

# Shivani Sareddy

## Java Full Stack Developer

+1 (234) 282-9446 | shivani.s@jobstechmail.com | Ohio, USA

### SUMMARY

Java Full Stack Developer with around 3 years of experience designing, developing, and deploying scalable web applications using Java, Spring Boot, Hibernate, and modern front-end technologies such as React.js and Angular. Experienced in building RESTful APIs, microservices architecture, and integrating databases like MySQL and MongoDB for high-performance data-driven systems. Proficient in implementing CI/CD pipelines using Jenkins, Docker, and Kubernetes, ensuring efficient deployment and code reliability. Experienced in cloud platforms including AWS and Azure for hosting, monitoring. Strong background in Agile development, API security, and performance optimization across front-end and back-end environments.

### SKILLS

**Methodology:** SDLC, Agile, Waterfall

**Languages & Core Java:** Java 8/11, SQL, C#

**Frameworks:** Spring (MVC, Boot, Security), Microservices, Hibernate, JSF, Node.js, React.js, .NET Core

**IDEs:** NetBeans, IntelliJ IDEA, VS Code, Eclipse

**J2EE Technologies:** Servlets, JSP, JSTL, JavaBeans, JDBC

**Web Technologies:** HTML5, CSS3, JavaScript, TypeScript, Bootstrap, jQuery, Ajax, JSON, XML

**Application Server:** Apache Tomcat, IBM Web Sphere

**Cloud Technologies:** AWS, GCP, Azure

**Databases:** MySQL, SQL Server, PostgreSQL, Oracle, MongoDB

**DevOps/Other Tools:** Docker, Kubernetes, UML, Jira, Junit, MS Excel, JMeter

**Version Control Tools:** Git, GitHub, GitLab

**Operating Systems:** Windows, Linux, Mac

### EXPERIENCE

#### Java Full Stack Developer, CVS Health, USA

Jan 2025 – Present

- Assembled and considered healthcare system requirements within Agile methodologies, contributing to designing, developing, testing, and maintaining healthcare applications, ensuring compliance with industry standards.
- Developed scalable and maintainable healthcare applications using Java and Spring Boot, leveraging auto-configuration and production-ready features to support robust, efficient healthcare data management.
- Built healthcare interoperability services using C# and .NET Core to integrate legacy systems with modern applications, implementing HL7 and FHIR standards for seamless patient data exchange across healthcare platforms.
- Industrialized RESTful APIs consume Node.js and React.js, adding modules efficiently to meet project terms and designs.
- Created SOAP-based services for standardized communication and established RESTful services to facilitate efficient, stateless interactions, addressing diverse integration requirements.
- Developed a prescription management module using ASP.NET MVC and Entity Framework, enabling real-time pharmacy integration and medication tracking while ensuring HIPAA compliance and secure data handling.
- Configured and managed AWS infrastructures (VPC, EC2, S3, CloudFront, and ELB) to support healthcare applications with high scalability and reliability while optimizing cost-effectiveness in storing and processing patient data.
- Collaborated with healthcare teams to gather functional requirements and design user-friendly healthcare software solutions using Angular and Material UI, ensuring intuitive interfaces for medical staff and patients.

#### Java Full Stack Developer, Citus Infotech, India

Jun 2021 – Jul 2023

- Led projects using the Waterfall model, meticulously planning and executing each phase, from gathering financial system requirements to designing, implementing, testing, and deploying, ensuring regulatory compliance.
- Utilized HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax, JSON, and XML to craft dynamic user interfaces and enhance interactive web functionality.
- Engineered reusable components in React.js, boosting code maintainability and scalability of web applications.
- Developed financial reporting and analytics modules using C# and ASP.NET Web API, integrating with SQL Server for real-time transaction monitoring and compliance reporting in banking applications.
- Architected and implemented microservices to manage financial transactions, utilizing Hibernate and JPA for seamless database interactions with MySQL, MS SQL Server, MongoDB, and other financial data repositories.
- Leveraged Jenkins to automate build and deployment processes, ensuring integration and delivery of top quality software.
- Integrated Node.js applications with financial databases like MongoDB and MySQL, optimizing data management and real-time data retrieval for financial applications, enabling faster transaction processing.
- Led thorough unit testing with JUnit, maintained code quality and integrity using GitLab, and promoted a collaborative environment fostering team-driven innovation.

### EDUCATION

Master's in Computer science, Kent State University, Ohio, USA

Aug 2023 – Dec 2024

Bachelor's in Electrical & Electronics Engineering, Vaagdevi College of Engineering, INDIA

Aug 2019 – Jun 2022

### CERTIFICATION

Amazon Web Services Developer - Associate
