

JAYANTH REDDY KARRA

DATA ANALYST

Location: Denton, TX. Phone: (940)-320-9344 | Email: jayanthrede@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

- 3 years of experience as a Data Analyst with expertise in ETL, Data Modeling, and Data Warehousing across full project lifecycles.
- Proficient in data visualization using Tableau, Power BI, and Python (Matplotlib, Seaborn), delivering actionable insights.
- Skilled in data mining, predictive modeling, and advanced statistical techniques, leveraging Python (Pandas, NumPy, SciPy) for impactful analysis.
- Expertise in Dimensional Data Modeling and Star Schema for building scalable and efficient data warehouses.
- Advanced SQL skills, optimizing complex queries and ensuring data integrity using PL/SQL in Oracle SQL Developer.
- Experienced with PostgreSQL, Cassandra, and AWS tools (Redshift, S3, and RDS) for efficient data storage and analysis.
- Knowledge of Azure tools like Databricks and Synapse Analytics for distributed computing and cloud-based solutions.
- Strong background in delivering data-driven insights, improving business processes and supporting decision-making in agile environments.

TECHNICAL SKILLS

Category	-	Skills
Languages	-	Python, SQL, R
Libraries	-	NumPy, Pandas, Matplotlib, Scikit-Learn, Seaborn
Databases	-	MySQL, MongoDB, PostgreSQL, Oracle
Visualization Tools	-	Tableau, Power BI, MS Excel
Methodologies	-	Agile, Waterfall
Version Control	-	Git, GitHub
Cloud Technology	-	AWS (S3, Redshift, RDS, Glue), Azure (Data Factory, Blob Storage, Synapse Analytics, Data Lake Storage), Snowflake
Analytical Skills	-	Data Mining, Data Cleansing, Data Visualization, Data Wrangling, Data Warehousing

PROFESSIONAL EXPERIENCE

DATA ANALYST

DEC 2024 – PRESENT

Community Dreams Foundation

FL, USA

- Spearheaded the development of complex PostgreSQL queries to extract, transform, and analyze energy consumption and renewable resource production data ensuring sustainability goals while maintaining compliance with data quality.
- Managed cloud-based data operations on Azure, using Azure Synapse Analytics for querying large-scale datasets and automating ETL processes to ensure robust management of energy data across multiple platforms.
- Developed Power BI reports, implementing **DAX** calculations to enhance performance and deliver real-time insights.
- Streamlined Python to process and analyze environmental data, leveraging predictive models to optimize resource allocation and improve energy grid management.
- Deployed 30+ Tableau dashboards, visualizing critical metrics such as renewable energy output, grid performance, and sustainability KPIs, providing decision-makers with actionable insights for enhancing energy efficiency.
- Employed Azure Synapse Analytics to handle large volumes of energy data, creating real-time reporting solutions to monitor energy production, consumption, and engagement across multiple regions.
- Applied advanced text mining and natural language processing (NLP) techniques to analyze clinical notes, improving workflows, identifying care gaps, and helping the organization enhance member outcomes.

DATA ANALYST

SEP 2024 – DEC 2024

Blue Cross Blue Shield

TX, USA

- Established batch processing applications to automate healthcare data workflows, managing over 5 TB of patient records stored in AWS Data Lakes, ensuring efficient data processing.
- Facilitated scalable data pipelines on AWS to improve member eligibility and provider network analysis, enhancing data accessibility for clinical analytics.

- Integrated ETL/ELT processes using data warehousing solutions to transform over 10 TB of raw healthcare data into structured insights, supporting cost analysis and population health management.
- Engineered Python-based ETL pipelines to integrate fragmented healthcare data into centralized storage, ensuring seamless access for downstream analytics and reporting.
- Automated workflows to streamline processes such as risk adjustment calculations, tracking patient outcomes, and ensuring compliance with regulatory reporting requirements.
- Revamped key healthcare processes by deploying scalable databases and analytics frameworks, enhancing patient monitoring, chronic disease risk assessment, and operational reporting.

Application Developer Associate / Data Analyst

SEP 2021 – AUG 2022

ACCENTURE

INDIA

- Collaborated on a cross-functional team to develop data-driven solutions for a global client, utilizing advanced Python techniques to ensure accurate data processing and transformation.
- Managed large-scale datasets using AWS Glue and S3, designing scalable ETL processes to meet evolving business needs in cloud environments.
- Developed optimized data models in Snowflake, improving data retrieval times and enhancing reporting capabilities across the organization.
- Employed statistical analysis techniques through SciPy and StatsModels to identify trends and forecast outcomes, enabling data-driven strategy enhancements.
- Automated report generation and dashboard updates using Tableau APIs and AWS Lambda, reducing manual workloads and increasing overall project efficiency.
- Guided data processing efforts with Azure Databricks and Apache Spark, integrating machine learning models that resulted in a 20% performance improvement for critical business operations.

DATA ANALYST

APR 2020 – AUG 2021

Ouranos Technologies Pvt. Ltd.

INDIA

- Developed Python scripts to analyze large-scale financial datasets, identifying key trends and providing data-driven insights for strategic decision-making.
- Utilized pandas, NumPy, and AWS S3 for data transformation and cleaning, enhancing data integrity and usability.
- Designed interactive dashboards using Tableau, Matplotlib, and Seaborn, enabling stakeholders to visualize key metrics effectively.
- Automated data pipelines in Snowflake and AWS Glue, ensuring seamless updates and real-time reporting.
- Elevated ETL processes, reducing data processing times by 60%, handling over 10TB+ of data.
- Integrated AWS Lambda and optimized database performance by 40% using Oracle and Cosmos DB for faster query execution APIs.

PROJECTS

• Project Experience: Customer Segmentation and Data-Driven Recommendations

Company: Ouranos Technologies Pvt. Ltd.

Overview: Developed Python-based scripts to analyze customer purchase behavior, using ML models for personalized recommendations. Automated data pipelines for real-time insights using Snowflake and AWS Glue. Created interactive dashboards in Tableau for stakeholder reports. Optimized backend performance by 40%, enhancing website responsiveness and boosting customer satisfaction and sales by 25%.
