U.S. Citizen

EDUCATION

KENNESAW STATE UNIVERSITY, College of Computing and Software Engineering.
Bachelor of Science in Computer Science

Marietta, Georgia

SKILLS

Technical: OOP, Rest API, Node.JS, Angular Material, ASP .NET , Git, Apigee API Management, GraphQL
Tools: PostgreSQL, Docker, SonarQube, Postman, Continuous Integration, Unit Testing, GCP, Copilot (AI)
Programming: C#, JavaScript, C++, Java, Python, R, HTML, CSS, Typescript
Languages: English – Native, Vietnamese – Fluent

PROFESSIONAL EXPERIENCE

NCR VOYIX

Atlanta, Georgia

Full-Stack Software Engineer

July 2024 - Present

Updating API Documentation Model

- Developed LOB validation logic ensuring compliance with the systems compatibility matrix and reducing errors by 25%
- Developed RESTful services within a multi-tenant architecture, ensuring reliable scalability and secure data separation across product lines.
- Conducted E2E testing for document validating LOB handling with 100% success rate across multiple environments
- Built and deployed scalable backend services using C#/.NET, enabling multi-tenant enterprise integrations across hybrid environments.
- Designed features with cloud deployment readiness in mind, aligning with GCP-compatible CI/CD pipelines for reliable scalability and security.

SonarQube DevOps Workflow Integration

- Integrated SonarQube into the CI/CD pipeline, automating pull request checks and reducing manual code review by 20%.
- Automated nightly reports of SonarQube scans across frontend and backend projects, ensuring continuous code quality validation and security analysis.
- Deployed code changes through Dockerized environments, streamlining developer workflows and supporting faster releases.
- Streamlined the CI/CD pipeline by incorporating SonarQube, enhancing code quality validation efficiency for developers
- Utilized Google Kubernetes Engine (GKE) to monitor application deployments and review error logs, ensuring stability and reliability of GCP-hosted services.
- Integrated SonarQube scanning workflows with GCP deployments, enabling proactive error detection and improving overall application health visibility.

Developer Experience Redesign

- Utilized Angular framework to add updated styling to the company website, improving the design and appearance by 50%
- Added deep linking feature to API endpoints on Swagger UI so the URL would update upon clicking on certain endpoint
- Implemented exact search functionality so that users can find a specific endpoint based on what they input in the search bar
- Developed a dynamic/responsive page allowing users to access the page across any device, while enhancing user experience

Swagger UI Update API Endpoint

- Redesigned Swagger UI to display request models/schemas directly under each endpoint, reducing user look up time by 50%
- Enhanced user experience by consolidating endpoint schemas in a single block, eliminating the need for excessive scrolling
- Collaborated with Project Managers to deliver a more intuitive API documentation layout, improving developer satisfaction
- Integrated FIGMA designs into development workflows, maintaining consistency in styling, fonts and components
- Implemented mobile responsive layouts and region picker functionality, ensuring seamless accessibility and navigation

NCR CORPORATION

Atlanta, Georgia

Software Engineering Intern

May 2023 – August 2023

Google My Business Integration Project

- Developed a .NET 6 + Angular application, enabling client/server communication with a 25% increase in engagement
- Integrated OAuth authentication with Google APIs, enabling 1,000+ NCR Marketplace customers to securely manage business profiles.
- Participated in agile sprints and code reviews, delivering high-quality solutions in a collaborative, cross-functional engineering team.
