EDUCATION

SEATTLE UNIVERSITY

Seattle, WA

Master of Science Computer Science

Minor in Data Science

Cumulative GPA: 3.8 | Dean's List, President's List | National Society of Leadership and Success (NSLS)

Relevant Coursework: Mobile Development, Software Architecture and Design, UX Design, Software Testing and Debugging

EXPERIENCE

THE BOEING COMPANY

Seattle, WA

Software Developer Intern | Seattle University Capstone Project

September 2023 – June 2024

- Developed a mobile application, utilizing Flutter/Dart and Firebase, to detect unresponsive factory workers
- Served as Project Manager for a team of four, overseeing project requirements, planning, and communications between the team, sponsors, and advisors
- Created a new fall detection algorithm, reducing known false positive rates by 94%

BILIMETRIX USA

Seattle, WA

Software Developer Intern

July 2024 – August 2024

- Developed Telemetry Reports pages utilizing ASP.NET/C# and JavaScript, using MVC/MVVM architecture to allow admins to view the app usage across 50+ physician users
- Wrote and maintained unit and integration tests, achieving 100% code coverage throughout project development

TRISHULA AI

Remote

Web/Flutter App Developer Intern

October 2025 – Current

- Proposed a plan to synchronize app state between mobile and desktop platforms using SignalR with a .NET Core server
- Redesigned the UI for various screens, leveraging Figma, ensuring elements maintained consistency, simplicity, and proximity
- Implemented and designed the UI for user login and account creation using two-factor authentication

LEADERSHIP & ADDITIONAL EXPERIENCE

SEATTLE UNIVERSITY

Seattle, WA

Computer Science Grader

October 2024 – March 2025

- Grader for classes consisting of 40-44 students, submitting group work and individual homework assignments
- Provided written feedback and code reviews (Dart) for clarity, correctness, and up-to-date code
- Coordinated with 1-2 professors and one other grader to ensure fair and accurate assessments

PROJECTS

CHROMASCRIBE

Spring 2021 – Winter 2023

- Chosen by the lead professor to take over the front-end development
- Developed a graphical interface using D3.js to allow researchers to analyze and qualitatively code data from participant interviews more efficiently
- Presented at Seattle University's STEM Research Showcase to the university community
- Leveraged JavaScript, Python, HTML/CSS, and Figma for development

RANDOM REWARDS SYSTEM MOBILE APPLICATION

March 2025 – June 2025

- Designed and built a SwiftUI-based rewards app using a "pity" system, with custom animations and 80-90% UI test coverage
- Organized weekly scrum meetings with a professional to present my progress and plan the next sprints
- Utilized local state management and MVVM architecture

SKILLS

Programming Languages: TypeScript, JavaScript, HTML/CSS, Java, Dart, Python, C#, C++, Swift

Technical Skills: Project Management, Mobile Development, Agile, UX Design
