Analytics Enhancement | Data Visualization & Reporting | Six Sigma Methodologies | IT Infrastructure Monitoring & Troubleshooting

Operations Analyst | Advanced Data Analysis & Forecasting | Process Optimization | IT Support & Migration | Operational Excellence

Tech-savvy and solutions-oriented analyst with a robust background in data forecasting, process optimization, and strategic decision-making across telecommunications and financial sectors. Proficient in leveraging advanced analytical tools to distill complex data sets into actionable insights. Expertise in enhancing operational efficiencies, driving significant process improvements, and fostering a data-driven culture within organizations.

- Skilled in employing tools, such as MicroStrategy for data modeling and trend forecasting. Expert in designing and implementing process improvements using Six Sigma methodologies aimed at improving operational efficiency and reporting accuracy. Demonstrated excellence in creating sophisticated dashboards and visualizations in Power BI and Tableau.
- Experienced in IT infrastructure monitoring, executing efficient migration processes, and troubleshooting, ensuring system reliability. Well-versed in managing accounts receivable processes, optimizing payment workflows, and enhancing financial reporting within the billing system. Exceptional skills in the development and maintenance of critical operational KPIs.
- Exceptional skills in operational tracking, analytics, and refining operational performance metrics. Track record of fostering cross-departmental collaboration and effectively communicating complex data insights to non-technical stakeholders. Adept in leading cross-functional project teams while ensuring the timely delivery of strategic initiatives.

STRATEGIC LEADERSHIP

Predictive Analytics & Trend Modeling	Accounts Receivable & Payable	IT Solutions & Process Improvements
Advanced-Data Analysis & Forecasting	Dashboard Creation & Reporting	Payment Processing & Financial Operations
Process Optimization Using Six Sigma	Payment Workflow Optimization	Client Satisfaction/Relationship Management
Data Visualization with Power BI & Tableau	Operational Efficiency Improvements	Process Documentation & Reporting
IT Infrastructure Monitoring & Troubleshooting	Quality & Accessibility in Reporting	Database Design/Administration/Analysis
IT Migration Processes Implementation	Key Performance Indicator Reporting	Programming & Financial Modeling

CAREER EXPERIENCE

Spectrum, Charter Communications, Riverview, FL 2021 – 2024
Operations Analyst

Forecasted industry trends and modeled data in MicroStrategy. Enhanced operational tracking and analytics through the development of Excel spreadsheets, incorporating complex formulas. Advanced organizational strategies by analyzing data trends to predict and plan subsequent actions. Maintained accuracy in daily operational reporting by refining KPI scorecards. Supported executive decision-making processes with reports and visualizations. Improved operations by suggesting system changes based on Six Sigma-designed plans. Identified opportunities for performance enhancement in employees and leaders through data analysis. Created documentation and reports on programs, processes, and operations to ensure clarity and understanding. Prepared and presented Quarterly Business Review metrics to executives.

Strategic Impact and Analytical Proficiency

- Amplified predictive analytics capabilities by employing MicroStrategy for trend modeling, significantly enhancing strategic planning and forecasting accuracy. Pioneered the integration of advanced data analysis techniques, placing Spectrum at the vanguard of operational analytics and performance optimization.
- Enabled proactive risk management by developing a predictive model that anticipates operational challenges, using MicroStrategy, resulting in reducing downtime and optimizing resource allocation, while ensuring Spectrum stayed ahead of potential disruptions.

Operational Efficiency and Process Improvement

- Drove substantial improvements in process efficiency and operational quality by spearheading the design and implementation of Six Sigma methodologies. Instituted a streamlined process for KPI scorecard development and maintenance, leading to a marked increase in operational efficiency and reporting accuracy.
- Achieved significant reduction in report generation time by automating data collection and analysis workflows, while streamlining internal processes and enhancing the organization's responsiveness to market changes and operational demands.

Data-Driven Decision Making and Reporting Excellence

- Created and maintained comprehensive dashboards and visualizations, delivering actionable insights to executive leadership. Enhanced the quality and accessibility of operational reporting through the development of sophisticated Excel-based tracking tools, supporting critical business decisions.
- Elevated data transparency across departments by introducing an automated reporting system that consolidates performance metrics, improving decision-making speed while aligning actions closely with strategic objectives.

Innovation in Performance Monitoring and Enhancement

- Conducted in-depth data analyses to identify and act on opportunities for enhancing employee performance and leadership effectiveness, contributing to organizational excellence. Developed and refined operational processes and systems based on analytical findings, leading to improved efficiency and goal achievement.
- Boosted organizational morale and productivity by implementing a data-driven recognition program that highlights exceptional employee achievements, leading to a notable increase in employee satisfaction and a notable improvement in team performance.

Stakeholder Engagement and Executive Communication

- Facilitated high-level Quarterly Business Review sessions, presenting key metrics and insights to executives, and fostering informed strategic discussions and decisions. Authored comprehensive documentation and reports, ensuring clear communication of operational strategies, achievements, and areas for improvement across the organization.
- Optimized executive strategic planning by introducing a real-time analytics dashboard aimed at providing instant access to operational metrics and forecasts, leading to more informed decision-making and an increase in strategic initiative success rates.

KEY PROJECTS

- Directed the implementation of a cutting-edge data visualization project, resulting in enhanced operational insights and strategic decision-making capabilities. Championed the development and execution of a series of process optimization initiatives, leveraging Six Sigma principles, resulting in reducing operational inefficiencies and improving overall performance metrics.

Spectrum, Charter Communications, Tampa, FL 2020 – 2021
Enterprise Accounts Receivable Analyst

Processed monthly cash flow and accounts receivable with precision, ensuring all financial transactions were accounted for accurately. Fostered client satisfaction by swiftly and professionally addressing inquiries and concerns via emails and phone calls, both internally and externally. Innovated a new payment processing workflow adapted to the latest billing system, enhancing efficiency and accuracy in financial operations. Facilitated cross-

departmental collaborations to expedite the resolution of client issues and escalations, ensuring a seamless client experience. Managed the receipt and application of payments from previous clients to the appropriate accounts, maintaining financial integrity and accountability. Contacted clients regarding missing payments to expedite the processing of due accounts or process necessary refunds, ensuring financial consistency.

Enhanced Financial Operations and Client Satisfaction

- Introduced and implemented a novel payment processing method, significantly reducing errors and improving operational efficiency within the billing system. Elevated the precision of financial transactions by integrating an advanced analytics tool that auto-detects discrepancies in accounts receivable.
- Spearheaded initiatives to promptly address and resolve client inquiries and issues, resulting in improved client satisfaction rates and fostering stronger client relationships.

Streamlined Process Improvement and Collaboration

- Pioneered a streamlined approach for the reconciliation of accounts receivable, ensuring accurate financial reporting and enhancing month-end closing procedures. Strengthened interdepartmental cooperation, playing a pivotal role in the timely resolution of escalated client concerns, thereby minimizing potential financial discrepancies.
- Achieved a notable increase in the month-end closing process by automating the reconciliation of accounts receivable.

Proactive Financial Management and Recovery

- Implemented effective strategies for the recovery of missing payments, directly impacting the company's cash flow and financial health positively. Enhanced the accuracy of financial records by ensuring the correct application of payments to client accounts, contributing to the overall reliability of financial data.
- Improved annual cash flow by initiating a targeted communication strategy for clients with outstanding payments, resulting in expedited payment recovery, and maintaining positive client relationships, while ensuring ongoing business continuity.

Innovation in Billing and Payment Processing

- Devised and adopted innovative billing processes that aligned with new technological advancements, setting a benchmark for future operational enhancements. Demonstrated exceptional adaptability and problem-solving skills in managing the transition to a new billing system, minimizing disruption, and maintaining operational continuity.
- Attained significant reduction in operational costs through the development and implementation of a cloud-based billing system.

KEY PROJECTS:

- Led the development and implementation of a cutting-edge billing system process, significantly streamlining payment operations and enhancing data accuracy. Coordinated a comprehensive project aimed at recovering missing payments from previous clients, successfully recouping significant amounts, and improving overall financial health.

Citigroup, Tampa, FL

2019

IT Intern

Monitored Message Queue (MQ) channels using ITRS Geneos for the User Acceptance Testing (UAT) Server, ensuring optimal performance and reliability. Developed stored procedures on SQL Server to log active alerts and updates, enhancing tracking and management of system notifications. Collaborated with the Production Support team to streamline the migration process from SST to ITRS, focusing on efficiency and minimal disruption. Managed and tracked Autosys job schedules, assessing their functionality and performance to maintain seamless operational workflows. Oversaw ServiceNow issue queues directed to Production Support, devising and implementing effective solutions to resolve incoming issues promptly.

Innovative IT Solutions and Process Optimization

- Pioneered the development of sophisticated stored procedures for enhanced alert management, significantly improving system monitoring and response times. Contributed to a major IT migration project, ensuring a smooth transition with minimal impact on ongoing operations, demonstrating foresight and technical proficiency.
- Reduced system downtime by automating monitoring of IT infrastructure components, using advanced scripting in ITRS Geneos.

Operational Excellence and Support

- Played a key role in optimizing system performance and reliability through diligent monitoring and maintenance of IT infrastructure components. Enhanced operational efficiency by assisting in the refinement of job scheduling and execution processes, ensuring critical tasks were completed accurately and timely.
- Improved Autosys job efficiency by developing and implementing a comprehensive tracking and optimization strategy.

Issue Resolution and System Improvement

- Demonstrated exceptional problem-solving skills by addressing and resolving a wide range of ServiceNow issues, contributing to sustained operational excellence. Engaged in continuous learning and application of best practices in IT support and system monitoring, furthering the team's capabilities and service quality.
- Decreased volume of recurring ServiceNow tickets through the development and implementation of a proactive issue resolution framework.

KEY PROJECTS:

- Spearheaded a critical stored procedure project on SQL Server for logging and managing system alerts, setting a new standard for alert management within the IT department. Contributed significantly to the migration project from SST to ITRS, recognized for developing strategies that minimized downtime and enhanced system performance post-migration.

EDUCATION, CREDENTIALS, & CERTIFICATIONS

Master of Science in Finance, Concentration: FinTech, University of South Florida, Tampa, FL, Expected: 2024, GPA: 3.46/4.0

Bachelor of Science in Business Analytics & Information Systems, University of South Florida, Tampa, FL, 2016 – 2020, GPA: 3.40

Bootcamps: Power BI, Web Development, Database Analysis, Java

Delta Sigma Pi Member, Proficient in Python, Learned Java

Google Data Analytics Professional Certificate | IBM Data Analyst Professional Certificate

KEY PROJECTS

Database Design & Administration: Created Entity-Relationship Diagrams (ERDs) for databases using Visio | Updated databases using PowerShell
Utilized SQL Server Reporting Services (SSRS) to create customer and pet reports

Excel with Data Modeling for Business Analytics: Developed Excel reports with MACROS for data tracking | Utilized Tableau for creating and publishing interactive dashboards online | Formatted MACROS for data entry using Visual Basic for Applications (VBA).

TECHNICAL PROFICIENCY

Database & Analysis: SQL Server, Power BI, Tableau

Data Analysis & Visualization: Pivot Tables/VLookups, MicroStrategy, R Programming, Data Modeling/Visualizations
