web app using the **MERN stack (MongoDB, Express, React, Node.js)**.
- Implemented **user authentication** and **Stripe payment gateway**, ensuring secure transactions.

Personal Portfolio Website

Sep 2023 - Nov 2023

Self Project

- Built a responsive portfolio using **React & TailwindCSS** to showcase academic and technical projects.
- Integrated **Node.js & Express** backend for a contact form, improving recruiter outreach.

Data Analysis Dashboard

Sep 2019 - Dec 2019

Academic Project

- Processed and visualized sales datasets using **Python (Pandas, Matplotlib)** to uncover business insights.
- Presented findings through an **interactive dashboard**, aiding data-driven decision-making.

SKILLS

- **Languages:** CSS, HTML, Java, Javascript, PHP, Python, TypeScript
- **Front-End Development:** Angular, React, React Native, Vue, Webpack
- **Back-End Development:** Express.js, Laravel, Node.js
- **Databases:** MongoDB, MySQL, Oracle, PostgreSQL
- **API & Integration:** GraphQL, Paypal, REST API, Stripe
