PROFESSIONAL SUMMARY

Full Stack **Java Developer** with **3 + years of hands-on experience** in designing, developing, and deploying **enterprise-grade web applications** using **Java 8 +, Spring Boot, Microservices, Hibernate, REST APIs, Angular, ReactJS, and SQL/NoSQL databases**. Expertise in building **scalable backend services** and **responsive front-ends**, implementing **CI/CD pipelines (Jenkins, GitLab)**, and deploying applications to **AWS Cloud**. Proven ability to collaborate in **Agile/Scrum** environments across **banking and healthcare** projects, ensuring performance, security, and maintainability using tools such as **Docker, Kubernetes, Maven, JUnit, and SonarQube**.

TECHNICAL SKILLS

- **Programming Languages:** Java 8 +, Python, JavaScript, TypeScript
 - **Frameworks:** Spring Boot, Spring MVC, Spring Security, Hibernate ORM, JPA
 - **Frontend Technologies:** Angular, ReactJS, HTML5, CSS3, Bootstrap, jQuery
 - **Databases:** MySQL, PostgreSQL, MongoDB, Oracle
 - **Build / CI-CD Tools:** Maven, Gradle, Jenkins, Git, GitLab, Nexus
 - **Web Services:** REST API, SOAP, JSON, XML
 - **Cloud Platforms:** AWS (EC2, S3, RDS, Lambda), Azure App Services
 - **Containerization / Orchestration:** Docker, Kubernetes
 - **Testing Tools:** JUnit, Mockito, Postman, Selenium
 - **Monitoring Tools:** Prometheus, Grafana, ELK Stack, CloudWatch
 - **IDEs:** IntelliJ IDEA, Eclipse, VS Code
 - **Version Control:** GitHub, Bitbucket
 - **Methodologies:** Agile, Scrum, SDLC
-

PROFESSIONAL EXPERIENCE

Full Stack Java Developer – Fifth Third Bank

Kentwood, MI | May 2024 – Present

Project: Digital Banking Platform Modernization

- Developed and maintained **microservices using Spring Boot and REST APIs** to process customer transactions and account data.
- Integrated frontend modules built with **Angular 15 and ReactJS** into backend services for seamless UX.
- Implemented **JWT-based authentication and Spring Security** to protect APIs and user sessions.
- Designed and optimized **PostgreSQL schemas**, ensuring data integrity and query efficiency.
- Automated builds and deployments using **Jenkins, Maven, and Docker containers**.
- Deployed microservices to **AWS ECS and EC2**, leveraging **S3 for file storage and CloudWatch** for monitoring.
- Utilized **Hibernate and JPA** for ORM mapping and data persistence with Spring Repositories.
- Conducted **unit and integration testing using JUnit and Mockito** to ensure code quality.
- Collaborated with business teams to gather requirements and deliver sprint goals within Agile framework.

- Integrated **SonarQube for code analysis** and **Nexus for artifact repository management**.
- Enhanced application performance by 30 % through asynchronous API calls and caching strategies.

Environment: Java 11, Spring Boot, Angular, ReactJS, PostgreSQL, Jenkins, Docker, AWS ECS, Maven, JUnit, GitLab, Linux

Java Developer – Sagarsoft Ltd.

Hyderabad, India | Jan 2023 – Jul 2023

Project: Healthcare Claims Processing System

- Developed modular **Spring MVC and Spring Boot** applications for processing health insurance claims.
- Consumed and exposed **RESTful and SOAP APIs** for data exchange between client and third-party systems.
- Utilized **Angular components and Reactive Forms** for real-time data entry and validation.
- Built custom **middleware services** to validate HIPAA compliance and claims rules.
- Employed **Hibernate** to map entity relationships and perform CRUD operations on Oracle DB.
- Configured **CI/CD pipelines** in **Jenkins and GitLab CI** for automated deployment to staging servers.
- Wrote **JUnit test cases and Mockito mocks** to achieve > 90 % code coverage.
- Deployed Dockerized applications to **Kubernetes (AKS)** clusters for scalability and auto-recovery.
- Integrated **ELK Stack** for log management and application monitoring.
- Participated in daily Scrum meetings, peer code reviews, and retrospectives to ensure Agile delivery.
- Optimized SQL queries and application cache, reducing claim processing time by 25 %.

Environment: Java 8, Spring Boot, Angular, Oracle DB, Jenkins, Docker, Kubernetes, ELK Stack, Git, JUnit, Linux

Junior Java Developer – Cyient Ltd. (Manufacturing & IoT Domain)

Hyderabad, India | Jun 2020 – Dec 2022

Project: IoT Device Monitoring and Analytics Platform

- Assisted in developing **Spring Boot microservices** to capture sensor data from IoT devices in real time.
- Created REST endpoints and consumed APIs for data synchronization between devices and dashboards.
- Developed interactive UI components with **HTML5, CSS3, Bootstrap, and AngularJS**.
- Implemented data visualization using **Chart.js** and **D3.js** for analytics dashboards.
- Configured **Jenkins and Git** for continuous integration and version control.
- Automated build process and artifact publishing through **Maven and Nexus**.
- Deployed applications to **Tomcat servers on AWS EC2 instances**.
- Conducted unit testing and debugging using **JUnit** and Postman.
- Collaborated with QA team to fix bugs and enhance performance in production releases.
- Documented API specifications and architecture diagrams using Swagger and Confluence.
- Gained practical exposure to Agile SDLC and DevOps best practices.

Environment: Java 8, Spring Boot, AngularJS, MySQL, Maven, Jenkins, AWS EC2, Tomcat, Git, Linux

EDUCATION

Master of Science in Computer Science

Indiana Wesleyan University, Indiana, USA | Expected Aug 2025

Bachelor of Technology in Computer Science and Engineering

Sri Indu Engineering College of Technology, Hyderabad, India | May 2022

CERTIFICATIONS

- Oracle Certified Professional – Java SE 11 Developer
 - AWS Certified Developer – Associate
 - Docker Certified Associate (DCA)
 - Microsoft Certified: Azure Fundamentals (AZ-900)
 - Full Stack Java Developer – Simplilearn Certification
-
