Projects

Fitness Web Application

- Built a fitness web app using Python, JavaScript, HTML, SQLAlchemy, Flask, and VSCode.
- Features included a user-friendly interface, fitness log, workout generator, and user profiles with login authentication.
- The workout generator provided core, upper, and lower body workouts, with duration and intensity togglers, and included hotlinks to Google searches for exercises.
- This was a solo project for the Bachelor's capstone in 2024 and was successful.

Pre-school Database Project

- Team project to build a database for a pre-school using MySQL.
- The database included features for age groups, classrooms, teachers, parents, and children.
- Aided in assigning kids to classrooms, age groups, and teachers for registration, and tracked child-parent-teacher relationships.
- The project was successful.

Leadership and Activities

- Currently playing collegiate football for Lindsey Wilson College, also

played for Birmingham-Southern College, Academic All-Conference

- Senior Dorm Proctor for Baylor High School (2019-20)
- Participated in football, wrestling, track, and lacrosse in high school

Community Involvement:

- Speaking with, and learning from seniors at nursing homes
- Public clean-up
- Putting together meal boxes for those in need
- Assisting with summer camps

Awards and Honors

- SAA Academic All-Conference 2023 at Birmingham Southern College
- Full Football Athletic Scholarship to Lindsey Wilson College for Masters in Data Science
- Bachelors in Computer Science from Birmingham Southern College
- BSC Presidential Scholarship
- BSC Hulsey Scholarship
- Phil Hibbon Award for Baylor School Football
- Baylor School Boarding Scholarship
