EDUCATION

Clayton State University
Bachelor of Science in Biology

Summer 2019 – Fall 2023

Atlanta Technical College
Associate of Science in Biochemistry

Fall 2017 – Summer 2019

RELEVANT COURSEWORK

Introduction to Biology I & II/w Laboratory
Principles of Chemistry I & II/w Laboratory
Principles of Biology I & II/w Laboratory
Ecology/w Laboratory
Animal Physiology/w Laboratory
Genetics
Evolutionary Biology
Cell and Molecular Biology/w Laboratory
Botany

RELEVANT EXPERIENCE

Work Experience

Researcher/Quality Assurance, **ApexSystems**, CenterPoint Energy, May 2024-October 2024

- Conducting review and correction of source records and work orders related to gas and water pipe usage through the SAP ticketing system.
- A Geographic Information System (GIS) was extensively utilized to validate address accuracy within SAP.
- This process demands meticulous attention to detail and strong analytical abilities to assess the appropriate next steps following the review, such as finalizing the case or issuing notifications to request additional information from technicians.
- Great time management skills that optimized high levels success.
- Completed and digitized over 37,000 cases.

Crew Trainer, Qdoba Concourse E, **Paradise Lagardere**, October 2017-August 2018

- After three months as a line worker and team leader, I also took on cooking duties, demonstrating adaptability and strong multitasking skills.
- Earned ServSafe certification.
- After an additional three months, advanced to the role of Crew Trainer—a managerial position responsible for training and supervising employees, as well as performing duties including food preparation, cashier operations, and maintaining sanitation standards.

Laboratory Experience

Summer Internship, **Clayton State University**, January 2023-August 2023

- Performed PCR (Polymerase Chain Reaction) with hair follicles and consumables, to determine if the DNA contained the ALU gene, this gene assists in DNA replication.
- Prepared a 2% agarose solution to make a gel for electrophoresis.
- Conducted ELISA tests on consumable items, including chips and various snacks, to detect the presence of GMOs.
- Enhanced micropipette technique, understanding of the central dogma, and knowledge of PCR significance through the Cell and Molecular Biology course (Spring 2023).
- Recorded and scribed multiple lab reports.

Ecology, **Clayton State University**, August 2021-Decemeber 2021/January 2023-May 2023

- Conducted water titrations to measure O₂ levels within the waters at Reynold's Nature Preserve.
- Collected and identified a variety of macroinvertebrates, such as leeches, dragonflies, salamanders, etc.
- Appropriate personal protective equipment (PPE) was utilized consistently during the handling of chemicals, acids and bases, intended for titration procedures.

SKILLS

- Leadership
- Adaptation
- High emotional stability
- Analytical thinker
- Team player
- Time Management skills
- Self sufficient

Laboratory Skills

- Qualitative/Quantitative analysis data
- Water titration
- Compound microscope user
- Bacterial/Cell culture staining
- PCR (Polymerase Chain Reaction)/Electrophoresis
- Western Blotting
- Micro-pipetting

Computer Skills

- Microsoft Office (Word, Excel, PowerPoint, and Outlook)
- SAP Programming
- RStudio/R Script
- GIS (Geographic Information System)
- Medical equipment (EKG, EEG, and EMG)

Language Skills

- Spanish (Moderate in speaking, Moderate in reading, and Moderate in writing)
