Work Experience

Full Stack Java Developer

Revature - Reston, VA

May 2020 to Present

Client Engagement Portal

- CEP is a web application that was constructed in order to provide a means for clients to easily interact with Revature training batches that are mapped to them.
- Some of the main features include: access to batches mapped to them, see the progress of the batch, plan interventions with batches, indicate whether they would like to hire more talent, and ability to notify Revature admins about these various needs.
- Back-end developed using Spring Boot with Maven, JUnit4 for testing, Swagger for documentation, and in-memory H2 database.
- Front-end constructed primarily using React/Redux, Jest/Enzyme for testing, and Material UI for styling.
- Implemented Spider/Radar using D3 JavaScript Library

TaskBunny

- Task Bunny is a responsive web application that is designed to solve the problem of finding a reliable and cost-effective service provider to solve their day to day activities which would save them some quality time to spend with their loved ones.
- Front-end technologies: ReactJS, Bootstrap, MockFlow, HTML, CSS.
- Back-end technologies: Spring Boot, AWS EC2 instance, AWS RDS,
- DevOps and integration tools: Jenkins, Git Hub,
- Query languages: PostgreSQL
- Quality management tools: SonarLint, Sonar Cloud
- Testing frameworks: Jest, JUnit
- Agile Development and project management tools: Trello Scrum Board
- Implemented Spring Security with JWT for Login feature.

Express Server with React Client

- RESTful API created using JavaScript/Typescript, Node.js, Express, and PostgreSQL.
- Project was thoroughly documented and unit tested with Jest.
- After being authenticated by Jason Web Tokens, the API provides the user the requested data.
- Front-end designed using React.

- Server was deployed onto an AWS EC2 so that it could be accessed remotely.
- DevOps pipelines were constructed using Jenkins to allow the use of proper CI/CD.
- Followed Agile/Scrum methodology during the development process.

Platform Experience Associate

Accenture - Mountain View, CA

June 2018 to April 2020

- Assisted the Community Operations Team/Service Delivery Team for a social media client based in Menlo Park, CA
- Improving the platform experience by consulting on archived tickets in a workflow queue created and monitored by teams in cross-functional departments, including Software Engineers, Business Leaders, and Project Coordinators/Managers in an open-office/collaborative environment on-site.
- Implemented client policies and guidelines
- Identified improvement opportunities in workflow and suggest solutions

Software Engineer

Nokia Networks - Manila

2012 to 2016

Common GUI Project

- Development of web based internal Nokia tool for managing network metrics.
- Technologies used were HTML JavaScript for the front end, and Java for the back end.

Diameter Protocol

- Maintenance of the Diameter Module and other modules related to it.
- Analyses and resolves bug fixes
- Acted as Scrum master of the team facilitating huddles, sprint planning, and retrospective.
- Kept track of the tasks handled by each team member.
- Acted as Fault Coordinator keeping track of fault/bugs that the team is handling and delegates them to engineer based on priority.
- Manage cooperation with other counterparts in India and Finland
- Verifies conformance of fault documentation to specifications and design policy

Freelance 3D Artist

Various companies - Manila

2006 to 2011

Tuldok Animation Studios

- Worked on short film titled "Pasintabi"
- Worked on AVPs for marketing
- Created 3D assets and dynamic particle effects such as fire, smoke, and water.
