

Sushma Akula

HEALTHCARE DATA ANALYTICS / EHR IMPLEMENTATION CONSULTANT

USA | +1 (770) 398-0245 | Email:sushma.akula10@gmail.com | [LinkedIn](#)

SUMMARY

Detail-oriented Data Analyst with 3+ years of experience working with large, structured datasets in regulated environments. Strong background in data validation, reconciliation, KPI reporting, and automation using SQL, Python, and Excel. Experienced in identifying data discrepancies, standardizing definitions, and improving reporting reliability across multiple data sources. Proven ability to support audit-ready outputs, investigate root causes, and collaborate with cross-functional stakeholders to ensure data accuracy and governance. Seeking to leverage analytical rigor and data integrity expertise in financial services and investment data environments.

PROFESSIONAL EXPERIENCE

Healthcare Data Analyst | IBM (Internship)| USA

June 2025 – Jan 2026

- Analyzed large-scale structured datasets across payer and provider data environments to validate financial-impact metrics and ensure reporting accuracy.
- Performed record-level reconciliation between multiple data sources to identify discrepancies and reduce downstream reporting errors.
- Developed SQL queries to extract, join, and validate datasets for operational and financial reporting.
- Built Power BI dashboards tracking utilization, cost-of-care, and performance KPIs used for executive-level decision-making.
- Implemented automated data validation checks using SQL and Python to flag missing values, inconsistent coding, and outliers.
- Reduced reconciliation issues by approximately 35% by standardizing metric definitions and strengthening data quality controls.
- Collaborated with compliance and operational stakeholders to ensure reporting outputs were audit-ready and defensible.
- Led healthcare analytics initiatives across payer and provider datasets by analyzing claims, clinical, and operational data using advanced SQL, Python, and Power BI, enabling leadership to track care quality metrics and improving clinical performance visibility by 30% across multi-site healthcare operations.
- Built validation frameworks to monitor completeness, coding accuracy, and reconciliation consistency.
- Established standardized calculation logic to prevent metric interpretation inconsistencies.
- Conducted root cause analysis for recurring data discrepancies and implemented corrective controls.
- Prepared detailed analytical documentation including data dictionaries, metric definitions, and reporting logic, improving cross-team knowledge transfer and reducing onboarding time for new analytics resources by 30%.

EHR Implementation Consultant | Accenture | India

May 2021 – Nov 2023

- Supported system implementations requiring structured data mapping, validation, and migration across enterprise platforms.
- Translated business requirements into structured data specifications and validation rules.
- Conducted data integrity testing during system integration and go-live phases to ensure completeness and consistency.
- Worked with IT and business teams to resolve data discrepancies affecting operational reporting.
- Documented data workflows, transformation logic, and validation procedures to support long-term system sustainability.
- Supported large-scale EHR implementation projects for hospital and outpatient clients by gathering clinical and operational requirements, translating them into functional specifications, and configuring EHR modules that improved clinician workflow efficiency by 22% post go-live.
- Assisted healthcare clients in meeting HIPAA and regulatory requirements by implementing role-based access controls, audit trails, and secure data handling practices, strengthening overall data security posture.

TECHNICAL SKILLS

- **Healthcare Analytics & Reporting:** Healthcare KPIs, Quality Measures (HEDIS, CMS, STAR), Clinical Outcomes Analysis, Population Health Analytics, Risk Adjustment, Utilization Analysis
- **EHR & Clinical Systems:** Epic, Cerner, HL7 Interfaces, FHIR APIs, EHR Workflow Configuration, Clinical Documentation, Order Sets, Patient Records Management
- **Data Analysis & Programming:** SQL (Advanced Queries, CTEs, Optimization), Python (Pandas, NumPy), SAS, Data Validation, Statistical Analysis
- **BI & Visualization:** Power BI (DAX, Healthcare Dashboards), Tableau, Executive Dashboards, Operational and Clinical Reporting
- **Healthcare Data Standards:** HL7, FHIR, ICD-10, CPT, SNOMED, LOINC, Clinical Terminologies
- **ETL & Data Engineering:** ETL Pipelines, Data Integration, Data Quality Checks, Healthcare Data Warehousing, Scheduling and Automation
- **Cloud & Platforms:** AWS (S3, Redshift fundamentals), Azure (Data Storage and Security), Secure Data Access
- **Compliance & Security:** HIPAA, PHI/PII Handling, CMS Reporting, Audit Readiness, Access Controls
- **Requirements & Documentation:** BRD, FRD, Functional Specifications, Data Mapping Documents, SOPs
- **Tools & Collaboration:** Jira, Confluence, ServiceNow, Excel (Advanced), Git (Basics)
- **Process & Optimization:** Workflow Analysis, Process Improvement, Stakeholder Management, UAT Coordination.

EDUCATION

Master | University of North Carolina at Charlotte, USA
Bachelor | Gokaraju Rangaraju College of Pharmacy, India

Jan 2024 – Dec 2025
Aug 2019 – July 2023
