

PROFESSIONAL SUMMARY

Dynamic and results-driven Senior Software Engineer with extensive experience in designing and implementing high-quality software solutions. Proven ability to enhance system scalability and efficiency, with demonstrated success in leading cross-functional technical initiatives and mentoring engineering teams. Expertise in a variety of programming languages and technologies, including Java, Python and cloud platforms. Committed to driving operational excellence and continuous improvement through strategic application development and automated testing.

PROFESSIONAL EXPERIENCE**Senior Software Engineer****Jul 2024****Cloud Data Systems Inc****Hartford, CT**

- Designed and developed high-quality software solutions using Java, Spring Boot, and .NET Core, resulting in a 40% improvement in system scalability and efficiency.
- Spearheaded technical initiatives by collaborating with engineering, product, and UX teams to streamline development processes, leveraging Agile methodologies and Azure DevOps.
- Provided hands-on mentorship to junior and mid-level engineers through code/design reviews and training sessions, enhancing team productivity while promoting best practices in Java, C#, and SQL.
- Implemented automated testing methodologies using JUnit, NUnit, and Selenium, reducing bug occurrences by 35% and accelerating development speed.
- Optimized system performance by identifying and resolving complex software issues in microservices architectures, leveraging Azure App Service, Redis Cache, and Kubernetes, improving reliability and uptime by 30%.

Software Engineer**Feb 2024 – Jun 2024****Office of Information Technology Services, NYS Taxation and Finance****Albany, NY**

- Engineered, tested, and maintained COBOL applications, ensuring 100% compliance with coding standards.
- Collaborated with developers, achieving a 30% increase in application performance through effective integration of front-end and back-end systems.
- Deployed C++, C#, GIS, HTML/XHTML, Java, JavaScript, Visual C++, Visual C#, XML, .NET, and AIX DB2 to execute tasks, troubleshoot, update, and modify system components.
- Crafted detailed design specifications for system implementations and integrations; identified business needs to develop automated applications, boosting operational efficiency by 40% and reducing manual processes by 50%.
- Guided technical support by resolving 95% of help desk tickets and data issues within SLA, ensuring 98% system uptime.

Software Engineer**Aug 2022 – Jan 2024****Cloud Data Systems Inc****Hartford, CT**

- Implemented robust applications using the Spring MVC framework, with a focus on controller and backend service classes, and configured Spring Security to protect sensitive data, reducing unauthorized access by 80%.
- Applied J2EE design patterns such as Factory and Singleton throughout the Software Development Life Cycle (SDLC), including gathering, modelling, and design.
- Designed user interfaces with JSP, JavaScript, jQuery, and HTML, enhancing user engagement and interactivity.
- Secured RESTful web services with OAuth2 token-based authorization using Spring Security, establishing MySQL database connections that improved query response time by 25% and streamlined data interactions across applications.

Java Full Stack Developer**Aug 2019 – Jul 2021****Maxis software Private Limited****Hyderabad, India**

- Demonstrated expertise in Full Stack Java frameworks, .NET, SQL, MySQL, and HTML5, leveraging Linux and related technologies to deliver scalable and high-performance applications.
- Increased application functionality by 40% through database design, optimization, and query development with Oracle and MySQL.
- Pioneered scalable application development using J2EE, MVC Architecture, Hibernate, and Spring frameworks.
- Developed and consumed RESTful web services to facilitate efficient communication between front-end and back-end components.
- Deployed and managed applications on AWS, utilizing EC2, S3, and RDS to enhance performance and scalability.

EDUCATION**Master of Science in Data Science****May 2023**

University at Albany, State University of New York

GPA: 3.55**Bachelor of Technology in Computer Science and Engineering****May 2021**

Koneru Lakshmaiah Education Foundation, Guntur, India

GPA: 3.60

TECHNICAL SKILLS**Programming:** .NET, .NET Core, C#, Python, COBOL, R language, SQL, Java, C++, C.**Databases:** MySQL, Oracle, DB2, MongoDB, DynamoDB.**Web Technologies:** HTML, CSS, JS, TS, Angular, React, JSP, Servlets, Hibernates, Spring, Node.js, Open API/Swagger, Bootstrap.**Cloud Platforms & DevOps:** Amazon (AWS), Azure, Google Cloud Platform (GCP), Azure DevOps, CI/CD Pipelines, Git.**Operating Systems/Tools:** Windows, Mac OS, Linux, IOS, Android OS, Mainframe, ServiceNow, RPA, Code Rush, NCrunch, Splunk.
