PROFESSIONAL SUMMARY

Data Analyst transitioning from education with expertise in Python, SQL, Tableau, and data visualization. Skilled in data cleaning, transformation, feature engineering, predictive modeling, and dashboard creation. Proven ability to translate complex datasets into actionable insights and data-driven strategies, demonstrated through both portfolio projects and analytical approaches to student performance tracking.

TECHNICAL SKILLS

Languages & Libraries: Python, SQL, Pandas, NumPy, Matplotlib, Seaborn, Prophet

Tools & Platforms: Tableau, Jupyter Notebook, Google Colab, Excel

Techniques: Data Cleaning, ETL, Feature Engineering, Regression & Predictive Modeling, Time Series Forecasting, Data Visualization, Dashboard Development

PROJECTS

Workout Data Analysis – Technical Skills Demo

- Consolidated three years of personal workout data; engineered metrics for strength, volume, and performance trends across major muscle groups.
- Automated data cleaning, transformation, and metric generation in Python; visualized progression with Matplotlib, Seaborn, and Tableau dashboards.

Tools: Python, Pandas, SQL, Matplotlib/Seaborn

Business Data Analysis – Actionable Insights

- Cleaned, merged, and transformed multi-year sales datasets; engineered metrics such as purchase efficiency and discount effectiveness to uncover trends.
- Built predictive models (Linear Regression & Random Forest) and visual dashboards in Tableau to highlight sales performance, pricing impact, and marketing opportunities.

Tools & Technologies: Python, Pandas, NumPy, Matplotlib, Seaborn, Tableau, Jupyter Notebook

Links: <https://github.com/Galen-PI/Business-Portfolio-Project>

Business E-Commerce Sales Analysis (SQL & Python, Portfolio Project)

- Consolidated 8+ datasets (42k+ transactions) and performed multi-table joins to analyze SKU-level sales, discounts, and warehouse performance.
- Conducted exploratory data analysis and regression modeling in Python; delivered insights through interactive Tableau dashboards to support strategic pricing and marketing decisions.

Tools: Python, Pandas, NumPy, Matplotlib, Seaborn, SQL, Tableau, Jupyter Notebook, Google Colab.

Labor Market Analysis & Forecasting – Time Series & Forecasting Project

- Analyzed U.S. labor market trends using historical FRED API data (Unemployment Rate, Job Openings, Avg Hourly Earnings, CPI).
- Engineered features like Job Openings per Unemployed, YoY changes, and real wage growth to uncover macroeconomic insights.
- Conducted time series forecasting with Prophet; visualized trends through Tableau dashboards to highlight labor market dynamics and wage trends.

Tools: Python, Pandas, Prophet, Tableau, Jupyter Notebook

PROFESSIONAL EXPERIENCE

High School Social Studies Teacher / Academic Advisor

Dove Science Academy - Tulsa, OK |

Aug 2022–June 2025

- Developed and maintained data-driven student performance tracking systems, analyzing trends to improve achievement from 72% to 80%.
- Designed curriculum and interventions using data analysis to identify gaps and optimize learning outcomes.
- Utilized quantitative performance metrics to provide academic advising and inform strategic scheduling decisions.

Middle School Social Studies & Science Teacher / Department Chair

Chief Paul Memorial School - Kipunk, AK |

Aug 2020– May 2022

- Built and maintained longitudinal datasets to track student performance across subjects, enabling data-informed decision-making over three years.
- Implemented data-driven literacy interventions, resulting in measurable improvement in reading proficiency for 30+ students.
- Leveraged analytical planning to manage scheduling, department initiatives, and cross-department projects..

EDUCATION

- **M.Ed. in Curriculum & Instruction** – Southeastern Oklahoma State University | 2024-2025
- **B.A. in Social Studies/History Education** – Illinois State University | 2018-2020

CERTIFICATIONS

- Python Developer – W3 Schools | <https://verify.w3schools.com/1QC2Z0YQG2>
- SQL Developer – W3 Schools | <https://verify.w3schools.com/1QC2Z0YQG2>
- Pandas Developer – W3 Schools | <https://verify.w3schools.com/1QAS5G35SE>
- NumPy Developer – W3 Schools | <https://verify.w3schools.com/1QAW1BWQV>
- Data Science – W3 Schools | <https://verify.w3schools.com/1QFEUOPJXN>
