EDUCATION

University of Georgia | Athens, GA

May 2025

Bachelor of Science in Computer Science

GPA: 3.97 / 4.00

- **Relevant Coursework:** Software Development, Data Structures, Programming Systems, Web Programming, Database Systems, Computer Hardware, Algorithms, Software Engineering, Computer Networks, Human-Computer Interaction

TECHNICAL SKILLS

Programming Languages: C/C++, Python, Java, HTML/CSS, JavaScript, SQL

Frameworks/Tools: ReactJS, Bootstrap, NodeJS, NextJS, ExpressJS, Unix, Git, GitHub

Database: MS SQL Server, MySQL, PostgreSQL, MongoDB

WORK EXPERIENCE

Network Tree | New York, NY

Jan 2025 – Present

Software Engineer Intern

- Collaborated with cross-functional engineering teams to build a user-friendly network productivity platform with React, serving 1000+ users and boosting user engagement by 30%
- Engineered a robust backend server using NodeJS, ExpressJS and Auth0, leading to a 50% decrease in authentication response times and streamlining security processes
- Deployed application on AWS cloud infrastructure, improving scalability and cutting operational costs by 20%
- Architected MongoDB database to effectively handle large-scale data information and real-time updates, ensuring high availability performance under intensive traffic conditions

Technical Consulting & Research, Inc. | Weston, CT

Sep 2024 – Dec 2024

Software Engineer Intern

- Developed a dynamic commercial user search and activity tracking application using React and Flask, increasing data retrieval by 35% and enhancing monitoring for optimized system performance
- Integrated secure authentication mechanisms utilizing Auth0 and JWT-based backend API authentication, resulting in a 40% reduction in security incidents
- Implemented MongoDB database with role-based access control, ensuring seamless authorization and efficient management of different user roles

UGA Office for Student Success and Achievement | Athens, GA

Aug 2024 – Present

Peer Learning Assistant

- Provided tailored academic assistance to 70+ undergraduates in the Web Programming course
- Guided students in mastering advanced problem-solving techniques and web development concepts
- Cooperated with instructor to improve course materials, enhancing content clarity and fostering a supportive learning environment for students of diverse technical backgrounds

PROJECTS

[Cinema E-Booking System](#) | ReactJS, NextJS, Tailwind CSS, Spring Boot, MySQL

Sep 2024 – Dec 2024

- Developed an interactive cinema e-booking system using ReactJS and NextJS, providing an intuitive user experience for browsing movies, managing bookings, and processing ticket transactions
- Designed a secure backend architecture with Spring Boot following the Model-View-Controller (MVC) design pattern to ensure maintainability and scalability of the system
- Integrated MySQL relational database to efficiently manage user profiles and booking information, optimizing data storage, supporting rapid retrieval, and delivering high-performance operations

[Application Ally](#) | ReactJS, NextJS, Tailwind CSS, NodeJS, ExpressJS, MongoDB

Mar 2024 – May 2024

- Implemented a job application management platform with an intuitive user interface using ReactJS, NextJS, and Job Salary Data API, streamlining the process of searching for active job listings
- Created a secure, token-based authentication backend server with NodeJS, ExpressJS, Bcrypt, and JWT, ensuring robust system security and enabling seamless CRUD operations with real-time data synchronization
- Utilized MongoDB database to maintain consistency and reliability in managing user and job data information

[Image Face Detectify](#) | ReactJS, Tachyons CSS, NodeJS, ExpressJS, PostgreSQL

Dec 2023 – Jan 2024

- Built a user-friendly face recognition web application using ReactJS and Clarifai API, enabling users to accurately detect and visualize faces in images
- Constructed a robust backend server by integrating NodeJS and ExpressJS, responsible for handling user authentication, registration, and securely hashing passwords
- Leveraged PostgreSQL database to manage data information and track user entries efficiently
