

PROFILE

I recently completed a master's degree in data sciences and have over 2 years of IT experience. I am skilled in Python, R, SQL, Java, Tableau, and Power BI, with expertise in building ETL pipelines, analyzing data, and creating visualizations. My experience includes managing Databricks clusters, optimizing code with PySpark, and ensuring efficient memory management. I'm known for my strong problem-solving skills and clear communication. Always eager to learn, I'm excited about applying my analytical skills to help organizations succeed.

EDUCATION

University of North Texas

Denton, TX

Master of Science, Data Science (GPA: 3.8/4.0)

May 2024

- **Relevant Coursework:** Machine Learning, Time Series Analysis and Forecasting, Data Mining, Big Data, Natural Language Processing, Tools for Data Science and Statistics.

Osmania University

Hyderabad, India

Bachelor of Engineering, Electrical and Electronics (GPA: 3.3/4.0)

May 2022

- **Relevant Coursework:** Microprocessor and Microcontroller, Database Systems, Circuit Analysis, Design and Analysis of Algorithms, Data Structures.

WORK EXPERIENCE

GEBBS TECHNOLOGIES

Mumbai, India

Data Engineer

Aug 2020 – June 2022

- Designed, developed, and maintained scalable data pipelines using Python and SQL to process and analyze large datasets.
- Utilized GCP services such as BigQuery, Dataflow, and Cloud Storage for data processing and storage solutions.

Database Management:

- Managed relational databases, optimized SQL queries, and ensured efficient data retrieval and manipulation.
- Implemented data validation and transformation processes to maintain data integrity and quality.

Agile Methodologies:

- Actively participated in Agile ceremonies including sprint planning, daily stand-ups, and retrospectives.
- Collaborated with cross-functional teams to define requirements, develop user stories, and deliver iterative improvements.

Cloud Infrastructure:

- Leveraged GCP to deploy and manage data solutions, ensuring high availability and scalability.
- Utilized GCP tools for monitoring, logging, and alerting to maintain system performance and reliability.

Data Analysis and Reporting:

- Conducted in-depth data analysis to identify trends, patterns, and insights, providing actionable recommendations to stakeholders.
- Created dashboards and reports using tools like Looker and Tableau to visualize key metrics and business performance.

PROJECTS

Automatic Text Summarization using Transformer Models | Python | NLP

Aug 2023 - Dec 2023

- Programmed Graph-Based methodology to construct Transformer models (TF-IDF & BERT) to distill vast textual data with precision.
- Combining statistics and deep learning, it creates concise summaries while keeping the original meaning intact.
- Assessed model performance and fine-tuned to maximize precision. And compared both the model's performance to know which approach has the highest efficiency.

Driver Drowsiness Detection | Python | Computer Vision | OpenCV

Feb 2022 - April 2022

- Developed a model to find the yawning frequency of a driver and when the frequency reaches its limit, siren starts ringing and alerts the drivers.
- The model is also able to differentiate between the facial expressions and yawns with utmost accuracy.

Analyzing Factors Affecting Student Academic Performance | PowerBI | Tableau | Visualization | Analysis |

- Collected and organized raw data, including factors like parents' education, student interest, gender, and financial status into an Excel sheet for analysis.
- Applied various data visualization tools (e.g., Tableau, PowerBI) to identify and analyze key factors affecting student performance, making the data easier to understand and interpret.

- Derived actionable insights to identify trends and relationships, and proposed preventive measures to enhance future student performance based on the analysis results

TECHNICAL SKILLS

Languages: Java, Python, SQL, C, Html, PHP, CSS.

Databases: BigQuery, MySQL, PostgreSQL

Operating Systems: Unix, Linux, Windows, macOS.

Applications: IntelliJ, Jupyter Notebook, Visual Studio Code, R Studio, Excel, Microsoft Office Tools, Git, AWS.

Machine Learning: Pandas, NumPy, Regression Techniques, Clustering Techniques, Scikit- Learn, Tidyverse, dplyr, Tidymodels, caret, TensorFlow

Cloud Platforms: Google Cloud Platform (GCP)

Tools & Technologies: Apache Airflow, Docker, Kubernetes, Looker, Tableau

Methodologies: Agile, Scrum, CI/CD

CERTIFICATIONS AND AWARDS

- CISCO certification in IT Essentials
- IIT DELHI certification in Python (Swayam)
- Coursera certification in SQL
- GCP Associate Cloud Engineer - Google Cloud Certification
