

Siddhant Soymon

(240) 501-6470 • College Park, MD • siddhant1512@gmail.com • [LinkedIn](#) • [GitHub](#) • [Tableau Public](#)

SKILLS

- **Machine Learning and Analytics:** LTV modeling, user behavior prediction, machine learning, deep learning, A/B testing, causal inference, feature engineering, predictive modeling
- **Programming and Tools:** Python (advanced), R, SQL, Excel (advanced), Tableau, Power BI, TensorFlow, Scikit-learn, XGBoost, Random Forest
- **Data Management:** Data mining, data cleaning, dataset building, data quality, ETL processes, feature engineering
- **Communication:** Stakeholder engagement, business-level English, actionable insights, cross-functional collaboration, presentation skills

WORK EXPERIENCE

Matchmiles

College Park, MD, USA

Data Analyst

March 2025 – December 2025

- Built machine learning models analyzing user behavior and optimizing content value; improved ROI by 22%.
- Designed A/B tests evaluating model performance and implementing insights across product teams.
- Processed and cleaned large datasets building high-quality training data; improved data quality by 25%.

University of Maryland, Robert H. Smith School of Business

College Park, MD, USA

Research Analyst

May 2024 – July 2024

- Developed predictive models using Python (TensorFlow, Scikit-learn) and advanced techniques; improved accuracy by 25%.
- Processed massive datasets cleaning outliers and building quality data for analysis and modeling.
- Presented findings through Tableau dashboards translating complex models for stakeholder decision-making.

Finlatics

Mumbai, India

Business Analyst

February 2022 – March 2023

- Analyzed user behavior and engagement patterns using machine learning; increased retention by 15%.
- Designed models predicting business outcomes; influenced ₹2M in strategic business decisions.
- Collaborated with product teams implementing data-driven insights and driving business results.

PROJECTS

LTV and User Behavior Prediction Models (Python, TensorFlow, Scikit-learn, SQL)

- Built machine learning models predicting long-term user value and behavior patterns.
- Applied deep learning techniques optimizing user portraits and engagement analysis.
- Evaluated model performance through A/B testing and causal inference validation.

A/B Testing and Causal Inference Framework (Python, Statistical Methods, Excel)

- Designed A/B tests validating model predictions and measuring business impact.
- Applied causal inference methods ensuring statistical rigor and actionable recommendations.
- Implemented models in business scenarios translating analytics to strategy.

Data Mining and Quality Enhancement (Python, R, SQL, Data Cleaning)

- Processed massive datasets applying machine learning for data mining and pattern discovery.
- Cleaned and prepared high-quality datasets improving model training and performance.
- Automated data pipelines reducing manual effort 40% and improving data consistency.

EDUCATION

University of Maryland

College Park, MD, USA

Master of Science in Business Analytics, GPA 3.71

December 2024

Focus: Machine learning, predictive modeling, feature engineering, advanced SQL, business analytics

Indian Institute of Technology

Patna, India

Bachelor of Technology in Chemical Engineering, GPA 3.56

June 2023

Strong quantitative foundation, mathematical methods, computational problem-solving
