Strategic data professional with 15+ years driving business intelligence solutions and transforming raw data into actionable insights.

Professional Summary

Results-oriented Data Analytics Leader with extensive experience in designing and implementing end-to-end business intelligence solutions. Expert in turning complex data into compelling visualizations that drive strategic decision-making. Proven track record optimizing data workflows, managing enterprise-wide reporting platforms, and mentoring cross-functional teams.

TECHNICAL SKILLS AND FRAMEWORKS

BI Tools:	Tableau, Power BI, SSRS, Looker
Databases:	SQL Server, Oracle, Google Big Query, MySQL, PostgreSQL, Redshift
Programming:	SQL, Python, VBA
Methodologies:	Agile, ITIL, Lean Six Sigma

Analytics Developer, Data Science and Tech Team

Links Technology Consultant at Builders Vision | Chicago IL | Jan 2023 – June 2025

Responsibilities:

- Spearheaded enterprise-wide Tableau Online platform implementation while creating a supportive BI ecosystem through data warehouse schema creation, ETL automation, requirements gathering/wire framing, and dashboard development.
- Transformed marketing analytics with real-time dashboards for stakeholder events, improving lead conversion rates and contact engagement.
- Created centralized analytics portal consolidating key reports from Tableau, Salesforce, Posit, and Box, streamlining access to critical business intelligence.
- Developed comprehensive OKR and KPI dashboards integrating disparate data sources, providing executives with unified performance metrics.
- Collaborated with Investment, Operations, and Marketing teams to optimize ETL processes, significantly reducing manual data preparation time.
- Enhanced reporting performance for large-scale investor lead data, improving dashboard responsiveness and user experience.
- Partnered with cross-functional data teams to implement end-to-end reporting solutions in Tableau and Salesforce.

Technical Landscape:

Google Big Query, Tableau, Excel, Salesforce, Git (Global Information Tracker)

Data Analytics Developer, Data Analytics

Chickasaw Consultant at National Institute of Health | Flagstaff | July 2022 – Jan 2023

Responsibilities:

- Redesigned clinical research reporting warehouse, substantially improving dashboard performance through optimized data architecture
- Led strategic data migration initiative for Tableau assets, ensuring seamless transition from test to production environments
- Implemented shared data source strategy, reducing maintenance overhead and ensuring consistent reporting metrics

Technical Landscape:

MS SQL Server, Tableau, Excel, PostgreSQL

Senior Business Intelligence Analyst, Office of the Provost

Northern Arizona University | Flagstaff, AZ | Dec 2021 – July 2022

Responsibilities:

- Created comprehensive faculty data models, streamlining annual review processes and reducing administrative overhead
- Improved course evaluation response rates through targeted reporting and engagement strategies
- Integrate external data with internal databases along with managing and supporting implementation of faculty salary increases, annual reviews promotion & tenure applications, and sabbatical applications.
- Designed and implanted faculty ranking model for equitable stipend allocation, increasing transparency in administrative decisions.

Technical Landscape:

Interfolio, CoursEval, Tableau, Excel PowerPivot and Power Query, Oracle SQL, Google Apps

Business Intelligence Analyst, Office of Strategic Planning and Budgeting

Arizona Governor's Office of Strategic Planning & Budgeting | Phoenix, AZ | Nov 2019 – Dec 2021

Responsibilities:

- Orchestrated performance management system for 35 state agencies, providing executive leadership with critical metrics for strategic decision-making.
- Designed agency-level strategic planning dashboards adopted by the Governor's Office policy and budget teams.
- Led development of COVID-19 pandemic response dashboards, enabling data-driven health policy decisions during crisis.

Technical Landscape:

QuickBase, Tableau, Excel, MySQL, Google Apps

Business Intelligence Analyst, Data Analytics

Arizona State University | Scottsdale, AZ | Sept 2016 – Nov 2019

Responsibilities:

- Managed ASU-Starbucks College Achievement Plan partnership analytics, delivering insights that improved student retention and program effectiveness.
- Engineered custom CRM solution using Google Sheets, providing scalable tracking system prior to Salesforce implementation.
- Developed predictive enrollment models forecasting student pipeline metrics through 2025, enabling strategic resource allocation.

Technical Landscape:

SQL, Tableau, Excel, MS Power BI, SSRS, SSAS, SSIS, Oracle

Systems Analyst, Analysis Insight Management

First Solar | Tempe, AZ | Jan 2014 - Feb 2016

Responsibilities:

- Provide Salesforce.com support two core business functions (O&M and Warranty) by documenting problems, designing, and developing solutions.
- Analyze data in SQL Server and design dashboards in Tableau to answer questions or identify unknown trends.
- Retrieve and process data in Excel via macros for converting data into database table format Tableau can understand and properly process.
- Conduct requirement interviews, data analysis, evaluation of business processes and user needs for better decision making.

Technical Landscape:

SQL, MS SQL Server, Salesforce.com, Excel, Visio, and SharePoint, Tableau

Student Business Analyst

Illinois State University | Normal, IL | May 2010 - Dec 2013

Responsibilities:

- Conducted campus-wide IT infrastructure analysis, documenting network architecture to support optimization initiatives.
- Developed data visualizations for key university metrics, improving administrative decision-making processes.

Technical Landscape:

SQL, MS SQL Server, Salesforce.com, Excel, Visio, and SharePoint, Tableau

Education

- BS in Business Information Systems
Illinois State University

Certifications

- Strategic Performance Management: Suffolk University
- Six Sigma White Belt
- ITIL Version 3 Foundation: Pink Elephant
