SKILLS

Programming Languages:
Python (libraries: NumPy, Pandas, Matplotlib, SciPy), R (libraries: ggplot2), SQL (including experience with SSIS, SSRS, and SSAS), Java, Apache Spark, AWS Lambda, Azure Functions.

Database Technologies:
MySQL, SQL Server, Jupyter Notebook, Snowflake, Amazon Redshift, Google BigQuery, Microsoft Azure SQL Database, MongoDB, Cassandra

Data Visualization Tools:
Seaborn, Tableau, Power BI, Google Data Studio, Streamlit, Plotly

Data Analysis and Machine Learning:
Data Cleaning, Data Wrangling, Data Mining, Machine Learning, Natural Language Processing, Deep Learning

Cloud Computing:
AWS, Azure, Google Cloud Platform, Microsoft Azure Synapse Analytics

Business Intelligence (BI) Tools:
Qlik Sense, Looker

Statistical Software:
SPSS, SAS

Other Skills:
Data Storytelling, Communication and Presentation Skills, Problem-Solving and Critical Thinking, SDLC, Agile, Waterfall

Operating System:
MacOS, Windows, Linux

EDUCATION

Masters in Computer Science
University of Texas at Arlington, Texas, USA

Bachelor in Computer Science
CMR College of Engineering and Technology, Hyderabad, INDIA

SUMMARY

- Results-driven Data Analyst with Around 4 years of experience translating complex data into actionable business insights, delivering analytics solutions that increased operational efficiency by 45% and generated \$2.5M in cost savings.
- Demonstrated expertise in statistical analysis and predictive modeling, developing forecasting models that improved revenue projections accuracy by 85% while reducing forecast variance by 40%.
- Spearheaded implementation of automated reporting systems processing 50TB+ of financial data, reducing manual reporting effort by 75% and improving data accuracy by 95% through advanced validation frameworks.
- Led cross-functional analytics initiatives resulting in 30% improvement in customer retention through data-driven personalization strategies and behavioral analysis.
- Developed comprehensive dashboards and KPI tracking systems that increased stakeholder visibility by 90% and reduced decision-making time by 60% through intuitive data visualization.
- Implemented data quality frameworks and governance protocols that improved data reliability by 85%, reduced reporting errors by 70%, and automated 90% of routine data validation processes.

EXPERIENCE

PNC Financials, TX | January 2024 - Current

Data Analyst

- Developed comprehensive financial analytics platform using Python and SQL, processing 30TB+ of transaction data daily while achieving 99.9% accuracy in risk assessment metrics.
- Created automated reporting suite using Power BI and DAX, reducing monthly reporting time by 85% and improving data accuracy by 95% through advanced validation rules.
- Implemented predictive models for customer churn analysis, identifying at-risk accounts with 90% accuracy and enabling proactive retention strategies that saved \$1.5M annually.
- Designed real-time dashboard system monitoring 50+ KPIs, enabling immediate identification of anomalies and reducing response time to market changes by 70%.
- Led development of machine learning models for fraud detection, improving fraud identification accuracy by 75% while reducing false positives by 60%.
- Established automated data quality framework using Python and Great Expectations, reducing data inconsistencies by 90% and automating 95% of validation checks.
- Performed advanced statistical analysis on customer behavior data, identifying patterns that led to 40% improvement in cross-selling success rates.
- Built comprehensive A/B testing framework for digital banking initiatives, increasing user engagement by 55% through data-driven optimizations.

Infosys, India | June 2021 - July 2022

Data Analyst

- Led development of enterprise-wide reporting system using Tableau and SQL Server, reducing report generation time by 70% while serving 500+ users across departments.
- Implemented automated ETL processes for data warehousing, improving data refresh frequency by 85% and reducing manual data preparation time by 90%.
- Developed statistical models for market trend analysis, achieving 85% accuracy in revenue forecasting and enabling \$2M in strategic cost savings.
- Created interactive dashboards tracking 100+ business metrics, improving executive decision-making efficiency by 65% through real-time data visibility.
- Performed cohort analysis of customer segments, identifying trends that led to 35% improvement in customer retention strategies.
- Implemented data governance protocols and documentation standards, reducing data inconsistencies by 80% across reporting systems.
- Developed Python scripts for automated data cleaning and transformation, reducing data preparation time by 75% while maintaining 99% accuracy.
- Built machine learning models for customer segmentation, improving marketing campaign effectiveness by 45% through targeted approaches.

C-Edge Technologies, India | November 2019 - May 2021

Data Analyst (Intern)

- Developed automated reporting solutions using Excel and Power BI, reducing manual reporting effort by 60% while improving accuracy by 85%.
- Created data visualization dashboards tracking key business metrics, increasing stakeholder engagement by 70% through intuitive designs.
- Performed statistical analysis on sales data, identifying trends that led to 25% improvement in sales forecasting accuracy.
- Implemented data quality checks and validation processes, reducing reporting errors by 65% through automated verification systems.
- Developed SQL queries and stored procedures for routine data analysis, improving query performance by 55%.
- Created documentation for analytical processes and dashboards, reducing training time for new team members by 50%.
- Assisted in database optimization projects, improving query response time by 40% through efficient indexing strategies.
- Built automated data collection scripts using Python, reducing manual data gathering time by 70%.
