SUMMARY

Full Stack Java Developer with over 4+ years of professional experience in building secure, scalable, and high-performance web applications across healthcare, finance, and credit services industries. Proficient in Java, Spring Boot, React.js, Angular, and microservices architecture, with strong hands-on expertise in AWS, Docker, Jenkins, and Terraform for cloud deployment and DevOps automation. Experienced in designing RESTful APIs, implementing role-based security, and integrating payment gateways and real-time communication via WebSockets and Kafka. Adept at both frontend and backend development, UI design using Figma, and test automation with JUnit and Mockito. Familiar with Agile methodologies, CI/CD pipelines, infrastructure-as-code, and application monitoring using ELK Stack and SonarQube. Proven ability to collaborate with cross-functional teams to deliver high-quality software solutions in regulated and mission-critical environments.

TECHNICAL SKILLS

- **Languages:** Java, TypeScript, JavaScript, Python, SQL, Shell Scripting
- **Backend / J2EE Technologies:** Java 8/11, Spring Boot, Spring MVC, Spring Batch, Spring Security, Spring Scheduler, Hibernate, JPA, Servlets, JSP
- **Frontend Technologies:** Angular, Angular Material, RxJS, React.js, Redux, HTML5, CSS3, JavaScript, XML, JSON
- **Databases / Caching:** MySQL, Oracle DB, PostgreSQL, MongoDB (NoSQL), Redis
- **Cloud Data Services:** AWS (EC2, S3, RDS, CloudWatch, SNS, SQS, Lambda), Azure Data Factory, Azure Blob Storage, Azure SQL, Azure Functions
- **DevOps Tools:** Docker, Kubernetes, Jenkins, Terraform, CI/CD (Jenkins/GitHub), Spring Cloud Gateway, JWT, OAuth 2.0
- **Messaging / Streaming:** Kafka, RabbitMQ, Kafka Streams, WebSockets, STOMP, JMS
- **Monitoring / Logging / Others:** ELK Stack, Kafka, Websockets, RabbitMQ, Apache ActiveMQ, Prometheus, Grafana, SonarQube, JProfiler, JConsole, Swagger (OpenAPI), Postman
- **Tools / IDEs:** GitHub, Bitbucket, IntelliJ IDEA, Postman, SQL Developer, Jupyter Notebook, Maven, Gradle, Bamboo, Git, GitHub Actions, Visual Studio Code, Sourcetree, Markdown
- **Methodologies:** Agile (Scrum), Waterfall, Test-Driven Development (TDD), Object-Oriented Programming (OOP), Unified Modeling Language (UML), User Acceptance Testing (UAT)

PROFESSIONAL EXPERIENCE

Experian

Full Stack Java Developer

Nov 2024– Present

Tech Stack: Java, Spring Boot, Angular, AWS (EC2, S3, RDS, CloudWatch, SNS), Docker, Jenkins, Terraform, Kafka, Redis, WebSockets, JUnit, Mockito, Figma, SonarQube, ELK Stack

- Developed **scalable microservices** for **data reporting**, **transaction tracking**, and **system accounting**, handling over **5 million transactions** monthly with **99.99% uptime**—architecture designed for **high reliability** and **extensibility**, closely aligning with **credit lifecycle workflows** and **compliance auditing standards**.
- Built **interactive dashboards** in **Angular** with **RxJS** and **Angular Material**, optimizing **frontend performance** with **lazy loading** and **AOT compilation**.
- Secured all **application layers** using **Spring Security**, **JWT**, and **OAuth 2.0**, enabling **robust role-based access control** across user types.
- Authored and documented over **30 RESTful APIs**, integrated with **Swagger UI** for seamless collaboration between **QA** and **frontend teams**.
- Automated infrastructure with **Terraform**, deployed on **AWS**, and set up **Jenkins CI/CD pipelines** using **Docker** for consistent, scalable, and zero-downtime deployments.
- Improved **backend performance** by **60%** with **Redis caching** and **asynchronous processing** via **Apache Kafka**.
- Integrated **secure payment gateways** and implemented **real-time messaging systems** for alerts and user notifications using **Twilio** and **AWS SNS**—aligning with **compliance** and **consumer engagement strategies**.

similar to **credit service platforms**.

- Built Spring Cloud Gateway with rate limiting, error handling, and task scheduling, and developed real-time features using **WebSockets** and **chatbots** for financial platforms.
- Achieved **85%+ test coverage** using **JUnit** and **Mockito**; monitored **application performance** via the **ELK Stack**.
- Collaborated in **Agile sprints**, participated in **code reviews**, and translated **Figma designs** into **responsive frontend components**.

Change Healthcare

Full Stack Java Developer

Nov 2023– Oct 2024

Tech Stack: Java, Spring Boot, React.js, Redux, MySQL, Hibernate, Docker, IntelliJ, GitHub, Git, GitHub Actions (or Jenkins), Swagger, JUnit, Mockito, Chart.js, HTML5, CSS3, JavaScript, JSON

- Built **30+ RESTful APIs** using **Spring Boot** to support **patient records**, **appointment scheduling**, and **billing**, reducing **backend response times** by **40%** and improving **data consistency** across modules.
- Implemented **role-based access control (RBAC)** with **Spring Security** and **JWT** for **Admin**, **Doctor**, and **Patient** users, enhancing **system security** and eliminating **unauthorized access incidents**.
- Developed a **responsive frontend** using **React.js**, **Redux**, and **Axios**, achieving **99.9% uptime** and supporting over **5,000+ monthly active users** across devices.
- Engineered a **billing module** with **invoice generation**, **claim simulation**, and **PDF export**, cutting **manual processing time** by **60%** and reducing **billing errors** by **35%**.
- Created **real-time dashboards** using **Chart.js**, visualizing **15+ KPIs** including **patient vitals** and **clinic performance**, improving **decision-making efficiency** by **25%**.
- Wrote **250+ unit and integration tests** with **JUnit** and **Mockito**, achieving over **85% test coverage** and reducing **post-release defects** by **40%**.
- Containerized the application with **Docker**, ensuring **consistent environments** and reducing **developer setup time** by **70%**.
- Documented **APIs with Swagger**, automated **CI/CD with GitHub Actions/Jenkins** for zero-downtime releases, and contributed to **100+ pull requests** using **Git** and **Agile**, maintaining a **95% sprint delivery rate**.

Carelon Global Solutions

Full Stack Java Developer

Oct 2020– July 2023

Tech Stack: Java, Spring Boot, REST APIs, Hibernate, MySQL, Docker, Kubernetes, React, Jenkins, Gradle, Maven, SonarQube, JUnit, Mockito

- Built and maintained **15+ microservices** using **Java**, **Spring Boot**, and **Hibernate**, delivering **scalable backend systems** that helped achieve a **95% client satisfaction score** and supported seamless **expansion of product features**.
- Developed and maintained **REST APIs** to enhance **system interoperability**, enabling efficient **data exchange** with **third-party vendors** and **legacy systems**, increasing **integration throughput** by **40%**.
- Automated **build and deployment pipelines** using **Jenkins**, **Maven**, and **Gradle**, reducing **manual intervention** and accelerating **release cycles** by **60%**.
- Improved **backend performance** by optimizing **SQL queries** and implementing **strategic caching mechanisms**, resulting in a **40% reduction** in average **API response time** under **high-load conditions**.
- Refactored **legacy modules** to comply with **SonarQube quality standards**, leading to a **45% reduction** in **code smells** and enhancing **code maintainability** across multiple repositories.
- Designed and implemented **REST/SOAP hybrid services** to support **legacy system integration**, ensuring **continuity of mission-critical workflows** in a **regulated healthcare environment**.
- Collaborated with **cross-functional teams** to enhance **React-based frontend modules**, incorporating **stakeholder feedback** to improve **usability** and reduce **user-reported issues** by **25%**.
- Participated in **User Acceptance Testing (UAT)** cycles, iterating on **client feedback** to improve **feature completeness** and **stability**, helping reduce **go-live delays** by **20%**.

EDUCATION

Texas Tech University, Lubbock, TX

Aug 2023 – May 2025

Master of Computer Science

Gitam University, Bengaluru, India

Aug 2017 – May 2021

Bachelor of Technology in Electronics and Communication
