

Sai Krishna Chittanuri

Data Analyst

Austin,TX | +1 302-307-6032 | saikrishnachittanuri2509@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

- Results-driven Data Analyst with 4 years of expertise in transforming complex datasets into actionable insights using Python, R, and SQL to optimize business strategies and decision-making.
- Adept at Agile methodologies (SDLC, Scrum) and version control (Git/GitHub), fostering collaborative workflows and streamlined project execution.
- Expertise in data cleaning, transformation, and manipulation with Pandas and NumPy, ensuring high-quality datasets for robust analytics and modeling.
- Develop interactive dashboards and dynamic visualizations in Tableau, Power BI, and Excel to translate technical findings into stakeholder-friendly narratives.
- Proficient in big data processing (PySpark) and cloud-based ETL pipelines (AWS S3, RDS, Glue) for scalable data management and integration.
- Advanced SQL proficiency across MySQL, SQL Server, and PostgreSQL, enabling efficient data extraction, analysis, and database optimization.
- Strong analytical thinker with a track record of solving business challenges, delivering presentations, and aligning data insights with organizational objectives.

EXPERIENCE

CVS Health, TX

Data Analyst

Jul 2023 – Present

- Utilize Python and SQL for comprehensive data analysis and develop visualizations using Tableau Seaborn, and Plotly to present insights to stakeholders.
- Led data analysis in Agile and Scrum environments, collaborating with teams to ensure insights aligned with business goals.
- Analyzed datasets using Python, R, and SQL, identifying trends that improved business processes and informed decision-making strategies.
- Designed and maintained interactive dashboards in Power BI and Excel (Pivot Tables, VLOOKUP, DAX), delivering data insights to drive key business initiatives.
- Transformed raw data using Pandas, NumPy, and Matplotlib for efficient cleaning and visualization, enhancing data accuracy and usability.
- Executed ETL processes using SQL across databases like MySQL, PostgreSQL, and SQL Server, ensuring data integrity and seamless system integration.
- Developed and optimized machine learning models using TensorFlow, Keras, and PySpark, driving business insights through predictive analytics.
- Enhanced cloud-based data pipelines using AWS services (e.g., S3, RDS, Glue), improving data accessibility and workflow efficiency.
- Streamlined code versioning with Git and GitHub, ensuring seamless collaboration and code management across projects.

Bytecraft System, India

Data Analyst

Jan 2019 - Dec 2021

- Conducted data analysis using Python and SQL and created interactive dashboards and reports with Power BI to support decision-making processes.
- Performed detailed data cleansing using Python libraries such as Pandas and NumPy, which reduced data errors and improved the quality of datasets used for analysis.
- Developed custom data reports and visualizations using tools like Power BI and Tableau, providing real-time insights that enabled senior management to make data-driven decisions faster.
- Collaborated with cross-functional teams to gather business requirements and translate them into data models, improving reporting accuracy and aligning insights with strategic business objectives.
- Write complex SQL queries (Joins, CTEs, Window Functions) to extract, manipulate, and analyze data.
- Enhanced data security and compliance by conducting regular audits of data storage systems, ensuring that data management processes adhered to industry standards and minimized risk
- Collaborate with stakeholders to define key performance indicators (KPIs) and business metrics.

SKILLS

Methodologies: Agile, Scrum, Kanban

Programming Language : Python, R, SQL

IDEs : Visual Studio Code, PyCharm, Jupyter Notebook

Python & R Packages : NumPy, Pandas, Matplotlib, SciPy, ggplot2, Scikit learn, PySpark, Keras, TensorFlow

Visualization Tools : Tableau, Power BI (Power Query, DAX), Excel (Pivot Table, Pivot Chart, VLOOKUP, XLOOKUP,

Database : MySQL, SQL Server, Mongo DB, PostgreSQL

Cloud Technologies : AWS (S3, RDS, Glue), AZURE Fundamentals

Version Control Tools : Git, GitHub Operating System : Windows, Linux

Analytical Skills: Data Cleaning and Wrangling, Data Mining, Data Modeling, Predictive Analytics

EDUCATION

Masters of Science in Data Science | CUNY Graduate Centre, New York, NY

Jan 2022 – Dec 2023

Bachelors in Computer Science Engineering | Mahatma Gandhi Institute of Technology, India

Jul 2017 – Aug 2021

PROJECTS

Tableau Visualization of QS world rankings:

- Visualized QS world ranking dataset from Kaggle to communicate the most important features that play an important role in the ranking of the university.
- Developed interactive dashboards in Tableau to compare university rankings based on key factors such as academic reputation, employer reputation, faculty/student ratio, and international diversity.
- Implemented data cleaning and preprocessing techniques using Excel and SQL to ensure accuracy and consistency before visualization.
- Extracted key insights from ranking trends, helping users identify patterns and correlations between different ranking parameters.

Voter Tendency Prediction in New York State: Batch Statistics Approach:

- Performed data preparing tasks by preprocessing different datasets from Census data and combining them to create an approximation matching dataset for Evaluation.
- Proposed a method to match Precincts and tracts for approximation.
- Applied statistical analysis and feature engineering techniques to identify key demographic and socioeconomic factors influencing voter tendencies.
- Utilized Python and SQL to clean, transform, and integrate large-scale Census datasets, improving data accuracy for predictive modeling.
- Developed data-driven visualizations and reports to present insights on voting patterns and their correlation with regional demographics.
