Summary

Associate Software Engineer with hands-on experience building enterprise applications using Java, Spring Boot, React, Node.js, REST APIs, and relational databases across Agile SDLC environments. Proven ability to develop secure, test-driven, and well-documented microservices with automated testing, CI/CD, and AWS monitoring, improving system reliability and operational efficiency by up to 27%. Driven to contribute to large-scale financial platforms by applying strong software engineering fundamentals, DevOps practices, and continuous learning.

Experience

AI Developer Intern, Ticker

Jul 2025 – Jan 2026

- Developed backend **Java services using Spring Boot** within a **microservices architecture**, building and consuming **REST APIs (JSON/XML)** to support automated financial workflows, reducing manual processing effort by **27%**.
- Implemented business logic, validation, and persistence layers using **JDBC, MySQL, and SQL**, applying **object-oriented programming, design patterns, and concurrency concepts** to improve execution accuracy by **23%**.
- Wrote **unit tests, integration tests, and automated tests** following **Test-Driven Development (TDD)** practices, debugging issues through logging and monitoring to improve system stability and defect resolution time by **19%**.
- Deployed and supported applications through the full **SDLC** using **Git, Jenkins CI/CD pipelines, and AWS services (CloudWatch, CodeDeploy)**, collaborating in an **Agile** environment to reduce post-release incidents by **21%**.

Software Engineering Intern, TechCiti Software Consulting

Jan 2023 – Jun 2023

- Built backend application components and data services using **Java, Spring Boot, Python, and SQL**, integrating relational data stores via **JDBC and MySQL** to improve data availability and accuracy by **26%**.
- Designed and consumed **RESTful web services** using **JSON** within a **service-oriented architecture (SOA)**, accelerating feature delivery and cross-system integration timelines by **21%**.
- Applied **automated testing, interface testing, and validation techniques** to ensure data and service reliability across environments, improving downstream system confidence by **24%**.
- Collaborated with product owners, engineers, and QA teams under **Agile SDLC** practices, documenting APIs and system behavior to increase stakeholder adoption by **18%**.

Software Engineering Intern, BrainyBeam Technologies

Jan 2022 – Jul 2022

- Developed backend services using **Java, Spring Boot, and Python**, applying **object-oriented programming, design patterns, and multi-threading** to improve system throughput and execution stability by **31%**.
- Implemented **REST APIs** and data access layers using **SQL and relational data structures**, improving data ingestion reliability and coverage by **28%**.
- Debugged performance bottlenecks related to **concurrency and parallel processing** through controlled testing and analysis, improving output consistency by **23%**.
- Produced detailed technical documentation covering **Software Development Life Cycle (SDLC) processes, testing strategies, and system design**, reducing onboarding and rework effort by **19%**.

Technical Skills

Programming Languages: Java, Python, JavaScript, SQL

Frameworks: Spring Boot, React, Node.js **Architecture & APIs:** REST APIs, Service-Oriented Architecture (SOA), JSON, SOAP, XML, JDBC, MySQL

Testing: Unit Testing, Integration Testing, Functional Testing, Automated Testing, TDD

DevOps & SDLC: Git, GitHub, Jenkins, CI/CD, Agile, SDLC, Monitoring and Logging

Cloud: AWS Core Services, AWS CloudWatch, CodeDeploy

Security: Secure Coding, Authentication, Authorization, JWT, OAuth 2.0, OpenID Connect, SSL

Foundations: Object-Oriented Programming, Design Patterns, Data Structures, Algorithms, Concurrency, Multi-threading

Education

Northeastern University, Boston, MA

Expected Apr 2026

Master of Science in Computer Software Engineering

GPA: 3.8 / 4.0

Gujarat Technological University, Ahmedabad, India

Aug 2019 – Jun 2023

Bachelor of Engineering in Information and Communication Technology

Projects

Enterprise Financial Workflow Platform

- Designed and implemented a full-stack enterprise application using **Java, Spring Boot, React, Node.js, REST APIs, and MySQL**, improving operational efficiency and reducing manual workflows by **29%**.
- Integrated **CI/CD pipelines with Jenkins** and implemented **AWS monitoring using CloudWatch**, improving deployment reliability and production observability by **22%**.
